

CSA試験合格攻略、CSA問題と解答

さらに、ShikenPASS CSAダンプの一部が現在無料で提供されています: <https://drive.google.com/open?id=1ZOwb6mbrxklCk33PYMBBk4Qv3eIFtAlr>

IT業種を選んだあなたは現状に自己満足することはきっとないですね。現在、どの業種の競争でも激しくなっていて、IT業種も例外ないですから、目標を立ったら勇気を持って目標を達成するために頑張るべきです。その中で、ServiceNowのCSA試験に受かることも競争力があるモードです。この試験に合格したら、あなたのITキャリアには明るい未来があるようになります。あなたを助けるために、我々のShikenPASSは真実かつ正確なトレーニング資料を提供します。ShikenPASSを利用したら、あなたはきっと自分の理想を実現することができます。

ServiceNow CSA 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Configuring Applications for Collaboration: In this topic, questions about Lists, Filters, Tags, Form Configuration, Task Management, Visual Task Boards (VTBs), and Notifications.
トピック 2	Self-Service & Automation: Sub-topics related to knowledge management, service catalog, and flow design are present in this topic. Lastly, it discusses the virtual agent sub-topic.
トピック 3	Data Migration and Integration: In this topic, questions about UI Policies, Business Rules, System update sets, and Scripting in ServiceNow appear.

ServiceNow CSA試験では、システム管理の基礎、ユーザーインターフェイスとナビゲーション、データ管理、セキュリティ、レポートと分析、統合、ワークフローオートメーションなど、幅広いトピックをカバーしています。この試験は、ServiceNowプラットフォームを構成、管理、および維持する候補者の能力をテストするように設計されています。この試験は60の複数選択の質問で構成されており、候補者はそれを完了するのに90分かかります。

CSA問題と解答 & CSA再テスト

CSA試験に合格して証明書を取得する方法に関する質問を検討していますか？ 最良の答えは、CSAクイズトレントをダウンロードして学習することです。CSA試験の質問は、必要なものを短時間で取得するのに役立ちます。CSAトレーニング準備を購入した後、ダウンロードしてインストールするのに少し時間が必要です。その後、学習するのに約20~30時間かかります。CSA試験ガイドをご覧ください、貴重な時間を割いていただければ幸いです。

ServiceNow Certified System Administrator 認定 CSA 試験問題 (Q466-Q471):

質問 # 466

When importing spreadsheet data into ServiceNow, in which step does the data get written to the receiving table?

- A. Import Dataset
- B. Schedule Transform
- C. Run Import
- **D. Run Transform**
- E. Execute Transform

正解: D

解説:

When importing spreadsheet data into ServiceNow using the Import Set process, data is transferred in multiple stages. The step where data gets written to the receiving table is called "Run Transform." Import Set Process in ServiceNow:

Load Data: The spreadsheet or data file is uploaded to a temporary table (Import Set table).

Run Transform: The system processes the import set data and writes it to the target table.

Verify Data: After transformation, the data is checked for accuracy.

Explanation of Each Step:

Load Data:

The spreadsheet or external data is first imported into a staging table (Import Set table) in ServiceNow.

At this stage, the data is not yet written to the actual destination table.

Run Transform (Correct Answer):

The Transform Map applies field mappings and business logic.

The data is processed and written from the import set table to the target table (e.g., Incident, CMDB, or any other receiving table).

Any data transformation (such as field mappings, lookups, or script-based modifications) happens here.

Verify Data:

After transformation, users should validate the imported records to ensure that data was written correctly.

Why Other Options Are Incorrect?

B . Run Import:

This step only loads the data into a temporary Import Set table.

It does not write data to the receiving table.

C . Import Dataset:

"Import Dataset" is not an actual step in the ServiceNow data import process.

D . Execute Transform:

There is no "Execute Transform" step in ServiceNow.

The correct term is "Run Transform."

E . Schedule Transform:

While you can schedule transforms, this is not the step where data gets written to the final table.

The actual transformation and writing occur during "Run Transform."

質問 # 467

What ServiceNow feature can be triggered by events, and is used to inform users about activities or updates in ServiceNow?

- A. Events
- B. Texts
- C. Emails
- **D. Notifications**
- E. Alerts

正解: D

解説:

ServiceNow Notifications are used to inform users about events or activities occurring within the system. They can be triggered based on system events and can be delivered via multiple channels, such as email, SMS, and push notifications.

How Notifications Work:

Triggered by events (e.g., when an incident is assigned to a user).

Configurable through System Notification > Email > Notifications.

Can be sent via Email, SMS, or Push Notifications.

Why Not Other Options?

B . Alerts - Alerts provide system messages but are not tied to the notification system.

C . Texts - Not a ServiceNow feature; SMS notifications are handled within the Notification system.

D . Events - Events trigger notifications but do not directly inform users.

E . Emails - Email is one of the delivery methods for notifications, but Notifications is the actual ServiceNow feature managing them.

質問 # 468

What are the 6 methods available for user authentication?

- **A. Local Database: The user name and password in their user record in the instance database.**
- B. OAuth 2.0: The user name and password of OAuth identity provider, which has a matching user account in the database.
- C. SAML 2.0: The user name and password configured in a SAML identity provider account, which has a matching user account in the database.
- D. LDAP: The user name and password are accessed via LDAP in the corporate directory, which has a matching user account in the database.
- E. Digest Token: An encrypted digest of the user name and password in the user record.
- F. Multifactor: The user name and password in the database and passcode sent to the user's mobile device that has Google Authenticator installed

正解: A

質問 # 469

On the Form header, which icon do you use to access form templates?

- A. More Options {...}
- B. Pages
- **C. Stamp**
- D. Paperclip

正解: C

解説:

In ServiceNow, the Stamp icon (□) in the Form Header is used to access Form Templates. Templates allow users to quickly populate fields in a form with predefined values, improving efficiency and consistency.

How to Access Form Templates:

Open a record form (e.g., Incident, Change, or Request form).

Click the Stamp (□) icon in the form header.

Select a template from the list.

The form fields will be pre-filled with the template's values.

Why Are Other Options Incorrect?

A . Paperclip □

The Paperclip icon is used to attach files to a record, not access templates.

B . Pages □

No Pages icon is used for templates in ServiceNow.

D . More Options {...} □

The More Options menu provides access to additional record actions, but templates are accessed using the Stamp icon.
