Salesforce Certified Field Service Consultant Sample Questions (Q40-Q45):

NEW QUESTION # 40

which two features on the dispatcher console should the consultant use to visualize rules violating service appointments?
Choose 2 answers

- A. Gantt
- B. Gantt Map
- C. Color Palettes
- D. Appointment List

Answer: A,D

NEW QUESTION # 41

Universal Containers (UC) uses Service Contract based Entitlements to determine their Service Level Agreements. UC would like to track adherence to Service Contract SLAS. Where would UC apply an Entitlement record to track the specific Service Contract SLAS?

- A. Service Contract
- B. Work Order Line Items
- C. Work Order
- D. Account

Answer: D

NEW QUESTION # 42

At Northern Trail Outfitters (NTO), agents are expected to complete a variety of tasks. They create cases and work orders, and need Read access to work types and work rules. They also book and manage appointments, assign mobile resources, and optimize their mobile workforce's schedule.

What is the best permission set(s) a consultant should recommend assigning to NTO agents?

- A. Mobile, Agent, and Resource
- B. Agent and Resource
- C. Agent
- D. Dispatcher

Answer: A

NEW QUESTION # 43

Universal Containers has Role-based Technicians and Managers who handle Service Appointments. Many times, Technicians arrive on-site but are unable to gain access to the customer's equipment. In this scenario, only the Manager has permission to cancel the Service Appointment. How should a Consultant recommend adhering to this business process?

- A. Configure Status Transitions based on Resource Type.
- B. Assign Permission Sets that allow Status Transitions.
- C. Allow Status Transitions based on Role.
- D. Limit Status Transitions based on Profile.

Answer: D

NEW QUESTION # 44

Universal Containers just started its Field Service Implementation and is configuring Service Territories and Locations. The Locations need to be associated to Territories.

In which two ways should the Consultant show this relationship?

Choose ? answers

- A. Create the Service Territory Location as a Service Territory lookup field.
- B. Create the Service Territory Location as a Location lookup field.
- C. Add the Service Territory Location Related List on the Location page layout.
- D. Add the Service Territory Location Related List on the Service Territory page layout.

Answer: C,D

Explanation:

Service Territory Location is a junction object that links Service Territory and Location objects[236]. Related Lists are components on page layouts that show records that are related to a record through a lookup or master- detail relationship[237]. Adding the Service Territory Location Related List on the Service Territory page layout and adding the Service Territory Location Related List on the Location page layout would allow Universal Containers to show how Locations are associated to Territories by displaying a list of Service Territory Locations on each record[238]. Creating the Service Territory Location as a Service Territory lookup field or creating the Service Territory Location as a Location lookup field would not work because they are not valid fields on either object.
