## 2026 First-grade Microsoft MD-102: Endpoint Administrator Authorized Pdf

With the high class operation system, we can assure you that you can start to prepare for the MD-102 exam with our study materials only 5 to 10 minutes after payment since our advanced operation system will send the MD-102 exam torrent to your email address automatically as soon as possible after payment. Most important of all, as long as we have compiled a new version of the MD-102 Guide Torrent, we will send the latest version of our MD-102 training materials to our customers for free during the whole year after purchasing. We will continue to bring you integrated MD-102 guide torrent to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times.

## Microsoft Endpoint Administrator Sample Questions (Q134-Q139):

### NEW QUESTION # 134

You have a Microsoft 365 E5 subscription that contains 150 hybrid Azure AD joined Windows devices. All the devices are enrolled in Microsoft Intune. You need to configure Delivery Optimization on the devices to meet the following requirements:

- \* Allow downloads from the internet and from other computers on the local network.
- \* Limit the percentage of used bandwidth to 50.

What should you use?

- **A. a configuration profile**
- B. a Microsoft Peer-to-Peer Networking Services Group Policy setting
- C. an Update ring for Windows 10 and later profile
- D. a Windows Update for Business Group Policy setting

**Answer: A**

Explanation:

A configuration profile is the correct answer because it allows you to configure Delivery Optimization settings for Windows devices in Intune. You can specify the download mode, bandwidth limit, caching options, and more. A configuration profile is a template that contains one or more settings that you can apply to groups of devices. Reference:

Windows 10 Delivery Optimization settings for Intune - Microsoft Intune | Microsoft Learn Delivery Optimization settings in Microsoft Intune

#### NEW QUESTION # 135

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

UserA joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

#### NEW QUESTION # 136

You have the on-premises servers shown in the following table.

You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune.

You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports.

To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 137

Your network contains an Active Directory domain.

You install the Microsoft Deployment Toolkit (MDT) on a server.

You have a custom image of Windows 11.

You need to deploy the image to 100 devices by using MDT.

Which three actions should you perform in sequence? To answer, move answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

To deploy the Windows 11 image to 100 devices by using MDT, you should perform the following three actions in sequence:

Install Windows Deployment Services (WDS) on the server. WDS is a role that enables you to deploy Windows operating systems over the network by using PXE boot and multicast technologies. You need to install WDS before you can enable multicast and configure the boot images for MDT. You can install WDS by using the Server Manager or PowerShell1.

Create a deployment share on the server. A deployment share is a folder that contains the MDT files, scripts, applications, drivers, operating systems, and task sequences that you use to deploy Windows. You need to create a deployment share by using the MDT Deployment Workbench2.

Add the Windows 11 image and create a task sequence in the deployment share. An image is a file that contains a snapshot of a

Windows installation. A task sequence is a set of steps that MDT executes to install Windows and configure the settings. You need to add the Windows 11 image by importing it from a source folder or a WIM file, and create a task sequence by using a template or customizing your own3.

These are the basic steps to prepare for deploying Windows 11 with MDT. For more details and guidance, you can refer to the web search results I found for you by using `search_web("deploy Windows 11 image with MDT")`.

### NEW QUESTION # 138

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
