

NSE7_SSE_AD-25 Reliable Test Topics | Latest NSE7_SSE_AD-25 Exam Discount

6. Биття _____

Vocabulary Test: Full Blast 7, Module 7e- I need some advice

Task 1. Match the words with the translation. (3 points)

- Care _____ | a. схуднути
- Dietician _____ | b. місцевий
- Local _____ | c. сусідній
- Lose weight _____ | d. єсідство
- Neighbourhood _____ | e. дітям
- Similar _____ | f. дієтолог

Task 2. Circle the correct word. (3 points)

- My best friend is my age / local, we both turned twelve last month.
- We often go to the studio / community centre to play table tennis after school.
- My brother and I look very similar / studio, so people often think we are twins.
- If you want to lose weight / my age, you should eat more vegetables and exercise.
- He is a famous artist and spends all day working in his local / studio.
- I like buying bread at the local / similar bakery near my house.

Task 3. Complete the sentences with the words from the box. (3 points)
 dietician, local, lose weight, care, neighbourhood, studio

- My _____ is very quiet and has a lot of beautiful trees.
- I want to _____, so I stopped eating sweets and fast food.
- The _____ told me to eat more fruit and drink more water.
- You should take _____ of your health and exercise every day.
- She is a dancer, and she practices every morning in a dance _____.
- We usually watch films at our _____ cinema because it's very close.

Task 4. Translate into English. (3 points)

- Схуднути _____
- Центр спільноти _____
- Єсідство _____

PracticeMaterial is a website you can completely believe in. In order to find more effective training materials, PracticeMaterial Fortinet experts have been committed to the research of Fortinet certification NSE7_SSE_AD-25 exam, in consequence, develop many more exam materials. If you use PracticeMaterial dumps once, you will also want to use it again. PracticeMaterial can not only provide you with the best questions and answers, but also provide you with the most quality services. If you have any questions on our exam dumps, please to ask. Because we PracticeMaterial not only guarantee all candidates can pass the NSE7_SSE_AD-25 Exam easily, also take the high quality, the superior service as an objective.

Fortinet NSE7_SSE_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Secure Private Access (SPA): This domain includes designing SPA use cases, deploying SPA with SD-WAN, and implementing ZTNA with tagging rules and access proxy configurations.
Topic 2	<ul style="list-style-type: none"> SASE architecture and integration: This domain covers integrating FortiSASE into existing networks, identifying core SASE components, and evaluating their roles in advanced deployment scenarios.

Topic 3	<ul style="list-style-type: none"> • Analytics: This section covers troubleshooting connectivity and endpoint issues, analyzing dashboards and logs, and reviewing reports related to user traffic and security events.
Topic 4	<ul style="list-style-type: none"> • SASE deployment and management: This section focuses on deploying and managing FortiSASE for branch and remote users, configuring advanced inspection features, and managing endpoint profiles and compliance rules.

Latest NSE7_SSE_AD-25 Exam Discount & NSE7_SSE_AD-25 Latest Dumps Ebook

The research and production of our NSE7_SSE_AD-25 study materials are undertaken by our first-tier expert team. The clients can have a free download and tryout of our NSE7_SSE_AD-25 study materials before they decide to buy our products. They can use our products immediately after they pay for the NSE7_SSE_AD-25 study materials successfully. If the clients are unlucky to fail in the test we will refund them as quickly as we can. There are so many advantages of our products that we can't summarize them with several simple words. You'd better look at the introduction of our NSE7_SSE_AD-25 Study Materials in detail as follow by yourselves.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q81-Q86):

NEW QUESTION # 81

During FortiSASE provisioning, how many security points of presence (PoPs) need to be configured by the FortiSASE administrator?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

During FortiSASE provisioning, the FortiSASE administrator needs to configure at least one security point of presence (PoP). A single PoP is sufficient to get started with FortiSASE, providing the necessary security services and connectivity for users.

* Security Point of Presence (PoP):

* A PoP is a strategically located data center that provides security services such as secure web gateway, firewall, and VPN termination.

* Configuring at least one PoP ensures that users can connect to FortiSASE and benefit from its security features.

* Scalability:

* While only one PoP is required to start, additional PoPs can be added as needed to enhance redundancy, load balancing, and performance.

FortiOS 7.6 Administration Guide: Provides details on the provisioning process for FortiSASE.

FortiSASE 23.2 Documentation: Explains the configuration and role of security PoPs in the FortiSASE architecture.

NEW QUESTION # 82

A company must provide access to a web server through FortiSASE secure private access for contractors. What is the recommended method to provide access?

- A. Configure a TCP access proxy forwarding rule and push it to the contractor FortiClient endpoint.
- B. Update the DNS records on the endpoint to access private applications.
- C. Publish the web server URL on a bookmark portal and share it with contractors.
- D. Update the PAC file with the web server URL and share it with contractors.

Answer: C

Explanation:

The bookmark portal is the recommended method for providing contractors access to private web applications through FortiSASE Secure Private Access, as it offers a user-friendly, secure, and controlled access mechanism without requiring full network connectivity.

