With the development of the times, the pace of the society is getting faster and faster. If we don't try to improve our value, we're likely to be eliminated by society. Under the circumstances, we must find ways to prove our abilities. For example, getting the PDII Certification is a good way. If we had it, the chances of getting a good job would be greatly improved. And our PDII exam brandumps are the tool to help you get the PDII certification.

Salesforce PDII certification is a valuable asset for developers seeking to advance their careers in the Salesforce ecosystem. Platform Developer II certification is recognized by top employers and companies in the industry, and is a key credential for developers seeking new job opportunities or promotions. Certified developers are able to create more advanced and complex applications on the Salesforce platform, and are able to command higher salaries and more prestigious positions.

Salesforce Certified Platform Developer II (PDII) certification is a popular certification among professionals who want to demonstrate their expertise in developing custom applications on the Salesforce platform. Platform Developer II certification exam evaluates the candidate's ability to develop advanced solutions using Apex and Visualforce, as well as various integration technologies. The PDII Certification is an advanced certification that validates a developer's ability to design and implement complex business logic, data models, and interfaces. Additionally, the certification exam covers topics such as Apex design patterns, asynchronous processing, and testing methodologies.

desire to ace the Platform Developer II (PDII) exam in a short time.

## Salesforce Platform Developer II Sample Questions (Q26-Q31):

### NEW QUESTION # 26

A company has reference data stored in multiple custom metadata records that represent default information and delete behavior for certain geographic regions.

When a contact is inserted, the default information should be set on the contact from the custom metadata records based on the contact's address information.

Additionally, if a user attempts to delete a contact that belongs to a flagged region, the user must get an error message.

Depending on company personnel resources, what are two ways to automate this?

Choose 2 answers

- A. Apex invocable method
- B. Remote action
- C. Apex trigger
- D. Flow Builder

**Answer: C,D**

### NEW QUESTION # 27

A company has a custom object Sales\_Help\_Request\_\_c that has a Lookup relationship to Opportunity. The Sales\_Help\_Request\_\_c has a number field, Number\_of\_Hours\_\_c, that represents the amount of time spent on the Sales\_Help\_Request\_\_c.

A developer is tasked with creating a field, Total\_Hours\_\_c, on Opportunity that should be the sum of all of the Number\_of\_Hours\_\_c values for the Sales\_Help\_Request\_\_c records related to that Opportunity.

What should the developer use to implement this?

- A. A roll-up summary field on the Opportunity object
- B. A trigger on Sales\_Help\_Request\_\_c
- C. A trigger on the Opportunity object
- D. A workflow rule on the Sales\_Help\_Request\_\_c object

**Answer: C**

### NEW QUESTION # 28

Which method should be used to convert a Date to a String in the current user's locale?

- A. Date.format
- B. String.valueOf
- C. Date.paras
- D. String.format

**Answer: A**

Explanation:

The format method of the Date class is used to convert a Date to a String formatted in the current user's locale. This respects the locale settings of the user context under which the code is running, ensuring the date is represented in a way that is familiar to the user.
