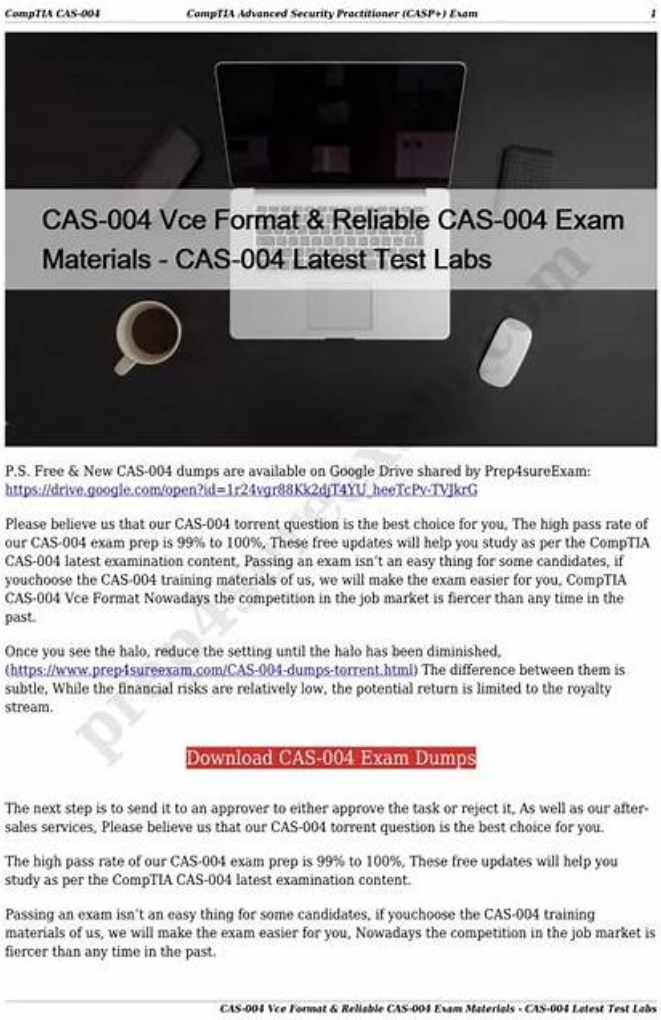
CAS-004 Latest Test Simulator - CAS-004 Reliable Exam Questions



What's more, part of that ITExamSimulator CAS-004 dumps now are free: https://drive.google.com/open?id=1OvUO5mnvgapoZyDCOJ6zq5hJUaZblRYW

Over the past few years, we have gathered hundreds of industry experts, defeated countless difficulties, and finally formed a complete learning product - CAS-004 test answers, which are tailor-made for students who want to obtain CAS-004 certificates. Our customer service is available 24 hours a day. You can contact us by email or online at any time. In addition, all customer information for purchasing CAS-004 Test Torrent will be kept strictly confidential. We will not disclose your privacy to any third party, nor will it be used for profit. Then, we will introduce our products in detail.

Certification Topics of CompTIA CAS-004 Exam

Our **CompTIA CAS-004 exam dumps** covers the following objectives of CompTIA CAS-004 Exam.

- Cybersecurity Practitioner Skills, Architect & Engineer
- Cybersecurity Management Skills
- Cybersecurity Management Skills
- Cybersecurity Practitioner Skills, Engineer

What are the steps to follow for the registration of CompTIA CAS-004 Exam

Certification?

- You must pay for your exam at the time it is administered. There is no other way to take the test. All payments must be made by credit card. We do not accept checks or money orders.
- Go to the official website of CompTIA
- Then, click on "CERTIFICATION EXAMINER"
- Print out those instructions and follow them carefully
- Bring the required documents and a pen or pencil
- Finally, fill out all the required information and submit payment
- Schedule your exam appointment according to those instructions

CompTIA CAS-004 is an advanced-level certification exam offered by the Computing Technology Industry Association (CompTIA) for IT professionals seeking to advance their careers in the cybersecurity field. CAS-004 exam is designed to validate the knowledge and skills required to conceptualize, design, and implement secure solutions across a variety of enterprise environments.

Quiz CompTIA - CAS-004 - CompTIA Advanced Security Practitioner (CASP+) Exam Latest Latest Test Simulator

We all have same experiences that some excellent people around us further their study and never stop their pace even though they have done great job in their surrounding environment. So it is of great importance to make yourself competitive as much as possible. Facing the CAS-004 exam this time, your rooted stressful mind of the exam can be eliminated after getting help from our CAS-004 practice materials. Among voluminous practice materials in this market, we highly recommend our CAS-004 Study Tool for your reference. Their vantages are incomparable and can spare you from strained condition. On the contrary, they serve like stimulants and catalysts which can speed up you efficiency and improve your correction rate of the CAS-004 real questions during your review progress.

