HPE Hybrid Cloud Solutions Sample Questions (Q104-Q109):

NEW QUESTION # 104

You are troubleshooting a server and reviewing alerts at the server level, including the NIC link loss, temperature, and automatic shutdown actions. Which log file should you review?

- A. IML-Integrated Management Log
- B. iLO Event Log
- C. Security Log
- D. HPE OneView Activity Log

Answer: A

Explanation:

* Understanding the Requirements:

The task is to troubleshoot a server by reviewing alerts related to NIC link loss, temperature issues, and automatic shutdown actions.

* Log File Options:

A. HPE OneView Activity Log: Tracks configuration changes and activities within HPE OneView, but not detailed hardware alerts.

B . Security Log: Typically tracks security-related events, such as login attempts and access violations.

C . IML-Integrated Management Log: Records detailed hardware-related events including NIC issues, temperature alerts, and shutdowns.

D . iLO Event Log: Captures events related to the Integrated Lights-Out (iLO) management processor, including some hardware alerts but not as comprehensive as the IML.

* Why IML-Integrated Management Log (C) is the Best Fit:

Comprehensive Hardware Events: The IML logs detailed information on hardware events such as NIC link loss, temperature issues, and shutdowns, which are crucial for troubleshooting.

Direct Relevance: The IML is specifically designed to capture and provide insights into the types of alerts mentioned in the question.

NEW QUESTION # 105

Which of the following is a key feature of HPE Helion?

- A. Hybrid cloud management
- B. Serverless computing
- C. Container orchestration
- D. Software-defined networking

Answer: A

Explanation:

HPE Helion provides a range of tools and services for managing hybrid cloud environments, including automation, orchestration, and security. Its key feature is hybrid cloud management, which enables organizations to manage and optimize their cloud resources from a single interface.

NEW QUESTION # 106

Your customer IS interested in me new MSA storage array and asks for a demo Of the features and monitoring capabilities. which tool should you use?

- A. HPE Data serves Cloud console (DSCC)
- B. HPE InfoSight
- C. HPE StoreServ Management console (SSMC)
- D. HPE Storage Management Utility (SMU)

Answer: D

Explanation:

Explanation

According to HPE, SMU is a web-based interface that enables you to configure, monitor, and manage storage devices. It also provides performance monitoring and reporting for HPE MSA storage arrays¹. With SMU, you can demonstrate the features and monitoring capabilities of the new MSA storage array to your customer.

NEW QUESTION # 107

How does HPE InfoSight help organizations manage their IT infrastructure?

- A. By providing cloud-based IT management solutions
- B. By offering a range of IT management and automation tools
- C. By providing advanced analytics and machine learning capabilities

Answer: C

Explanation:

HPE InfoSight provides organizations with advanced analytics and machine learning capabilities for managing their IT infrastructure, including servers, storage, and networking. It enables organizations to proactively identify and resolve IT issues before they become problems, while providing real-time insights into the performance and health of their IT resources.

NEW QUESTION # 108

Are HPE Nimble Storage solutions designed for high-performance database workloads?
