

Analytics-Con-301 Vorbereitungsfragen & Analytics-Con-301 Prüfungsmaterialien

Die Salesforce Analytics-Con-301 Zertifizierungsprüfung ist heutzutage sehr beliebt. ZertSoft wird Ihnen helfen, die Analytics-Con-301 Prüfung zu bestehen, und bietet Ihnen einen einjährigen kostenlosen Update-Service. Dann wählen Sie doch ZertSoft, um Ihren Traum zu verwirklichen. Um Erfolg zu erringen, ist Ihnen weise, ZertSoft zu wählen. Wählen Sie ZertSoft, Sie werden der nächste IT-Elite sein.

Salesforce Analytics-Con-301 Prüfungsplan:

Thema	Einzelheiten
Thema 1	IT Management: This domain measures skills related to managing Tableau environments. It includes planning server upgrades, recommending deployment solutions (on-premise or cloud), and ensuring alignment between technical and business requirements for analytics infrastructure. It also involves troubleshooting and optimizing system performance relevant to Tableau Server and Cloud deployments.
Thema 2	Data Analysis: This domain targets Tableau Consultants to plan and prepare data connections effectively. It includes recommending data transformation strategies, designing row-level security (RLS) data structures, and implementing advanced data connections such as Web Data Connectors and Tableau Bridge. Skills in specifying granularity and aggregation strategies for data sources across Tableau products are emphasized.
Thema 3	Business Analysis: This section of the exam measures skills of Tableau Consultants focusing on evaluating the current state of analytics within an organization. It covers mapping business needs to Tableau capabilities, translating analytical requirements to best practices in Tableau, and recommending appropriate deployment options like Tableau Server or Tableau Cloud. It also includes evaluating existing data structures for supporting business needs and identifying performance risks and opportunities.

Salesforce Analytics-Con-301 Prüfungsmaterialien - Analytics-Con-301 Fragenkatalog

Sind Sie IT-Fachmann? Wollen Sie Erfolg? Dann kaufen Sie die Schulungsunterlagen zur Salesforce Analytics-Con-301 Zertifizierungsprüfung von ZertSoft. Sie werden von der Praxis geprüft. Sie werden Ihnen helfen, die Salesforce Analytics-Con-301 Zertifizierungsprüfung zu bestehen. Ihre Berufsaussichten werden sich sicher verbessern. Sie werden ein hohes Gehalt beziehen. Sie können eine Karriere in der internationalen Gesellschaft machen. Wenn Sie spitze technischen Fähigkeiten haben, sollen Sie sich keine Sorgen machen. Die Schulungsunterlagen zur Salesforce Analytics-Con-301 Zertifizierungsprüfung von ZertSoft werden Ihren Traum verwirklichen. Wir werden mit Ihnen durch dick und dünn gehen und die Herausforderung mit Ihnen zusammen nehmen.

Salesforce Certified Tableau Consultant Analytics-Con-301 Prüfungsfragen mit Lösungen (Q69-Q74):

69. Frage

A client notices that while creating calculated fields, occasionally the new fields are created as strings, integers, or Booleans. The client asks a consultant if there is a performance difference among these three data types. What should the consultant tell the customer?

- A. Strings are fastest, followed by integers, and then Booleans.
- **B. Integers are fastest, followed by Booleans, and then strings.**
- C. Strings, integers, and Booleans all perform the same.
- D. Booleans are fastest, followed by integers, and then strings.

Antwort: B

Begründung:

In Tableau, the performance of calculated fields can vary based on the data type used. Calculations involving integers and Booleans are generally faster than those involving strings. This is because numerical operations are typically more efficient for a computer to process than string operations, which can be more complex and time-consuming. Therefore, when performance is a consideration, it is advisable to use integers or Booleans over strings whenever possible.

References: The performance hierarchy of data types in Tableau calculations is documented in resources that discuss best practices for optimizing Tableau performance¹.

70. Frage

For a new report, a consultant needs to build a data model with three different tables, including two that contain hierarchies of locations and products. The third table contains detailed warehousing data from all locations across six countries. The consultant uses Tableau Cloud and the size of the third table excludes using an extract.

What is the most performant approach to model the data for a live connection?

- **A. Relating the tables in Tableau Desktop**
- B. Joining the tables in Tableau Prep
- C. Joining the tables in Tableau Desktop
- D. Blending the first two tables with the third

Antwort: A

Begründung:

For a performant live connection in Tableau Cloud, especially when dealing with large datasets that preclude the use of extracts, relating the tables in Tableau Desktop is the recommended approach. This method allows for flexibility in how the data is queried and can improve performance by leveraging Tableau's relationships feature, which optimizes queries for the underlying database.

References: The best practices for live connections in Tableau Cloud suggest using relationships to manage complex data models efficiently¹. Additionally, Tableau's documentation on connecting data sources recommends using relationships for better performance with live connections².

71. Frage

A consultant is tasked with improving the performance of a large workbook that contains multiple dashboards, each of which leverages a separate data source. What is one way to improve performance?

