

# 100% Pass Quiz DP-700 - Implementing Data Engineering Solutions Using Microsoft Fabric Useful Latest Exam Practice

BONUS!!! Download part of Prep4sureExam DP-700 dumps for free: <https://drive.google.com/open?id=1q0chPFFR669vAInbYSwhhlmUmJ2BUg2>

It can almost be said that you can pass the DP-700 exam only if you choose our DP-700 exam braindumps. Our DP-700 study materials will provide everything we can do to you. Only should you move the mouse to buy it can you enjoy our full range of thoughtful services. Having said that, why not give our DP-700 Preparation materials a try instead of spending a lot of time and effort doing something that you may be not good at? Just give it to us and you will succeed easily.

## Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Ingest and transform data:</b> This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Monitor and optimize an analytics solution:</b> This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Implement and manage an analytics solution:</b> This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li></ul>

## 2026 Microsoft DP-700: Efficient Implementing Data Engineering Solutions Using Microsoft Fabric Latest Exam Practice

Failure makes people depressed especially for working engineers. If your test score effects your work and you make mistakes, it is lost than gained. The best method for working people is to purchase valid Microsoft DP-700 test questions and answers. It only takes you a little money to solve a big difficult for you. Also once you pass this subject, the certification is coming to you. Our

passing rate of DP-700 Test Questions and answers is normally 100% just one shot. It is worth buying.

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q35-Q40):

### NEW QUESTION # 35

You have an Azure Event Hubs data source that contains weather data.

You ingest the data from the data source by using an eventstream named Eventstream1. Eventstream1 uses a lakehouse as the destination.

You need to batch ingest only rows from the data source where the City attribute has a value of Kansas. The filter must be added before the destination. The solution must minimize development effort.

What should you use for the data processor and filtering? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Data processor:

- A data pipeline
- A Dataflow Gen2 dataflow
- An eventstream with a custom endpoint
- An eventstream with an external data source

Filtering:

- A Filter activity in a data pipeline
- A filter in a Dataflow Gen2 dataflow
- A KQL statement
- An eventstream processor

Answer:

Explanation:

Answer Area

Data processor:

- A data pipeline
- A Dataflow Gen2 dataflow
- An eventstream with a custom endpoint
- An eventstream with an external data source

Filtering:

- A Filter activity in a data pipeline
- A filter in a Dataflow Gen2 dataflow
- A KQL statement
- An eventstream processor

### NEW QUESTION # 36

You have a Fabric workspace that contains an eventstream named EventStream1. EventStream1 outputs events to a table named Table1 in a lakehouse. The streaming data is sourced from motorway sensors and represents the speed of cars.

You need to add a transformation to EventStream1 to average the car speeds. The speeds must be grouped by non-overlapping and contiguous time intervals of one minute. Each event must belong to exactly one window.

Which windowing function should you use?

- A. hopping
- B. session
- C. tumbling
- D. sliding

Answer: C

### NEW QUESTION # 37

You have a Fabric workspace that contains a semantic model named Modell. You need to monitor the refresh history of Model 1 and visualize the refresh history in a chart. What should you use?

- A. the refresh history from the settings of Modell.
- B. a data pipeline
- **C. a notebook**
- D. a Dataflow Gen2 dataflow

**Answer: C**

### NEW QUESTION # 38

You have a Google Cloud Storage (GCS) container named storage1 that contains the files shown in the following table.

Name	Size
ProductFile.parquet	8 MB
StoreFile.json	500 MB
TripsFile.csv	99 MB

You have a Fabric workspace named Workspace1 that has the cache for shortcuts enabled. Workspace1 contains a lakehouse named Lakehouse1. Lakehouse1 has the shortcuts shown in the following table.

Name	Source	Last accessed
Products	ProductFile	12 hours ago
Stores	StoreFile	4 hours ago
Trips	TripsFile	48 hours ago

You need to read data from all the shortcuts.

Which shortcuts will retrieve data from the cache?

- A. Products only
- **B. Stores and Products only**
- C. Stores only
- D. Trips only
- E. Products, Stores, and Trips
- F. Products and Trips only

**Answer: B**

Explanation:

When reading data from shortcuts in Fabric (in this case, from a lakehouse like Lakehouse1), the cache for shortcuts helps by storing the data locally for quick access. The last accessed timestamp and the cache expiration rules determine whether data is fetched from the cache or from the source (Google Cloud Storage, in this case).

Products: The ProductFile.parquet was last accessed 12 hours ago. Since the cache has data available for up to 12 hours, it is likely that this data will be retrieved from the cache, as it hasn't been too long since it was last accessed.

Stores: The StoreFile.json was last accessed 4 hours ago, which is within the cache retention period.

Therefore, this data will also be retrieved from the cache.

Trips: The TripsFile.csv was last accessed 48 hours ago. Given that it's outside the typical caching window (assuming the cache has a maximum retention period of around 24 hours), it would not be retrieved from the cache. Instead, it will likely require a fresh read from the source.

### NEW QUESTION # 39

You have a Fabric workspace that contains a warehouse named Warehouse1.

You have an on-premises Microsoft SQL Server database named Database1 that is accessed by using an on-premises data gateway.

You need to copy data from Database1 to Warehouse1.

Which item should you use?

- A. an eventstream
- B. a Dataflow Gen1 dataflow

- C. an Apache Spark job definition
- **D. a data pipeline**

**Answer: D**

Explanation:

To copy data from an on-premises Microsoft SQL Server database (Database1) to a warehouse (Warehouse1) in Fabric, a data pipeline is the most appropriate tool. A data pipeline in Fabric is designed to move data between various data sources and destinations, including on-premises databases like SQL Server, and cloud-based storage like Fabric warehouses. The data pipeline can handle the connection through an on-premises data gateway, which is required to access on-premises data. This solution facilitates the orchestration of data movement and transformations if needed.

## NEW QUESTION # 40

.....

Prep4sureExam is a learning website which provides DP-700 latest dumps and answers, and almost covers every knowledge of DP-700 exam questions. Using our learning textbooks to prepare DP-700 test is your best choice. Prep4sureExam with latest DP-700 exam simulations will help you Pass DP-700 Exam in a short time in a fast way. We promise that we will refund fully if the DP-700 vce dumps and training materials have any problems or you fail the DP-700 exam with our DP-700 braindumps.
