Using Google Chrome-Enterprise-Administrator Dumps, Improve Your Exam Skills

PDFDumps can provide professional and high quality products. It is the industry leader in providing IT certification information. To select PDFDumps is to choose success. PDFDumps's Google Chrome-Enterprise-Administrator Exam Training materials is your magic weapon to success. With it, you will pass the exam and achieve excellent results, towards your ideal place.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 2	<ul style="list-style-type: none">• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 3	<ul style="list-style-type: none">• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 4	<ul style="list-style-type: none">• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 5	<ul style="list-style-type: none">• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

What policy and value provides the most protection against malicious websites?

- A. Set the site isolation policy to be required for all websites
- **B. Set the Safe Browsing policy to Enhanced mode**
- C. Allow the user ability to bypass Safe Browsing warnings
- D. Enable site isolation for all websites

Answer: B

Explanation:

Setting the ****Safe Browsing policy to Enhanced mode**** provides the most direct and comprehensive protection against malicious websites by leveraging Google's real-time threat intelligence. Allowing users to bypass warnings (option A) defeats the purpose of Safe Browsing. While site isolation (options C and D) protects against cross-site data leakage, it doesn't directly prevent users from accessing malicious sites in the first place. Enhanced Safe Browsing actively warns and blocks access to dangerous websites.

NEW QUESTION # 13

Where can information about all of the profiles associated with a browser be found*?

- A. Chrome Insights report
- **B. Managed browsers detail**
- C. Chrome log events
- D. Managed devices

Answer: B

Explanation:

The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The "Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

NEW QUESTION # 14

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----

```
ExtensionInstallAllowlist | [ "lpbdmphenhdhacbfcbdmnoffaepiici",  
"gihagpmigkmndpbjkmolikibogeofcm", "enebfjnlbicamdncnfhaapucdmkj",  
"hhpkimhnadcdidjaejaegpeeklochd", "bnplllbeanipnjdcnkiahniegbcobanno"]  
ExtensionInstallBlocklist | [ ]  
ExtensionInstallForceList | [ "gihagpmigkmndpbjkmolikibogeofcm;[https://clients2.google.com/service  
/update2/crx](https://clients2.google.com/service/update2/crx)", "ufninibicajhgibfhjcgimlmdhccodf;  
[https://clients2.google.com/service/update2/crx](https://clients2.google.com/service/update2/crx)",  
"hhpkimhnadcdidjaejaegpeeklochd;[https://clients2.google.com/service/update2/crx](https://clients2.google.  
com/service/update2/crx)"]
```

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID `ufninibicajhgibfhjcgimlmdhccodf`. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. A red banner that says "Your administrator has blocked this item (ID ufninibicajhgibfhjcgimlmdhccodf)" will appear, and the "Add to Chrome" button will be grayed out.
- B. The "Add to Chrome" button will be available to click, and the user can install the extension.
- **C. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.**
- D. The "Remove from Chrome" button will be available because the extension is already installed.

Answer: C

Explanation:

The extension ID `ufninibicajhgibfhjcgimlmdhccodf` is present in the `ExtensionInstallForceList`.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the "Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

NEW QUESTION # 15

A company is managing browsers in the Google Admin console Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy This violates company policy How would an administrator block these extensions?

- A. Send an email to the users notifying them that they must uninstall the detected extensions
- B. Remotely connect to each device and delete the extension from the browser
- **C. Set permission policy in the Google Admin console to block such extensions**
- D. Set policy in the Google Admin console to block all extensions from being installed on the browser

Answer: C

Explanation:

The Google Admin console allows administrators to control extension permissions. By configuring the "Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

NEW QUESTION # 16

A Chrome administrator is using both Cloud policies and Local policies to apply settings to Chrome browsers. The administrator wants to ensure that on Windows computers, the Cloud policies will have precedence if Cloud and Local policies conflict. What Registry value can be created under HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome to achieve this?

- A. "Value: CloudPolicyOverridesPlatformPolicy Type REG_DWORD Data 1"
- B. "Value: LocalPolicyOverride Type: REG_DWORD Data 0"
- C. "Value PolicySupercedence Type REG_SZ Data Cloud"
- D. "Value: PolicyOverridePreference Type REG_SZ Data Cloud"

Answer: A

Explanation:

To ensure cloud policies override local policies on Windows, the administrator needs to create a specific Registry value. The correct value is "CloudPolicyOverridesPlatformPolicy" of type 'REG_DWORD' with data '1'. This setting explicitly tells the Chrome browser to prioritize cloud-managed policies over local policies.

NEW QUESTION # 17

.....

Compared with other products, one of the advantages of Chrome-Enterprise-Administrator Exam Braindumps is that we offer you free update for 365 days after purchasing. In this condition, you needn't have to spend extra money for the updated version. You just need to spend some money, so you can get the updated version in the following year.
