SAP Certified Associate - Security Administrator Sample Questions (Q32-Q37):

NEW QUESTION # 32
Which solution analyzes an SAP system's administrative areas to safeguard against potential threats?

- A. SAP Enterprise Threat Detection
- B. SAP EarlyWatch Alert
- C. SAP Security Optimization Services
- D. SAP Code Vulnerability Analyzer

Answer: C

Explanation:
* Context:SAP Security Optimization Services help assess administrative and security configurations, providing tailored recommendations to safeguard SAP systems against threats.
* Solution Description:
* SAP Security Optimization Servicesanalyze configurations, authorizations, and operational practices in SAP systems, identifying vulnerabilities and providing actionable recommendations for system hardening.
* Elimination of Other Options:
* A. SAP EarlyWatch Alert: Focuses on system performance, not specifically on administrative security.
* B. SAP Enterprise Threat Detection: Monitors runtime threats but does not assess administrative setups.
* C. SAP Code Vulnerability Analyzer: Analyzes code, not administrative areas.
SAP Security References:
* SAP Help Portal (Security Optimization Service Guidelines)
* SAP Support Notes related to system security audits

NEW QUESTION # 33
What are some disadvantages of a Composite Role? Note: There are 2correct answers to thisquestion.

- A. Menus from the included roles cannot be mixed.
- B. Changes to the authorizations can only be made using the included roles.
- C. Changes to the included roles are not immediately visible in the composite role menu, requiring a renewed import.
- D. Transactions that are deleted from the Composite Role menu are also removed from the included roles.

Answer: A,C

Explanation:
* Context:Composite roles simplify role assignment by grouping multiple single roles, but they come with limitations.
* Solution Descriptions:

* C:Changes to single roles do not automatically update the composite role menu, requiring manual intervention.
* D:Menus from included roles are displayed as-is and cannot be combined or customized.
SAP Security References:
* SAP Composite Role Management Guide
* SAP Help Portal on Role Maintenance

NEW QUESTION # 34
Which SU01 user types are NOT enabled for interaction? Note: There are 2 correct answers to this question.

- A. Dialog
- B. Service
- C. System
- D. Communications Data

Answer: B,C

Explanation:
In SAP, certain SU01 user types are not enabled for interactive use:
* Service Users (A):
* Designed for background jobs or tasks requiring anonymous or shared access.
* Cannot log in interactively.
* System Users (B):
* Used for communication between systems and background processes.
* Does not support interactive login.
Why Others Are Incorrect:
* Dialog Users (C):Designed specifically for interactive logins.
* Communications Data (D):Often refers to communication-specific settings, not user types.
SAP Security References:
* SAP Help Portal: User Type Overview
* SAP Documentation: SU01 User Type Functionalities

NEW QUESTION # 35
Which of the following allow you to control the assignment of table authorization groups? Note: There are 2 correct answers to this question.

- A. SSM_CUST
- B. V_DDAT_54
- C. V_BRG_54
- D. PRGN_CUST

Answer: B,C

Explanation:
In SAP systems, table authorization groups are controlled using views V_DDAT_54 and V_BRG_54.
V_DDAT_54 is a maintenance view that allows administrators to assign tables to authorization groups, defining which groups protect specific tables and ensuring that access is restricted to authorized users.
V_BRG_54 is another view used to manage table authorization groups, particularly for assigning and maintaining group definitions that link to authorization objects like S_TABU_DIS. These views enable granular control over table access, supporting data security and compliance. PRGN_CUST is a customizing table for role and authorization settings, not specifically for table authorization groups, and SSM_CUST is related to system settings, not table access control. By using V_DDAT_54 and V_BRG_54, SAP provides a structured approach to managing table authorizations, ensuring that sensitive data in tables is protected against unauthorized access while allowing efficient administration of access controls.

NEW QUESTION # 36
Which solution is NOT used to identify security recommendations for the SAP Security Baseline?

- A. SAP Security Notes

- B. SAP EarlyWatch Alert
- C. SAP Security Optimization Service
- D. SAP Code Vulnerability Analyzer

Answer: D
