It tests the knowledge and skills of the candidates in implementing and managing the COBIT 2019 framework in their organizations.

## ISACA COBIT 2019 Foundation Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Which of the following BEST enables an enterprise to show and prove the benefits realized from the implementation of an EGIT program plan?

- A. Delivering a solution from a long-term and complex project
- B. Tracking expected benefits and targets until program implementation
- C. Adopting performance metrics that are easy to achieve

- **D. Communicating the results and benefits in business impact terms**

**Answer: D**

Explanation:

Communicating the results and benefits of an EGIT program plan in business impact terms is essential for an enterprise to be able to show and prove the benefits realized from the implementation. This includes providing clear evidence of how the program plan has created value, such as increased efficiency, cost savings, and improved customer satisfaction. Additionally, it is important to ensure that the results and benefits are communicated to all relevant stakeholders to ensure that they are aware of the value created.

#### **NEW QUESTION # 22**

The alignment goal titled "Enabling and supporting business processes by integrating applications and technology" is aligned to which IT balanced scorecard (BSC) dimension?

- A. Customer
- B. Financial
- **C. Internal**

**Answer: C**

Explanation:

The IT balanced scorecard (BSC) is a tool that helps to measure and communicate the achievement of IT goals in relation to enterprise goals, using four dimensions: financial, customer, internal, and learning and growth. The alignment goal titled "Enabling and supporting business processes by integrating applications and technology" is aligned to the internal dimension of the IT BSC, as it relates to the efficiency and effectiveness of IT processes that support business processes<sup>2</sup>, p. 20. #### **NEW QUESTION # 23**

Which of the following COBIT publications also references other standards and frameworks?

- A. COBIT 2019 Implementation Guide: Implementing and Optimizing an Information and Technology Governance Solution
- **B. COBIT 2019 Framework: Governance and Management Objectives**
- C. COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution

**Answer: B**

Explanation:

COBIT 2019 explicitly states-when describing the COBIT publication set-that the "Governance and Management Objectives" publication includes references to other standards and frameworks.

Exact Extract (COBIT 2019 Framework: Introduction and Methodology):

"COBIT 2019 Framework: Governance and Management Objectives-Describes the core COBIT governance and management objectives, their purpose statements and related guidance. This guide also references other standards and frameworks. " This is further confirmed in the Implementation Guide's overview of the COBIT publications:

Exact Extract (COBIT 2019 Implementation Guide):

"COBIT 2019 Framework: Governance and Management Objectives ... This guide also references other standards and frameworks. " Therefore, the correct answer is B. COBIT 2019 Framework: Governance and Management Objectives .

References:

COBIT 2019 Framework: Introduction and Methodology - description of COBIT core publications.

COBIT 2019 Implementation Guide: Implementing and Optimizing an Information and Technology Governance Solution - description of COBIT publication set.

#### **NEW QUESTION # 24**

Which of the following is an element of governance?

- **A. Evaluating stakeholder needs to determine enterprise objectives**
- B. Building plans to align with the direction set by the governance body
- C. Monitoring activities designed to achieve enterprise objectives

**Answer: A**

Explanation:

An element of governance is evaluating stakeholder needs to determine enterprise objectives. This is based on the principle of stakeholder value, which states that "governance of enterprise I&T should ensure that stakeholder needs, conditions and options are evaluated to determine balanced, agreed-on enterprise objectives to be achieved; setting direction through prioritization and decision making; and monitoring performance and compliance against agreed-on direction and objectives" 1. Evaluating stakeholder needs involves identifying who the stakeholders are, what their interests and expectations are, and how they can influence or be influenced by the enterprise's activities 2. ### NEW QUESTION # 25

When considering the IT implementation methods design factor, and the design factor value is DevOps, which of the following should be a management objective priority?

- A. Managed availability and capacity (BAI04)
- B. Managed service requests and incidents (DSS02)
- C. Managed change acceptance and transitioning (BAI07)
- **D. Managed solution identification and build (BAI03)**

**Answer: D**

Explanation:

The IT implementation methods design factor describes how an enterprise develops, delivers, and maintains its IT solutions. DevOps is an IT implementation method that emphasizes collaboration, automation, integration, and feedback between the development and operations teams throughout the software development life cycle. One of the management objectives that should be prioritized when using DevOps is managed solution identification and build (BAI03), which involves defining, designing, building, testing, and deploying IT solutions that meet stakeholder requirements and expectations. This management objective supports the DevOps principles of continuous delivery, continuous integration, continuous testing, and continuous deployment, which aim to deliver high-quality IT solutions faster and more reliably.
