Quiz 2026 Microsoft AZ-500 – High Pass-Rate Latest Learning Materials

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our AZ-500 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for Microsoft exams, thus inspiring them obtain the targeted AZ-500 certificate successfully. There are many advantages of our AZ-500 question torrent that we are happy to introduce you and you can pass the exam for sure.

The Need for Microsoft AZ-500 Exam

The Azure Security Technologies AZ-500 certification is a Microsoft certification exam. It is designed to validate your skills as a cloud security engineer and architect. Effortlessly take this exam to test your skills with Microsoft Word, Excel, PowerPoint, Outlook, and more. Attempting this exam will help you validate your understanding of security with the Azure cloud. Completing this exam is a great way to move your career forward. Applicants who demonstrate their mastery at AZ-500 exam gain a competitive advantage as IT professionals. **Microsoft AZ-500 exam dumps** contain the questions and answers that are tested for this exam. Going back to the AZ-500 exam periodically can help you refresh your memory and prepare for future exams. Smarter and more efficient workers can gain greater earning power and move up the corporate ladder. Harder and smarter workers can move their

career forward and rise to greater success.

Issues that are associated with cloud computing continue to be widely discussed. Hold the door open for new opportunities. Firewall limitations set the barrier for true cloud computing. Scenario that is practical for the cloud would be to run a single instance of an application that is logically split into many servers. Solutions for traditional security problems are being reconsidered. Rewarding workers for security leadership skills will promote a culture for security in the workplace. Courses for this exam are available online, so you can study on your own time. Life is too short to spend studying Azure Security Technologies AZ-500 objectives. Practicing for this exam makes the material easier to understand. Revise your knowledge with the AZ-500 exam dumps.

Microsoft Azure Security Technologies Sample Questions (Q352-Q357):

NEW QUESTION # 352

You have an Azure Storage account that contains a blob container named container1 and a client application named App1. You need to enable App1 access to container1 by using Azure Active Directory (Azure AD) authentication.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

From Azure AD:

- Register App1.
- Create an access package.
- Implement an application proxy.
- Modify the authentication methods.

From the storage account:

- Add a private endpoint.
- Regenerate the access key.
- Configure Access control (IAM).
- Generate a shared access signature (SAS).

Answer:

Explanation:

From Azure AD:

- Register App1.
- Create an access package.
- Implement an application proxy.
- Modify the authentication methods.

From the storage account:

- Add a private endpoint.
- Regenerate the access key.
- Configure Access control (IAM).
- Generate a shared access signature (SAS).

Explanation:

From Azure AD:

- Register App1.
- Create an access package.
- Implement an application proxy.
- Modify the authentication methods.

From the storage account:

- Add a private endpoint.
- Regenerate the access key.
- Configure Access control (IAM).
- Generate a shared access signature (SAS).

NEW QUESTION # 353

You have a Microsoft Entra tenant that contains three users named User1, User2, and User3.

You configure Microsoft Entra Password Protection as shown in the following exhibit.

Save Discard

Custom smart lockout

Lockout threshold ⓘ 10

Lockout duration in seconds ⓘ 60

Custom banned passwords

Enforce custom list ⓘ Yes No

Custom banned password list ⓘ

COnToS0	✓
PrOdUct	
Fabrikam	

Password protection for Windows Server Active Directory

Enable password protection on Windows Server Active Directory ⓘ Yes No

Mode ⓘ Enforced Audit

The users perform the following tasks:

- * User1 attempts to reset her password to COnToS0
- * User2 attempts to reset her password to F@brikamHQ
- * User3 attempts to reset her password to PrOduct123.

Which password reset attempts fail?

- A. User1 only
- B. User2 only
- C. User3 only
- D. User1, User2, and User3
- E. User1 and User3 only

Answer: D

NEW QUESTION # 354

You are implementing conditional access policies.

You must evaluate the existing Azure Active Directory (Azure AD) risk events and risk levels to configure and implement the policies.

You need to identify the risk level of the following risk events:

- * Users with leaked credentials

* Impossible travel to atypical locations

* Sign ins from IP addresses with suspicious activity

Which level should you identify for each risk event? To answer, drag the appropriate levels to the correct risk events. Each level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Levels	Answer Area
High	Impossible travel to atypical locations: <input type="text"/>
Low	Users with leaked credentials: <input type="text"/>
Medium	Sign ins from IP addresses with suspicious activity: <input type="text"/>

Answer:

Explanation:

NEW QUESTION # 355

You have a Microsoft Entra tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group2

You configure a Conditional Access policy that has the following settings:

* Name: CAPolicy1

* Assignments

o Users or workload identities: Group1

o Target resources: All cloud apps

* Access controls

o Grant access: Require multifactor authentication

From Microsoft Authenticator settings for the tenant, the Enable and Target settings are configured as shown in the Enable and Target exhibit. (Click the Enable and Target tab.)

Microsoft

Enable and Target **Configure**

Enable ☒

Include Exclude

Target ☐ All users ☒ Select groups

Add groups

Name	Type	Registration	Authentication mode
Group1	Group	Optional	Passwordless

From Microsoft Authenticator settings for the tenant, the Configure settings are configured as shown in the Configure exhibit. (Click the Configure tab.)

Microsoft

Enable and Target **Configure**

Note: Users must be included as part of the Microsoft Authenticator targeted groups under the 'Enable and Target' tab.

GENERAL

Allow use of Microsoft Authenticator OTP ☐ Yes ☒ No

Require number matching for push notifications

Note: If the feature status is set to Microsoft-managed, it will be enabled by Microsoft at an appropriate time after the preview. [Learn more](#)

Status

Target Include Exclude

☐ All users ☒ Select group

Add selected group

Include target

Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 is required to use number matching during sign-in.	<input type="radio"/>	<input type="radio"/>
User2 is required to use number matching during sign-in.	<input type="radio"/>	<input type="radio"/>
User3 is required to use number matching during sign-in.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements

User1 is required to use number matching during sign-in.

Yes

No

User2 is required to use number matching during sign-in.

User3 is required to use number matching during sign-in.

☐☒☐☒☒☐

NEW QUESTION # 356

Lab Task

use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Azure Username: User1-28681041@ExamUsers.com

Azure Password: GpOAe4@lDg

If the Azure portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 28681041

Task 8

You need to prevent HTTP connections to the rg1lod28681041n1 Azure Storage account.

Answer:

Explanation:

To prevent HTTP connections to the rg1lod28681041n1 Azure Storage account, you can follow these steps:

In the Azure portal, search for and select the storage account named rg1lod28681041n1.

In the left pane, select Firewalls and virtual networks.

In the Firewalls and virtual networks pane, select Selected networks.

In the Selected networks pane, select Add existing virtual network.

In the Add existing virtual network pane, select the virtual network that does not allow HTTP connections.

Select Add.