NEW QUESTION # 83

In the Secure Private Access (SPA) use case, which two FortiSASE features facilitate access to corporate applications? (Choose two answers)

- A. cloud access security broker (CASB)
- B. SD-WAN
- C. zero trust network access (ZTNA)
- D. thin edge

Answer: B,C

Explanation:

In a FortiSASE deployment, the Secure Private Access (SPA) use case is specifically designed to provide remote users with secure, high-performance connectivity to internal corporate applications hosted in private data centers or public clouds.⁵ This is achieved through two primary architectural methods:

* SD-WAN Integration (A): FortiSASE integrates natively with existing Fortinet Secure SD-WAN networks.⁶ In this architecture, the FortiSASE global PoPs act as spokes that establish automated IPsec tunnels to the organization's FortiGate SD-WAN hubs.

This allows the platform to use intelligent application steering and dynamic routing to find the shortest, most efficient path to private resources, ensuring a superior user experience.

* Zero Trust Network Access (ZTNA) (B): FortiSASE provides Universal ZTNA to enforce granular, per-session access control.⁷ Unlike traditional VPNs that grant broad network access, ZTNA verifies the user's identity and the endpoint's security posture (via ZTNA tags) before every application session.

This ensures that users only have access to the specific corporate applications they are authorized to use, significantly reducing the attack surface.

* Analysis of Other Options: * Thin Edge (C) is a connectivity method used to secure branch offices and micro-branches (typically using FortiExtender), rather than a specific feature for facilitating private corporate application access for individual remote users.

* CASB (D) is used for Secure SaaS Access (SSA) to provide visibility and control over third-party cloud applications like Office 365, rather than private applications hosted on-premises.

NEW QUESTION # 84

Refer to the exhibit.

An organization must inspect all the endpoint internet traffic on FortiSASE, and exclude Google Maps traffic from the FortiSASE tunnel and redirect it to the endpoint physical interface.

Which configuration must you apply to achieve this requirement? (Choose one answer)

- A. Add the Google Maps URL as a steering bypass destination in the endpoint profile.
- B. Exempt Google Maps in URL filtering in the web filter profile.
- C. Configure a steering bypass tunnel firewall policy using Google Maps FQDN to exclude and redirect the traffic.
- D. Add the Google Maps URL in the zero trust network access (ZTNA) TCP access proxy forwarding rule.

Answer: A

Explanation:

In FortiSASE, the requirement to redirect specific traffic away from the secure tunnel and through the local physical interface is achieved through Steering Bypass (commonly referred to as split tunneling).

* Steering Bypass Destinations: This feature is configured within the Endpoint Profile settings. When an administrator adds a destination (such as the Google Maps URL or FQDN) to the Steering Bypass table, the FortiClient agent updates the local routing table on the endpoint.

* Traffic Redirection: Traffic matching these bypass rules is explicitly excluded from the FortiSASE VPN tunnel and instead sent directly out of the device's local internet gateway (physical interface). This is ideal for optimizing bandwidth and reducing latency for trusted, high-volume applications like mapping services or video conferencing.

* Analysis of Other Options:

* Option A: ZTNA TCP access proxy rules are designed for secure access to private applications, not for managing how internet-bound traffic is routed.

* Option B: While it uses the term "steering bypass," there is no "tunnel firewall policy" configuration for this purpose; the configuration is done at the endpoint profile level.

* Option C: Exempting a URL in the Web Filter profile only instructs FortiSASE to skip security scanning (AV, DLP, etc.) for that traffic. The traffic would still be encapsulated in the tunnel and sent to FortiSASE, which does not meet the requirement to redirect it to the physical interface.

By configuring the Google Maps URL as a steering bypass destination, the organization ensures the traffic never enters the SASE tunnel, fulfilling the requirement for both traffic inspection (for all other traffic) and local redirection (for Google Maps).

NEW QUESTION # 85

When accessing the FortiSASE portal for the first time, an administrator must select data center locations for which three FortiSASE components? (Choose three.)

- A. SD-WAN hub
- B. Endpoint management
- C. Logging
- D. Points of presence
- E. Authentication

Answer: B,C,D

Explanation:

When accessing the FortiSASE portal for the first time, an administrator must select data center locations for the following FortiSASE components:

* Endpoint Management:

* The data center location for endpoint management ensures that endpoint data and policies are managed and stored within the chosen geographical region.

* Points of Presence (PoPs):

* Points of Presence (PoPs) are the locations where FortiSASE services are delivered to users.

Selecting PoP locations ensures optimal performance and connectivity for users based on their geographical distribution.

* Logging:

* The data center location for logging determines where log data is stored and managed. This is crucial for compliance and regulatory requirements, as well as for efficient log analysis and reporting.

References:

FortiOS 7.6 Administration Guide: Details on initial setup and configuration steps for FortiSASE.

FortiSASE 23.2 Documentation: Explains the importance of selecting data center locations for various FortiSASE components.

NEW QUESTION # 86

.....

If you're looking to advance your career, passing the Fortinet NSE7_SSE_AD-25 Certification Exam is crucial. As with any certification exam, success requires time and effort. While there are many online study materials available, not all of them are accurate or reliable. Many professionals struggle with managing their time and studying effectively, making it difficult to pass the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) Exam.
