Quiz Huawei - Accurate Reliable H35-211_V2.5 Exam Preparation

We strongly advise you to buy our windows software of the H35-211_V2.5 study materials, which can simulate the real test environment. There is no doubt that you will never feel bored on learning our H35-211_V2.5 practice materials because of the smooth operation. You will find that learning is becoming interesting and easy. During the operation of the H35-211_V2.5 Study Materials on your computers, the running systems of the H35-211_V2.5 study guide will be flexible, which saves you a lot of troubles and help you concentrate on study.

Huawei HCIP-Access V2.5 Sample Questions (Q48-Q53):

NEW QUESTION # 48

(Multiple choice) Which of the following measures can be adopted by GPON in terms of traffic control

- A. tcontcar
- B. gem mapping
- C. flow-car
- D. Gem-car

Answer: C,D

NEW QUESTION # 49

If only one ONU connected to a PON port cannot be automatically discovered, the possible cause is that the hardware of the ONU is faulty.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

When other ONUs on the same PON port can register but one ONU cannot, troubleshooting focuses on the individual ONU or its drop fiber. Valid possible causes include: ONU not powered, fiber/connector issues, password/SN mismatch, or faulty ONU hardware. Since hardware failure of that specific ONU is one of the recognized possible causes, the statement is true.

NEW QUESTION # 50

(Multi-select) Query ppPOE simulation results on the MDU side as follows
From the query results, it can be judged ()

- A. PPPoE user account and authentication method are correct
- B. The link between MDU tone setting and BRAS is ok
- C. The service configuration of ppPoE users is normal
- D. The MDU management IP is configured correctly

Answer: A,B,C

NEW QUESTION # 51

(Radio) When configuring multicast services on MA5600T/MA5680T, the programs of multicast VLANs are statically configured. Which of the following must be configured, otherwise the multicast programs may not be able to be watched?

- A. igmp priority
- B. igmp program
- C. igmp profile
- D. igmp preview

Answer: B

Explanation:

On Huawei OLTs (e.g., MA5600T/MA5680T), deploying IPTV/multicast commonly uses a program list (channel list) to map program numbers to multicast group addresses-this is configured with igmp program.

When programs are statically configured under the multicast VLAN, the program definitions themselves are mandatory; without them, set-top boxes cannot select (zap to) channels by program number/address mapping and the OLT cannot correctly forward the requested multicast streams.

NEW QUESTION # 52

The protection scope of GPON Type B dual-homing protection covers ().

- A. Active and standby backbone optical fibers
- B. Active and standby branch optical fibers

- C. Active and standby PON ports of the OLT
- D. Active and standby OLTs

Answer: A,C

Explanation:

Type B provides redundancy with two OLT PON ports on the same OLT and two feeder (backbone) fibers to the ODN.

Therefore it protects the PON ports and the backbone/feeder path. It does not protect the OLT itself (still a single OLT) and does not protect the ONU branch fibers.

References: HCIP-Access V2.5 Study Guide - PON Line Protection Scope (Type B: OLT port + feeder fiber; no branch/OLT equipment protection).

NEW QUESTION # 53
