值得信賴的AICP套裝和資格考試領導者和準確的AICP考試證照

你想过怎样才能更轻松地通过APA的AICP认证考试吗？你发现诀窍了吗？如果你不知道怎么办的话，我来告诉你。其實通過考試的方法有很多種。努力學習考試要求的所有的相關知識就是其中的一種方法。你現在正在這樣做嗎？但是這是最浪費時間並且很可能得不到預期的效果的方法。而且，每天都忙於工作的你恐怕沒有那麼多時間來準備考試吧？那麼試一下KaoGuTi的AICP考古題吧。這個資料絕對可以讓你得到你想不到的成果。

最新的 American Planning Association AICP 免費考試真題 (Q63-Q68):

問題 #63

Successful negotiation in complex situations is facilitated by:

- A. Joint fact-finding for each party's issues.
- B. Independent analyses to support each party's concerns.
- C. Setting a specific time limit on the negotiation process.
- D. Hiring experts to document each party's positions.

答案： A

解題說明：

Successful negotiation in complex situations, such as planning disputes, relies on building trust and a shared understanding of facts. Option B (joint fact-finding for each party's issues) facilitates this by having parties collaboratively gather and agree on data, reducing conflicts over facts and fostering consensus. The APA's AICP Certification Exam Content Outline(2022), under "Communication and Interaction," states, "Joint fact-finding is a key technique in complex negotiations, as it ensures all parties agree on the facts, enabling more productive discussions." Option A (independent analyses) may reinforce divisions. Option C (hiring experts) focuses on positions, not collaboration. Option D (time limit) can pressure parties but doesn't address the root of disputes. TheCPC Study Manual(2024) confirms, "Joint fact-finding in negotiations helps parties establish a shared understanding, facilitating resolution in complex situations," supporting option B.

問題 #64

Which of the following is the correct example of census geographic hierarchy?

- A. Block, block group, tract, county
- B. Block, block group, county, tract
- C. Tract, county, state, Consolidated Statistical Area (CSA)
- D. Tract, block group, enumeration district, Consolidated Statistical Area (CSA)

答案： A

解題說明：

The U.S. Census Bureau uses a geographic hierarchy where smaller units nest within larger ones. The correct hierarchy is: block (smallest unit), block group, tract, county, state, and larger regions like Consolidated Statistical Areas (CSAs). Option B (block, block group, tract, county) accurately reflects this nesting order.

Option A includes "enumeration district," which is not a standard census geography. Option C reverses the order (county before tract). Option D skips block and block group, jumping from tract to county. The APA's AICP Certification Exam Content Outline (2022), under "Research and Assessment Methods," defines the census hierarchy as "block, block group, tract, county, state, and larger regions." The CPC Study Manual (2024) confirms, "The census geographic hierarchy progresses from block to block group to tract to county," supporting option B.
