(Page 2) Flexible Contract-Based Billing
Traditional contract and billing systems enforce a rigid relationship between a project and a funding agreement, which can constrain project setup and execution. Oracle Fusion Project Portfolio Management provides a highly flexible approach to project contract-based billing via a non-exclusive relationship between multiple projects and tasks with contracts and contract lines. This means that you will have full control over defining contracts, rates and limits, and when and how to recognize revenue and generate invoices while segregating the planning and execution of your projects.

NEW QUESTION # 12
You have been asked to set up one active person, who is not a team member in the project, as a quality manager for each quality task created under projects. However, when you try to assign the quality manager as Task Manager, you cannot find the person's name in the list of values. What is the reason for this problem?
(Choose the best answer.)

- A. The quality manager is not assigned with a supervisor.
- B. The "Require Task Managers to be Project Team Members" profile option is set to No.
- C. The quality manager belongs to a department that is not associated with the project.
- D. The "Require Task Managers to be Project Team Members" profile option is set to Yes.

NEW QUESTION # 13

Which two are the workflows in Project Financial Management? (Choose two.)

- A. Project Status Change
- B. Burden Cost Recalculation
- C. Asset Line Generation
- D. Capital Interest Calculation
- E. Expenditure Item Adjustment

Answer: A,E

Explanation:

The workflows in Project Financial Management are business processes that automate the approval and notification tasks for various project transactions and events. Two of the workflows in Project Financial Management are:

* Project Status Change: This workflow manages the approval and notification tasks for changing the status of a project or task from one value to another. For example, when a project or task is submitted for approval, this workflow routes the request to the appropriate approvers and notifies them of the action required.

* Expenditure Item Adjustment: This workflow manages the approval and notification tasks for adjusting expenditure items that have been charged to a project or task. For example, when an expenditure item is adjusted by a project manager or a cost accountant, this workflow routes the adjustment to the appropriate approvers and notifies them of the action required. Capital Interest Calculation, Burden Cost Recalculation, and Asset Line Generation are not workflows in Project Financial Management, but processes that perform various calculations and transactions for project costs and assets. NEW QUESTION # 14

Stigma consulting has been hired by a client to implement Project Management Cloud. Which role should they assign to a user for using the rapid implementation feature to set up the Project Financial Management offering by populating and uploading a Microsoft Excel workbook?

- A. Project Executive
- B. Project Integration Specialist
- C. Project Administrator
- D. Project Application Administrator

Answer: B

Explanation:

The Project Integration Specialist role should be assigned to a user for using the rapid implementation feature to set up the Project Financial Management offering by populating and uploading a Microsoft Excel workbook. This role allows the user to access the Functional Setup Manager and perform the common setups for project costing and billing using predefined templates and spreadsheets. The user can also monitor and validate the setup data using reports and dashboards.
