With the Microsoft MB-500 exam practice test questions, you can easily speed up your MB-500 exam preparation and be ready to solve all the final Microsoft MB-500 exam questions. As far as the top features of Microsoft MB-500 Exam Practice test questions are concerned, these MB-500 exam questions are real and verified by experience exam trainers.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q285-Q290):

NEW QUESTION # 285

A company uses Dynamics 365 Unified Operations.

You need to implement role-based security for a set of fields in a table.

How should you arrange the security elements? To answer, drag the appropriate security elements to the correct locations. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ The following illustration shows the elements of role-based security and their relationships.

□ Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/sysadmin/role-based-security>

NEW QUESTION # 286

You are a Dynamics 365 Finance developer. You create a key performance indicator (KPI) that will enable users to be able to see the total sales per region. You create a tile named SalesRegion and link the KPI to the tile.

You need to ensure that users can view this tile on a form in the user interface.

What should you do?

- **A. Create a new workspace. Add the KPI to the workspace from the user interface.**
- B. Open the form that will contain the new tile. Add the tile to the form.
- C. Create an extension of the form that will contain the new tile and KPI. Add the tile to the extended form.

Answer: A

NEW QUESTION # 287

A company is implementing Dynamics 365 Finance.

You are extending the standard fixed asset functionality to develop a new feature.

You need to select the appropriate components for the solution.

Which components should you use? To answer, drag the appropriate components to the correct requirements.

Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 288

You need to meet the requirements for the purchase order creation form.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. In Application Explorer, create a table extension and implement validation.
- **B. Implement Chain of Command (CoC) and method wrapping by creating a form extension class.**
- C. Create a class and add a form data source event handler method to the class.
- **D. In Application Explorer, create a form extension and implement validation.**

Answer: B,D

Explanation:

Scenario:

Users must be presented with a warning message before a direct delivery purchase order is created for a vendor in exclusion list. You must implement validation to check whether a proposed direct delivery purchase order vendor is on the exclusion list for the customer and product combination.

NEW QUESTION # 289

You need to modify the environment to meet User1's requirements.

What should you do?

- A. Create a new table named CashDiscExtension in the project.
- **B. Create an extension of CashDisc in a new project and add the field to the extended table.**
- C. Create an overlayer of CashDisc in a new project and add the field.
- D. Use Open Designer to add the field to the table.

Answer: B

Explanation:

Scenario: A sales manager suspects a data-related issue in the vendor exclusion list. User1 must identify the user who created the referenced exclusion records.

Topic 3, Munson's Pickles and Preserves Farm

Background

Munson's Pickles and Preserves Farm produces and sells jarred food goods. The organization has several production and warehouse locations across the United States. Each location runs both production and warehousing operations. The company has three locations: East Central, and West.

The company is upgrading its Dynamics AX 2009 system to Dynamics 565 Finance.

Current environment

Munson s Pickles and Preserves Farm plans to migrate customizations, data, and integration from its legacy system into Dynamics 365 finance and operations apps. The Dynamics 365 finance and operations environment includes:

* multiple cloud-hosted development environments using Microsoft Visual Studio 2017

* a Microsoft Azure DevOps project for source control

* two tier 2 environments for user acceptance testing and staging, as wen as production Munson s Pickles and Preserves Farm is currently in the planning and development phase of the upgrade process- The company's internal development team needs additional

development resources to address issues. The company already created a project that is set up to use a custom model named GPExtensions.

Integrations

Munson's Pickles and Preserves Farm has a new integration for its freight processing information. The internal development team created the secure file transfer protocol (SFTP) site for the source information to be stored and the staging table to house the source information once the data is added to Dynamics 365 Finance, information from the source will be transferred once a day from the source system and integrated with the target system. More than 10,000 records will be transferred over the integration. The company created an aggregate entity for the integration to minimize the amount of transmitted data.

Munson's Pickles and Preserves Farm has added a new integration for freight processing where all item weights, dimensions, and other factors will be configured in the external portal while planning the loads. Once the load is planned, it will be integrated into Dynamics 365 Finance and operations apps for the freight invoice processing to occur.

No duplicate invoices or postings are associated with the freight invoice charges. The integration of this information from the source system is intended only for report creation and compilation purposes.

Planned changes

Munson's Pickles and Preserves Farm wants to change inventory forms to fit its current needs. Any modifications or enhancements must follow the existing functionality for forms in Dynamics 365 Finance.

Requirements

Munson's Pickles and Preserves Farm wants to change inventory forms to fit its current needs. Any modifications or enhancements must follow the existing functionality for forms in Dynamics 365 Finance.

Integrations

All data from integrations have the same format as an existing Dynamics 365 Finance apps field. All enhancements or customizations must use existing assets before creating new functionality.

Munson's Pickles and Preserves Farm wants to change its integration strategy to include real-time data from the freight processing source system. The inventory must update as it is sold from the system. That information will be updated in Dynamics 365 Finance. The freight processing integration requires the use of an SFTP site to store XML files from the source system. The additional integration will use OData and must be transferred in real time.

A periodic batch job must

- * Pull data from the SFTP site.

- * Import the data to a staging table used to hold the information from the source system.

- * Map source data to the target table in Dynamics 365 Finance.

The imported Load ID field must be added to the Sales Order header for all processed orders. Additional requirements for integrations, including other integration strategies, may be necessary as the company grows. Existing tables must be changed to include the Load ID. The database will need to be synched before adding the Load ID field.

Changes

Munson's Pickles and Preserves Farm must change the Inventory Status form to include more columns. It plans to create a table to enter the data for the Inventory Status form as a new data source. The company wants to add both the Product Name field and Batch ID field to this new table. The current form includes the item number, location, license plate, product inventory dimensions, and quantity.

The grid on the inventory Status form must include the product name by using the item number and legal entity. The user interface must be created to include the new columns and the data must be available to add to the grid. The form must have only an Action Pane, a Navigation List, a List Style Grid, a Details Header, and a Details Tab in the design and include the Load ID field.

Munson's Pickles and Preserves Farm is currently in the process of adding the other required fields: one for Product Name and one for Batch ID. The new fields must be related to extended data types for the original fields on the existing data source for the Inventory Status form. Munson's Pickles and Preserves Farm plans to add the EcoResProduct Name and Batch ID data to the extended table for WHSTmpStatusChange. The fields on the table extension must be populated with data and visible on the inventory Status form on insert.

Issues

- * The Internal development team has created the SFTP site connections, the staging table, and the batch Jobs for the new integration for freight processing. The development team needs to map the source data to the target table and the data management workspace. The development team notices errors with mapping target fields in the data management workspace. The team needs another developer to configure the table extensions, class extensions, and form extensions that are required for the planned changes.

- * The internal development team has issues adding the required fields to the inventory Status standard form. The team needs another developer to configure the table extensions, class extensions, and form extensions that are required for the planned changes.

NEW QUESTION # 290

.....

You can learn MB-500 quiz torrent skills and theory at your own pace, and you are not necessary to waste your time on some useless books or materials and you will save more time and energy that you can complete other thing. We also provide every