- A. Convert Data Source filters to Quick Filters.
- B. Restrict the users who can access the workbook.
- C. Convert any extracted data sources to live data sources.
- **D. Split the workbook into multiple workbooks.**

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

Tableau's performance best-practice documentation explains that large workbooks containing many dashboards, multiple data sources, and complex interactions have heavier memory and CPU requirements. When a workbook grows too large, Tableau must:

- * Load every data source
- * Cache metadata for all sheets
- * Maintain connections across all dashboards
- * Render more worksheets simultaneously

This increases workbook load time and slows dashboard performance.

A documented method for improving performance is to split a large workbook into multiple smaller workbooks, each containing only the dashboards relevant to a particular audience or subject area. Smaller workbooks:

- * Reduce the amount of metadata Tableau must load
- * Reduce extract sizes per workbook
- * Improve caching efficiency
- * Improve dashboard loading and rendering time

Options A, B, and C do not improve workbook performance:

- * A. Converting Data Source Filters to Quick Filters reduces performance because Quick Filters (interactive filters) are more expensive than Data Source filters and slow down rendering.
- * B. Converting extracts to live connections typically worsens performance because live sources depend on database query speed, network latency, and server load.
- * C. Restricting users does not change workbook performance, only access.

Splitting the workbook is a recognized Tableau strategy for improving performance of large, multi-dashboard workbooks.

- * Tableau Performance Optimization guidelines encouraging splitting large workbooks into smaller ones.
- * Workbook design best practices emphasizing reduced complexity and smaller metadata footprints.
- * Documentation on performance costs associated with Quick Filters and multiple data sources.

72. Frage

A client is using Tableau to visualize data by leveraging security token-based credentials. Suddenly, sales representatives in the field are reporting that they cannot access the necessary workbooks. The client cannot recreate the error from their offices, but they have seen screenshots from the field agents. The client wants to restore functionality for the field agents with minimal disruption. Which step should the consultant recommend to accomplish the client's goal?

- **A. Renew the security token via the Data Connection on Tableau Server.**
- B. Ask the workbook owners to republish the workbooks to refresh the security token.
- C. Change the data source permissions for the connection to "Prompt User."
- D. Ensure that "Allow Refresh Access" was checked when the data source was published.

Antwort: A

Begründung:

When field agents are unable to access workbooks due to issues with security token-based credentials, the most immediate and least disruptive solution is to renew the security token. This can be done through the Data Connection settings on Tableau Server. Renewing the token will restore access for the field agents without requiring them to take any action or affecting other users.

References: The use of personal access tokens (PATs) in Tableau and the procedure for renewing them are documented in Tableau's official resources. It is noted that PATs are long-lived authentication tokens that can be revoked and renewed to manage access securely¹. Additionally, there have been discussions in the Tableau Community regarding issues with concurrent PAT access, which further supports the need to manage tokens effectively².

73. Frage

A company has a sales team that is segmented by territory. The team's manager wants to make sure each sales representative can see only data relevant to that representative's territory in the team Sales Dashboard.

The team is large and has high turnover, and the manager wants the mechanism for restricting data access to be as automated as

possible. However, the team does not have a Tableau Data Management license.
What should the consultant recommend to meet the company's requirements?

- A. Create one group for each territory and assign sales representatives to the appropriate groups. Map each group to a territory in the Sales Dashboard. Publish this dashboard to the Sales Dashboard project and ensure all users have permissions to view the dashboard.
- B. Create a user filter in the Sales Dashboard workbook and map each sales representative to the territories they are responsible for. Publish this dashboard to the Sales Dashboard project and ensure all users have permissions to view the dashboard.
- **C. Create a data source by joining the sales data table to an entitlements data table. Add a data source filter to restrict access and publish the data source. Connect the Sales Dashboard to this published data source.**
- D. Create separate workbooks for each territory. Publish each dashboard to the same Sales Dashboard project, and set permissions so each sales representative can see only the dashboards for their territories.

Antwort: C

Begründung:

To ensure that each sales representative sees only data relevant to their territory, the best approach in the absence of a Tableau Data Management license involves using a joined data source with entitlements:

Data Source Configuration: Create a data source that joins the sales data table with an entitlements table. The entitlements table contains mappings of sales representatives to their respective territories.

Data Source Filter: Implement a data source filter that restricts data based on the current user's access rights. This filter references the joined entitlements to dynamically control data visibility based on the logged-in user.

Publishing the Data Source: Publish this filtered data source to Tableau Server. All workbooks or dashboards connecting to this data source inherently respect the row-level security established by the data source filter.

References

This approach aligns with Tableau's capabilities for implementing row-level security directly within the data source, as detailed in the Tableau security management and data modeling best practices.

74. Frage

.....

Wir ZertSoft Team versteht völlig, dass das Vertrauen zwischen die Verkäufer und die Kunden nicht leicht zu erstellen ist. Wir präsentieren Sie die Fachlichkeit und hohe Effizienz mit Salesforce Analytics-Con-301 Prüfungssoftware, die von unserer Herzlichkeit erfüllt ist. Wir helfen Ihnen mit umfassenden Prüfungsaufgaben und ausführlichen Analysen, die Salesforce Analytics-Con-301 Prüfung zu bestehen. Wir bieten Sie die freundlichsten Kundendienst, um Ihre Vertrauen zu erwerben. Und das Zertifikat der Salesforce Analytics-Con-301, das Sie erwerben, ist die beste Anerkennung für uns.
