Salesforce PDI (Platform Developer I) Certification Exam is a valuable certification that demonstrates your skills and knowledge in developing custom applications on the Salesforce platform. PDI exam covers a range of topics, and with the right preparation, you can pass the exam and become a certified Salesforce professional. Platform Developer I (PDI) certification is highly respected in the industry and can open up new job opportunities and career growth.

## Salesforce Platform Developer I (PDI) Sample Questions (Q153-Q158):

### NEW QUESTION # 153

What should a developer use to fix a Lightning web component bug in a sandbox?

- A. Developer Console
- B. Force.com IDE
- C. Execute Anonymous

- D. VS Code

**Answer: D**

#### NEW QUESTION # 154

When creating unit tests in Apex, which statement is accurate? Choose 2

- A. Increased test coverage requires large test classes with many lines of code in one method.
- B. Triggers do not require any unit tests in order to deploy them from sandbox to production.
- C. System Assert statements that do not Increase code coverage contribute important feedback in unit tests
- D. Unit tests with multiple methods result in all methods failing every time one method fails.

**Answer: A,C**

#### NEW QUESTION # 155

In the code below, which type does String inherit from? String s = 'Hello World';

- A. Object
- B. Object
- C. Prototype
- D. Class

**Answer: B**

#### NEW QUESTION # 156

Which three statements are accurate about debug logs?

Choose 3 answers

- A. Debug logs can be set for specific users, classes, and triggers.
- B. Debug log levels are cumulative, where FINE log level includes all events logged at the DEBUG, INFO, WARN, and ERROR levels.
- C. System debug logs are retained for 24 hours.
- D. Only the 20 most recent debug logs for a user are kept.
- E. The maximum size of a debug log is 5 MB.

**Answer: A,D,E**

Explanation:

A). Debug logs can be set for specific users, classes, and triggers:

Debug logs can be configured for users, classes, and triggers by setting trace flags.

C). Only the 20 most recent debug logs for a user are kept:

Salesforce retains only the 20 most recent debug logs per user. Older logs are overwritten.

E). The maximum size of a debug log is 5 MB:

Debug logs are capped at 5 MB. If this limit is exceeded, logging stops for that transaction.

Why Not B and D?

B: Debug logs are retained for 7 days, not 24 hours.

D: Debug log levels are not cumulative. Each level is independent.

#### NEW QUESTION # 157

A company decides to implement a new process where every time an Opportunity is created, a follow up Task should be created and assigned to the Opportunity Owner.

What is the most efficient way for a developer to implement this?

- A. Auto-launched flow on Task

- B. Apex trigger on Task
- C. Record-triggered flow on Opportunity
- D. Task actions

**Answer: C**

Explanation:

Record-triggered flows allow automation to create tasks when an Opportunity is created. It is declarative, easy to maintain, and does not require custom code.

Steps:

- \* Create a record-triggered flow for the Opportunity object.
- \* Set it to run on record creation.
- \* Use the "Create Records" element to create a task for the Opportunity owner.

## :Record-Triggered Flows
