

# XDR-Analyst Exam Tips - Technical XDR-Analyst Training

The second format is a web-based format that can be accessed from browsers like Firefox, Microsoft Edge, Chrome, and Safari. It means you don't need to download or install any software or plugins to take the Palo Alto Networks XDR Analyst practice test. The web-based format of the Palo Alto Networks XDR-Analyst Certification Exams practice test supports all operating systems. The third and last format is desktop software format which can be accessed after installing the software on your Palo Alto Networks XDR Analyst (XDR-Analyst) Windows Pc or Laptop. These formats are built especially for the students so they don't stop preparing for the Palo Alto Networks XDR Analyst (XDR-Analyst) certification.

## Palo Alto Networks XDR-Analyst Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Alerting and Detection Processes: This domain covers identifying alert types and sources, prioritizing alerts through scoring and custom configurations, creating incidents, and grouping alerts with data stitching techniques.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Endpoint Security Management:</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Data Analysis: This domain encompasses querying data with XQL language, utilizing query templates and libraries, working with lookup tables, hunting for IOCs, using Cortex XDR dashboards, and understanding data retention and Host Insights.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Incident Handling and Response: This domain focuses on investigating alerts using forensics, causality chains and timelines, analyzing security incidents, executing response actions including automated remediation, and managing exclusions.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>This domain addresses managing endpoint prevention profiles and policies, validating agent operational states, and assessing the impact of agent versions and content updates.</li></ul>

## Quiz High Pass-Rate XDR-Analyst - Palo Alto Networks XDR Analyst Exam Tips

If you are worry about the coming XDR-Analyst exam, our XDR-Analyst study materials will help you solve your problem. In order to promise the high quality of our XDR-Analyst exam questions, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good XDR-Analyst Guide quiz and perfect after sale service are approbated by our local and international customers.

## Palo Alto Networks XDR Analyst Sample Questions (Q61-Q66):

### NEW QUESTION # 61

Where can SHA256 hash values be used in Cortex XDR Malware Protection Profiles?

- A. in the Windows Malware Protection Profile to indicate allowed executables
- B. in the Linux Malware Protection Profile to indicate allowed Java libraries
- C. SHA256 hashes cannot be used in Cortex XDR Malware Protection Profiles
- D. in the macOS Malware Protection Profile to indicate allowed signers

**Answer: A**

Explanation:

Cortex XDR Malware Protection Profiles allow you to configure the malware prevention settings for Windows, Linux, and macOS endpoints. You can use SHA256 hash values in the Windows Malware Protection Profile to indicate allowed executables that you want to exclude from malware scanning. This can help you reduce false positives and improve performance by skipping the scanning of known benign files. You can add up to 1000 SHA256 hash values per profile. You cannot use SHA256 hash values in the Linux or macOS Malware Protection Profiles, but you can use other criteria such as file path, file name, or signer to exclude files from scanning. Reference:

Malware Protection Profiles

Configure a Windows Malware Protection Profile

PCDRA Study Guide

### NEW QUESTION # 62

Which Exploit Prevention Module (EPM) provides better entropy for randomization of memory locations?

- A. DLL Security
- B. Memory Limit Heap spray check
- C. UASLR
- D. JIT Mitigation

**Answer: C**

Explanation:

UASLR stands for User Address Space Layout Randomization, which is a feature of Exploit Prevention Module (EPM) that provides better entropy for randomization of memory locations. UASLR adds entropy to the base address of the executable image and the heap, making it harder for attackers to predict the memory layout of a process. UASLR is enabled by default for all processes, but can be disabled or customized for specific applications using the EPM policy settings. Reference:

Exploit Prevention Module (EPM) entropy randomization memory locations

Exploit protection reference

### NEW QUESTION # 63

What is the function of WildFire for Cortex XDR?

- A. WildFire runs in the cloud and analyses alert data from the XDR agent to check for behavioural threats.
- B. WildFire runs entirely on the agent to quickly analyse samples and provide a verdict.
- C. WildFire is the engine that runs on the local agent and determines whether behavioural threats are occurring on the endpoint.
- D. WildFire accepts and analyses a sample to provide a verdict.

**Answer: D**

Explanation:

WildFire is a cloud-based service that accepts and analyses samples from various sources, including Cortex XDR, to provide a verdict of malware, benign, or grayware. WildFire also generates detailed analysis reports that show the behaviour and characteristics of the samples. Cortex XDR uses WildFire verdicts and reports to enhance its detection and prevention capabilities, as well as to provide more visibility and context into the threats. Reference:

WildFire Analysis Concepts

WildFire Overview

### NEW QUESTION # 64

What are two purposes of "Respond to Malicious Causality Chains" in a Cortex XDR Windows Malware profile? (Choose two.)

- A. Automatically terminate the threads involved in malicious activity.
- **B. Automatically kill the processes involved in malicious activity.**
- C. Automatically close the connections involved in malicious traffic.
- **D. Automatically block the IP addresses involved in malicious traffic.**

**Answer: B,D**

### NEW QUESTION # 65

When creating a scheduled report which is not an option?

- **A. Run quarterly on a certain day and time.**
- B. Run monthly on a certain day and time.
- C. Run daily at a certain time (selectable hours and minutes).
- D. Run weekly on a certain day and time.

**Answer: A**

Explanation:

When creating a scheduled report in Cortex XDR, the option to run quarterly on a certain day and time is not available. You can only schedule reports to run daily, weekly, or monthly. You can also specify the start and end dates, the time zone, and the recipients of the report. Scheduled reports are useful for generating regular reports on the security events, incidents, alerts, or endpoints in your network. You can create scheduled reports from the Reports page in the Cortex XDR console, or from the Query Center by saving a query as a report. Reference:

Run or Schedule Reports

Create a Scheduled Report

### NEW QUESTION # 66

.....

There are two big in the XDR-Analyst exam questions -- software and online learning mode, these two models can realize the user to carry on the simulation study on the XDR-Analyst study materials, fully in accordance with the true real exam simulation, as well as the perfect timing system, at the end of the test is about to remind users to speed up the speed to solve the problem, the XDR-Analyst Training Materials let users for their own time to control has a more profound practical experience, thus effectively and perfectly improve user efficiency to pass the XDR-Analyst exam.
