## Pass Guaranteed EMEA-Advanced-Support - Professional Fortinet EMEA Advanced Support Exam Premium Files

The best practice indicates that people who have passed the EMEA-Advanced-Support exam would not pass the exam without the help of the EMEA-Advanced-Support reference guide. So the study materials will be very important for all people. If you also want to pass the EMEA-Advanced-Support exam and get the related certification in a short, our EMEA-Advanced-Support Study Materials are the best choice for you. After studying with our EMEA-Advanced-Support exam questions, you will be able to pass the EMEA-Advanced-Support exam with confidence. We sincerely hope that our EMEA-Advanced-Support study materials will help you achieve your dream.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

In Active FTP who sends the PORT command?

- A. There is no PORT command in Active FTP
- **B. The FTP Client**
- C. The FTP Server
- D. Both

**Answer: B**

Explanation:

In Active FTP, the client sends the PORT command to the server, specifying an ephemeral port for the server to initiate the data

connection back to the client. This distinguishes Active FTP from Passive FTP, where the server provides the port. The server does not send PORT, and the command is a key part of Active FTP. Exact extract: "In Active FTP, the client sends a PORT command to the server, specifying the IP address and port number for the data connection... The server then initiates the data connection to the client's specified port."

#### NEW QUESTION # 43

Which protocols are used by an email client to retrieve emails?

- A. IMAP4
- B. POP3
- C. SMTP
- D. SNMP

**Answer: A,B**

Explanation:

Email clients use POP3 (Post Office Protocol) and IMAP4 (Internet Message Access Protocol) to retrieve emails from a server. POP3 downloads emails and typically removes them from the server, while IMAP4 allows synchronized access. SMTP is used for sending emails, and SNMP is for network monitoring, not email retrieval. Exact extract: "Email clients use POP3 or IMAP to retrieve email messages from a mail server... IMAP allows users to access and manage email directly on the server, while POP3 typically downloads messages to the client."

#### NEW QUESTION # 44

Which FortiGate feature supports load balancing across multiple WAN links?

- A. Link Aggregation
- B. SD-WAN
- C. Virtual Routing
- D. Multi-Path Routing

**Answer: B**

Explanation:

FortiGate's SD-WAN feature enables load balancing and intelligent traffic steering across multiple WAN links based on criteria like bandwidth, latency, or application. Link Aggregation (B) bonds interfaces, Virtual Routing (C) is VRF, and Multi-Path Routing (D) is not a standard term. Exact extract: "SD-WAN enables load balancing and traffic steering across multiple WAN links, optimizing performance and reliability based on configured rules and metrics."

#### NEW QUESTION # 45

What happens when a FortiGate detects a SYN flood attack?

- A. It drops all incoming packets
- B. It applies rate limiting to SYN packets
- C. It redirects traffic to a backup gateway
- D. It enables proxy-based inspection

**Answer: B**

Explanation:

When FortiGate detects a SYN flood attack, it applies rate limiting to SYN packets via a DoS policy, dropping excessive packets to mitigate the attack. It does not drop all packets (A), enable proxy inspection (B), or redirect traffic (D). Exact extract: "FortiGate mitigates SYN flood attacks using DoS policies, which apply rate limiting to SYN packets to prevent overwhelming the system."

#### NEW QUESTION # 46

TCP protocol can be used for data delivery via multicast

- A. No
- B. Yes

**Answer: A**

Explanation:

TCP is a unicast, connection-oriented protocol that ensures reliable data delivery between two endpoints using sequence numbers and acknowledgments. Multicast, which sends data to multiple recipients, is supported by UDP, not TCP, due to TCP's requirement for a direct connection. Fortinet devices handle multicast traffic via UDP-based protocols like IGMP or PIM. Exact extract: "TCP is a unicast protocol that establishes a reliable connection between two devices... Multicast traffic, such as streaming or group communications, relies on UDP, as TCP does not support multicast delivery."

## NEW QUESTION # 47

.....

Looking for latest EMEA-Advanced-Support exam questions? You can pass the certification exam easily with our EMEA-Advanced-Support practice exam. With the help of our study guide, you will save lots of time to practice EMEA-Advanced-Support vce pdf and boost confidence in solving the difficult questions. Our training materials can help you learn about the knowledge points of EMEA-Advanced-Support Exam Collection and improve your technical problem-solving skills.
