## AD0-E137 Ausbildungsressourcen & AD0-E137 Online Praxisprüfung

In Bezug auf die Adobe AD0-E137 Zertifizierungsprüfung ist die Zuverlässigkeit nicht zu ignorieren. Die Schulungsmaterialien zur AD0-E137 Zertifizierungsprüfung von Zertpruefung werden besonders entworfen, um Ihre Effizienz zu erhöhen. Unsere Website hat weltweit die höchste Erfolgsquote.

# Adobe Experience Manager Sites Developer Expert AD0-E137

## Prüfungsfragen mit Lösungen (Q24-Q29):

### 24. Frage

A developer is creating a dialog for a component, which has a checkbox field. After saving the component configuration, the developer noticed that the checkbox value is stored as a String type in JCR. What should be done to store the checkbox value as a Boolean type in JCR?

- A. Implement JCR Event Listener to change field type afterwards
- B. Use Switch instead of Checkbox
- C. Add `TypeHint` field to the dialog

Antwort: C

### 25. Frage

A developer has created a new Sling Model called Flarp. The developer wants to create a unit test for this Sling Model. What needs to be changed for the unit test to successfully test the `getName` method of the Flarp Sling Model?

- A. Add an `@Rule` annotation before the line `private final AemContext ctx = new AemContext();`
- B. Add a `ctx.load().json()` method call to get the node data.
- C. Replace `AemContext` with `SlingContext` with `ResourceResolverType` of `JCR_OAK`.

Antwort: C

### 26. Frage

A developer is using the Oak query engine. Which query language is recommended?

- A. SQL
- B. JCR-SQL
- C. XPath

Antwort: C

### 27. Frage

A developer is tasked with designing a solution to accommodate multiple client projects within a single Adobe Experience Manager (AEM) instance, each requiring its own set of unique resources, code, and content. Given the need for true multi-tenancy, where each tenant operates independently with zero knowledge of other tenants and no shared code, content, or common authors, which approach should the developer recommend?

- A. Implement separate author and publish instances for each tenant, ensuring complete isolation of resources, code, and content, thereby achieving true multi-tenancy.
- B. Encourage the use of component groups and `allowedPaths` properties to logically separate tenant-specific components and templates within the same AEM instance.
- C. Utilize AEM's out-of-the-box multi-tenancy capabilities to segregate tenants within the same author and publish instances, relying on access control lists (ACLs) and content path organization to ensure separation.

Antwort: A

### 28. Frage

Which tool is commonly used to manage front-end dependencies and automate tasks like bundling, minification, and transpilation in an AEM project?

- A. Apache Sling
- B. Webpack