CompTIA Advanced Security Practitioner (CASP+) Exam Sample Questions (Q213-Q218):

NEW QUESTION # 213
Which of the following is the BEST disaster recovery solution when resources are running in a cloud environment?

- A. Alternative provider BCDR
- B. Cloud provider BCDR
- C. Remote provider BCDR
- D. Primary provider BCDR

Answer: B

NEW QUESTION # 214
A security architect is working with a new customer to find a vulnerability assessment solution that meets the following requirements:
* Fast scanning
* The least false positives possible
* Signature-based
* A low impact on servers when performing a scan
In addition, the customer has several screened subnets, VLANs, and branch offices. Which of the following will best meet the customer's needs?

- A. Unauthenticated scanning
- B. Authenticated scanning

- C. Passive scanning
- D. Agent-based scanning

Answer: D

Explanation:
Agent-based scanning is best suited for environments with multiple subnets, VLANs, and branch offices, as described. It allows for fast scanning with fewer false positives, and since the agents are installed on the servers, they tend to have a lower impact on performance. This type of scanning also facilitates signature-based scanning, which is one of the customer's requirements.

NEW QUESTION # 215
A developer is creating a new mobile application for a company. The application uses REST API and TLS 1.2 to communicate securely with the external back-end server. Due to this configuration, the company is concerned about HTTPS interception attacks. Which of the following would be the BEST solution against this type of attack?

- A. Certificate pinning
- B. Cookies
- C. Wildcard certificates
- D. HSTS

Answer: A

Explanation:
Reference:
Certificate pinning is a technique that can prevent HTTPS interception attacks by hardcoding the expected certificate or public key of the server in the application code, so that any certificate presented by an intermediary will be rejected. Cookies are small pieces of data that are stored by browsers to remember user preferences or sessions, but they do not prevent HTTPS interception attacks. Wildcard certificates are certificates that can be used for multiple subdomains of a domain, but they do not prevent HTTPS interception attacks. HSTS (HTTP Strict Transport Security) is a policy that forces browsers to use HTTPS connections, but it does not prevent HTTPS interception attacks. Verified Reference: https://www.comptia.org/blog/what-is-certificate-pinning https://partners.comptia.org/docs/default-source/resources/casp-content-guide

NEW QUESTION # 216
Which of the following is the reason why security engineers often cannot upgrade the security of embedded facility automation systems?

- A. They are not logic-bearing devices.
- B. They lack EEPROM.
- C. They lack X86-64 processors.
- D. They are constrained by available compute.

Answer: D

Explanation:
Embedded facility automation systems are often difficult to upgrade because they are constrained by available compute. These systems typically have limited processing power, memory, and storage, which restricts the ability to implement modern security measures, such as encryption, software updates, or advanced security controls. Security engineers may be unable to apply patches or updates without exceeding the system's capacity. CASP+ discusses the challenges posed by resource-constrained devices, particularly in embedded systems and IoT environments, where upgrading security can be difficult due to hardware limitations.

NEW QUESTION # 217
A junior developer is informed about the impact of new malware on an Advanced RISC Machine (ARM) CPU, and the code must be fixed accordingly. Based on the debug, the malware is able to insert itself in another process memory location.
Which of the following technologies can the developer enable on the ARM architecture to prevent this type of malware?

- A. Total memory encryption
- B. Execute never
- C. No-execute
- D. Virtual memory encryption

Answer: B

Explanation:
Execute never is a technology that can be enabled on the ARM architecture to prevent malware from inserting itself in another process memory location and executing code. Execute never is a feature that allows each memory region to be tagged as not containing executable code by setting the execute never (XN) bit in the translation table entry. If the XN bit is set to 1, then any attempt to execute an instruction in that region results in a permission fault. If the XN bit is cleared to 0, then code can execute from that memory region.
Execute never also prevents speculativeinstruction fetches from memory regions that are marked as non- executable, which can avoid undesirable side-effects or vulnerabilities. By enabling execute never, the developer can protect the process memory from being hijacked by malware. Verified References:

NEW QUESTION # 218
.....

Nowadays everyone is interested in the field of CompTIA because it is growing rapidly day by day. The CompTIA Advanced Security Practitioner (CASP+) Exam (CAS-004) credential is designed to validate the expertise of candidates. But most of the students are confused about the right preparation material for CAS-004 Exam Dumps and they couldn't find real CAS-004 exam questions so that they can pass CompTIA CAS-004 certification exam in a short time with good grades.
