Seeing PAP-001 Study Guides - Say Goodbye to Certified Professional - PingAccess

Our PAP-001 exam questions are perfect, unique and the simplest for all exam candidates for varying academic backgrounds. This is the reason that our PAP-001 study guide assures you of a guaranteed success in the exam. The second you download our PAP-001 learning braindumps, then you will find that they are easy to be understood and enjoyable to practice with them. And there are three versions of the PAP-001 preparation engine for you to choose: the PDF, Software and APP online.

Ping Identity PAP-001 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • General Configuration: This section of the exam measures skills of Security Administrators and introduces the different object types within PingAccess such as applications, virtual hosts, and web sessions. It explains managing application resource properties, creating web sessions, configuring identity mappings, and navigating the administrative console effectively.
Topic 2	<ul style="list-style-type: none"> • Policies and Rules: This section of the exam measures the skills of Security Administrators and focuses on how PingAccess evaluates paths for applying policies and resources. It covers the role of different rule types, their configuration, and the implementation of rule sets and rule set groups for consistent policy enforcement.
Topic 3	<ul style="list-style-type: none"> • Installation and Initial Configuration: This section of the exam measures skills of System Engineers and reviews installation prerequisites, methods of installing or removing PingAccess, and securing configuration database passwords. It explains the role of run.properties entries and outlines how to set up a basic on-premise PingAccess cluster.

Ping Identity Certified Professional - PingAccess Sample Questions (Q65-Q70):

NEW QUESTION # 65

Refer to the following applications:

- * hr.company.com
- * finance.company.com
- * customer.order.company.com

Which action should be taken to allow these applications to share the same web session?

- A. Use Rewrite Cookie Path rule
- B. Set Audience option
- C. Use Rewrite Cookie Domain rule
- **D. Set Cookie Domain option**

Answer: D

Explanation:

For multiple subdomains to share the same PingAccess session, the Cookie Domain must be configured so that the session cookie is valid across all listed applications.

Exact Extract:

"Set the Cookie Domain in the web session configuration to a parent domain (for example, .company.com) to enable applications in different subdomains to share the same session."

* Option A (Set Audience option) applies to OAuth token validation, not cookie sharing.

* Option B (Set Cookie Domain option) is correct - e.g., setting company.com allows session cookies to be shared.

* Option C (Rewrite Cookie Domain rule) modifies upstream cookies for back-end applications, not PingAccess session cookies.

* Option D (Rewrite Cookie Path rule) is unrelated; it modifies paths for cookies, not domains.

Reference: PingAccess Administration Guide - Web Session Configuration

NEW QUESTION # 66

A PingAccess API deployment requires multiple Access Token Managers to maintain compliance with customer requirements.

Which feature must be set on the Token Provider configuration?

- A. Client Secret
- B. Use Token Introspection Endpoint
- **C. Send Audience**
- D. Subject Attribute Name

Answer: C

Explanation:

When using multiple Access Token Managers, the Send Audience option ensures that tokens are scoped properly and validated

against the intended resource/application.

Exact Extract:

"EnableSend Audiencein the token provider configuration to support environments with multiple Access Token Managers and enforce correct audience restrictions."

- * Option A (Subject Attribute Name)is unrelated - it maps user identity but not token manager selection.
- * Option B (Send Audience)is correct - required when multiple ATMs are in use.
- * Option C (Use Token Introspection Endpoint)is optional and depends on deployment, not mandatory for multiple ATMs.
- * Option D (Client Secret)is part of OAuth client credentials, not specific to multiple ATMs.

Reference:PingAccess Administration Guide -Access Token Management

NEW QUESTION # 67

Which element in thelog4j2.xmlfile must be modified to change the log level in PingAccess?

- A. AsyncLogger
- B. Appenders
- C. Logger
- D. RollingFile

Answer: C

Explanation:

In Log4j2, theLogger element controls the log level (INFO,DEBUG,ERROR, etc.) for specific packages or classes.

Exact Extract:

"To modify logging levels, edit the<Logger>element inlog4j2.xmland change the level attribute."

- * Option A (AsyncLogger)is a performance optimization, not for changing levels.
- * Option B (RollingFile)defines file rotation, not log levels.
- * Option C (Logger)is correct - this is where log levels are defined.
- * Option D (Appenders)define output destinations, not severity levels.

Reference:PingAccess Administration Guide -Log Configuration

NEW QUESTION # 68

Which two protocols does PingAccess use for authentication and authorization? (Choose 2 answers.)

- A. SAML
- B. WS-Trust
- C. WS-Fed
- D. OIDC
- E. OAuth2

Answer: D,E

Explanation:

PingAccess is designed to work with modern identity protocols. It doesnotsupport legacy WS-* protocols directly.

Exact Extract:

"PingAccess integrates with OAuth 2.0 and OpenID Connect (OIDC) to provide authentication and authorization for web and API resources."

- * Option A (SAML)is incorrect - PingAccess does not natively consume SAML assertions; SAML can be used indirectly via PingFederate.
- * Option B (WS-Fed)is not supported.
- * Option C (WS-Trust)is not supported.
- * Option D (OAuth2)is correct - used for authorization and token validation.
- * Option E (OIDC)is correct - used for user authentication and sessions.

Reference:PingAccess Administration Guide -Supported Protocols

NEW QUESTION # 69

An administrator needs to add a set of rules to an application protected by a PingAccess agent. Which rule will be unavailable to add to the application?

- A. Cross-Origin Request
- B. Rewrite Cookie Domain
- C. Rate Limiting
- D. Network Range

Answer: B

Explanation:

PingAccess distinguishes between gateway rules and agent rules. Some processing rules, such as Rewrite Cookie Domain, only apply when PingAccess is acting as a reverse proxy (gateway), not when protecting applications via agents.

Exact Extract:

"Rewrite Cookie Domain rules are not supported for agent applications. They are only available for proxied (gateway) applications."

* Option A (Rewrite Cookie Domain) is correct - unavailable with agent applications.

* Option B (Network Range) is available for both agents and gateways.

* Option C (Rate Limiting) is supported on both application types.

* Option D (Cross-Origin Request) is also supported in both.
