Free PDF Plat-Con-201 - Authoritative Salesforce Certified Omnistudio Consultant Test Engine

Differ as a result the Plat-Con-201 questions torrent geared to the needs of the user level, cultural level is uneven, have a plenty of college students in school, have a plenty of work for workers, and even some low education level of people laid off, so in order to adapt to different level differences in users, the Plat-Con-201 exam questions at the time of writing teaching materials with a special focus on the text information expression, as little as possible the use of crude esoteric jargon, as much as possible by everyone can understand popular words to express some seem esoteric knowledge, so that more users through the Plat-Con-201 Prep Guide to know that the main content of qualification examination, stimulate the learning enthusiasm of the user, arouse their interest in learning.

Salesforce Certified Omnistudio Consultant Sample Questions (Q140-Q145):

NEW QUESTION # 140
In an Integration Procedure, what group element will control whether an individual action executes?

- A. Cache Block
- B. Conditional Block
- C. Try-Catch Block
- D. Loop Block

Answer: B

Explanation:
The group element that will control whether an individual action executes in an Integration Procedure is Conditional Block. Conditional Block allows the designer to specify a condition that determines whether the actions inside the block will run or not. Cache Block is used to store data in memory for later use. Try-Catch Block is used to handle errors and exceptions. Loop Block is used to iterate over a collection of data.

NEW QUESTION # 141

A company plans to rebuild a process that includes functionality that was originally written in APEX and Visual pages using OmniScript. The consultant reviews the process and sees in the first step, the user reviews data and, then enters additional information. In the next step, the process retrieves data from an external system.
In this scenario, which OmniStudio data tool should the consultant recommend?

- A. Calculation Procedure
- B. DataRaptor Extract
- C. Integration Procedure
- D. DataRaptor Turbo

Answer: C

Explanation:
The OmniStudio data tool that the consultant should recommend in this scenario is an Integration Procedure.
An Integration Procedure can execute multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services. In this case, the Integration Procedure can retrieve data from an external system via a REST API and store it in a JSON object for the OmniScript to display

NEW QUESTION # 142

Which Omniscript element retrieves Salesforce data that is then returned in Value/Label pairs and becomes available for selection in a dropdown list.

- A. Calculation Action
- B. Lookup
- C. Date Mapper Extract Action
- D. Select

Answer: D

Explanation:
Below is the formatted question with a 100% verified answer based on official Salesforce OmniStudio documentation, including a comprehensive explanation and references.

NEW QUESTION # 143

An OmniScript saves data to Salesforce and to an external system. What OmniScript element could save all this data?

- A. HTTP Action
- B. DataRaptor Transform Action
- C. Integration Procedure Action
- D. DataRaptor Post Action

Answer: C

Explanation:
The OmniScript element that could save all this data is Integration Procedure Action. An Integration Procedure Action can execute an Integration Procedure that can combine multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services. This way, the Integration Procedure Action can write data to Salesforce using a DataRaptor Load action and to an external system using a REST or SOAP service

NEW QUESTION # 144

A consultant Is designing a solution for a client using Omnistudio. The client wants to display data and launch actions from their Salesforce org.
Which OmniStudio tool should the consultant use to meet this requirement?

- A. DataRaptors
- B. Integration Procedures
- C. OmniScripts
- D. FlexCards

Answer: D

Explanation:
* FlexCards (B) - FlexCards are designed to display data from Salesforce and launch actions such as OmniScripts, Integration Procedures, or external API calls.
* FlexCards allow users to interact with data dynamically while keeping the UI simple and intuitive.
* A. DataRaptors - These are used for extracting, transforming, and loading data, but they do not have a UI component to display data.
* C. OmniScripts - OmniScripts are used for step-by-step guided interactions but are not meant for displaying data at a glance like FlexCards.
* D. Integration Procedures - These are used for server-side processing but do not display data or provide UI elements.
Comprehensive and Detailed In-Depth Explanation:Why not the other options?? Salesforce OmniStudio Reference:
* FlexCards Overview
* Launching Actions from FlexCards
