

# New C\_BCBTP\_2502 Test Pass4sure | Exam C\_BCBTP\_2502 Fees

## Complete Guide to Preparing for the SAP C\_BCBTP\_2502 Exam

SAP C\_BCBTP\_2502 Exam Guide

[www.ERPPrep.com](http://www.ERPPrep.com)

The SAP C\_BCBTP\_2502 Certification Guide is a comprehensive resource designed to help candidates prepare for the SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite exam. This guide provides essential details, including the exam structure, syllabus, key topics, and sample questions to ensure focused preparation. It also highlights SAP BTP's role in enhancing business processes, security, AI-driven insights, and predictive analytics. By utilizing this guide, candidates can develop a strategic approach to achieving a high score and successfully obtaining their SAP certification.

For the quick and complete C\_BCBTP\_2502 exam preparation the BootcampPDF C\_BCBTP\_2502 practice test questions are the ideal selection. With the SAP C\_BCBTP\_2502 PDF Questions and practice test software, you will get everything that you need to learn, prepare and pass the difficult SAP C\_BCBTP\_2502 Exam with good scores.

A person's career prospects are often linked to his abilities, so an international and authoritative certificate is the best proof of one's ability. The C\_BCBTP\_2502 exam certification is a proof of your IT ability. To pass this exam also needs a lot of preparation. The C\_BCBTP\_2502 Exam Materials provided by BootcampPDF are collected and sorted out by experienced team. Now you can have these precious materials. You can safely buy a full set of C\_BCBTP\_2502 exam software in our official website.

## SAP - C\_BCBTP\_2502 - SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Useful New Test Pass4sure

Are you still searching proper C\_BCBTP\_2502 exam study materials, or are you annoying of collecting these study materials? As the professional IT exam dumps provider, BootcampPDF has offered the complete C\_BCBTP\_2502 Exam Materials for you. So you can save your time to have a full preparation of C\_BCBTP\_2502 exam.

## SAP C\_BCBTP\_2502 Exam Syllabus Topics:

---

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Illustrating CIO Transformation Delivered by SAP Business Suite:</b> This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Discovering SAP Business Technology Platform:</b> This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.</li> </ul>

## SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q36-Q41):

### NEW QUESTION # 36

Which SAP BTP component supports microservices-based application development?

- **A. SAP Kyma Runtime**
- B. SAP SuccessFactors
- C. SAP Business Network
- D. SAP Concur

**Answer: A**

Explanation:

As enterprises move toward modern, scalable application architectures, the move from monolithic codebases to microservices becomes essential. SAP Kyma Runtime is the specific component of SAP BTP designed to support this transition. It is a fully managed Kubernetes-based environment that allows developers to extend SAP applications using serverless functions and microservices. Kyma provides a cloud-native way to build and run containerized applications, offering high scalability and flexibility. Positioning Kyma within the SAP Business Suite ecosystem is critical for "side-by-side" extensibility. It allows developers to build specialized services-such as a custom loyalty engine or a unique logistics tracker-using their preferred programming languages and frameworks (like Node.js, Go, or Python) while maintaining a seamless connection to the SAP core. Kyma is particularly powerful for "event-driven" architectures; it can listen for events in SAP S/4HANA (like a "New Sales Order created" event) and instantly trigger a microservice to perform a specific action in a third-party system. This decouples the innovation layer from the stable core, allowing for rapid updates and deployments without risking the stability of the primary business processes.

### NEW QUESTION # 37

Which SAP BTP services support AI-driven automation? (Choose two).

- **A. SAP AI Core**
- **B. SAP Business Process Intelligence**
- C. SAP Business Network
- D. SAP Concur

**Answer: A,B**

Explanation:

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models-from training to deployment- at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It

provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.

#### NEW QUESTION # 38

Which SAP BTP component helps businesses extract insights from structured and unstructured data?

- A. SAP SuccessFactors
- B. SAP Business Network
- C. SAP Integration Suite
- **D. SAP Data Intelligence**

**Answer: D**

Explanation:

In today's data landscape, business value is hidden not just in "structured" databases (like tables and spreadsheets) but also in "unstructured" data (like images, sensor logs, and social media feeds). SAP Data Intelligence is the specific component of SAP BTP designed to manage this diversity. It is a comprehensive data management solution that provides data orchestration, data cataloging, and powerful machine learning integration. It allows data scientists and engineers to create "data pipelines" that ingest, transform, and analyze data regardless of its source or format.

The role of SAP Data Intelligence within the SAP Business Suite is to turn "dark data" into actionable insights. For example, it can take unstructured maintenance logs from factory machinery and combine them with structured financial data to predict the total cost of ownership of an asset. By providing a unified view of the entire data landscape-whether that data resides in an SAP HANA database, a non-SAP data warehouse, or a cloud "data lake"-it ensures that decision-makers have a complete picture. This capability is vital for advanced AI and machine learning projects, as it provides the robust data foundation required to train accurate models, thereby positioning SAP BTP as a leader in enterprise data orchestration.

#### NEW QUESTION # 39

Which SAP BTP service supports real-time financial data analysis for banking and finance industries?

- A. SAP Conversational AI
- B. SAP Business Network
- **C. SAP HANA Cloud**
- D. SAP Fieldglass

**Answer: C**

Explanation:

For the banking and finance industries, the ability to process and analyze data in real-time is not just an advantage-it is a regulatory and operational necessity. SAP HANA Cloud is the foundational BTP service that supports this requirement. Due to its advanced in-memory computing architecture, HANA Cloud allows financial institutions to perform complex risk assessments, liquidity monitoring, and fraud detection on live transactional data.

In the context of the SAP Business Suite for Finance, HANA Cloud eliminates the latency associated with traditional data warehousing. Financial analysts can run "what-if" simulations and "instant closes" directly on the production data set. This real-time capability is essential for managing market volatility and meeting stringent reporting deadlines. Furthermore, HANA Cloud's multi-model processing allows it to handle not just standard relational data, but also spatial and graph data, which are increasingly used in modern financial services for relationship mapping and anti-money laundering (AML) initiatives. By positioning HANA Cloud as the central data engine, SAP BTP provides the high-performance infrastructure needed to power the next generation of digital banking services.

#### NEW QUESTION # 40

Which SAP BTP solution can be used to streamline handling of blocked sales orders?

- **A. SAP Build Process Automation**
- B. SAP Analytics Cloud
- C. SAP Datasphere

- Answer: A**

Blocked sales orders often represent a significant bottleneck in the "Order-to-Cash" process, usually requiring manual intervention from credit managers or sales administrators. SAP Build Process Automation is the ideal BTP solution to streamline this task. It combines the capabilities of workflow management and Robotic Process Automation (RPA) to automate the evaluation and release (or escalation) of these orders based on predefined business rules and real-time data from SAP S/4HANA.

By positioning SAP Build Process Automation as the solution, businesses can implement "exception-based" management. Instead of a human reviewing every blocked order, the BTP service can automatically release orders that meet certain low-risk criteria or route high-value/high-risk blocks to the appropriate manager's mobile device for instant approval. This significantly reduces the "Day Sales Outstanding" (DSO) and improves customer satisfaction by accelerating fulfillment. This approach highlights the value of SAP BTP as an extension layer for the SAP Business Suite; it allows for the optimization of core ERP processes without the need for complex, custom ABAP development, maintaining a "clean core" while achieving high levels of operational efficiency.
