Salesforce Identity-and-Access-Management-Architect Test Price - Latest Identity-and-Access-Management-Architect Study Guide

What's more, part of that Pass4Leader Identity-and-Access-Management-Architect dumps now are free: https://drive.google.com/open?id=1Te4yqJs2uekmObQWPqe7W-pzojME78wF

Most of the candidates who plan to take the Identity-and-Access-Management-Architect certification exam lack updated practice questions to ace it on the first attempt. Due to this, they fail the Salesforce Certified Identity and Access Management Architect (Identity-and-Access-Management-Architect) test, losing money and time. And in some cases, applicants fail on the second attempt as well because they don't prepare with Identity-and-Access-Management-Architect Actual Exam questions. This results in not only the loss of resources but also the motivation of the candidate.

Salesforce Identity-and-Access-Management-Architect exam is a valuable credential for IT professionals who specialize in IAM on the Salesforce platform. Salesforce Certified Identity and Access Management Architect certification validates a candidate's knowledge and expertise in designing, implementing, and managing secure and scalable IAM solutions. If you are an IT architect, administrator, or consultant looking to enhance your career in the field of IAM on the Salesforce platform, this certification is worth considering.

Salesforce Identity-and-Access-Management-Architect (Salesforce Certified Identity and Access Management Architect) Certification Exam is designed for professionals who want to demonstrate their expertise in the field of identity and access management within the Salesforce platform. Salesforce Certified Identity and Access Management Architect certification exam is aimed at individuals who have experience in designing and implementing complex identity and access management solutions in Salesforce.

Free Salesforce Identity-and-Access-Management-Architect Dumps - Pass Salesforce Identity-and-Access-Management-Architect Exam

Each format specializes in a specific study style and offers unique benefits, each of which is crucial to good Salesforce Certified Identity and Access Management Architect (Identity-and-Access-Management-Architect) exam preparation. The specs of each Salesforce Identity-and-Access-Management-Architect Exam Questions format are listed below, you may select any of them as per your requirements.

Salesforce Certified Identity and Access Management Architect Sample Questions (Q158-Q163):

NEW QUESTION # 158
The CMO of an advertising company has invited an Identity and Access Management (IAM) specialist to discuss Salesforce out-of-box capabilities for configuring the company*s login and registration experience on Salesforce Experience Cloud.
The CMO is looking to brand the login page with the company's logo, background color, login button color, and dynamic right-frame from an external URL.
Which two solutions should the IAM specialist recommend?
Choose 2 answers

- A. Build custom pages for branding requirements in Experience Cloud.
- B. Build custom site pages for reset and forgot password features.
- C. Login & Registration pages can be branded in the Community Administration settings.
- D. Use Experience Builder to build branded Reset and Forgot Password pages.

Answer: C,D

Explanation:
Explanation
Experience Builder and Community Administration settings are the tools that allow branding the login and registration pages in Experience Cloud. Custom pages are not necessary for this use case.

NEW QUESTION # 159
An insurance company has a connected app in its Salesforce environment that is used to integrate with a Google Workspace (formerly knot as G Suite).
An identity and access management (IAM) architect has been asked to implement automation to enable users, freeze/suspend users, disable users, and reactivate existing users in Google Workspace upon similar actions in Salesforce.
Which solution is recommended to meet this requirement?

- A. Build an Apex trigger on the useriogin object to make asynchronous callouts to Google APIs.
- B. Configure user Provisioning for Connected Apps.
- C. Build a custom REST endpoint in Salesforce that Google Workspace can poll against.
- D. Update the Security Assertion Markup Language Just-in-Time (SAML JIt; handler in Salesforce for user provisioning and de-provisioning.

Answer: B

NEW QUESTION # 160
Universal containers(UC) has implemented SAML-BASED single Sign-on for their salesforce application and is planning to provide access to salesforce on mobile devices using the salesforce1 mobile app. UC wants to ensure that single Sign-on is used for accessing the salesforce1 mobile app. Which two recommendations should the architect make? Choose 2 answers

- A. Configure the embedded Web browser to use my domain URL.
- B. Use the existing SAML SSO flow along with Web server flow

- C. Use the existing SAML SSO flow along with user agent flow.
- D. Configure the salesforce1 app to use the my domain URL

Answer: A,D

Explanation:
To use SAML SSO for accessing the Salesforce1 mobile app, the architect should recommend configuring the embedded web browser to use the My Domain URL and configuring the Salesforce1 app to use the My Domain URL4. Using the My Domain URL allows Salesforce to identify the identityprovider and initiate the SSO process5. Using the existing SAML SSO flow along with user agent flow or web server flow is not necessary because SalesforceMobile Applications only work with service provider initiated setups46.
Therefore, option B and D are the correct answers.

NEW QUESTION # 161

Universal Containers (UC) rolling out a new Customer Identity and Access Management Solution will be built on top of their existing Salesforce instance.
Several service providers have been setup and integrated with Salesforce using OpenID Connect to allow for a seamless single sign-on experience. UC has a requirement to limit user access to only a subset of service providers per customer type.
Which two steps should be done on the platform to satisfy the requirement?
Choose 2 answers

- A. Manage which connected apps a user has access to by assigning authentication providers to the user's profile.
- B. Use Profiles and Permission Sets to assign user access to Admin Pre-Approved Connected Apps.
- C. Set each of the Connected App access settings to Admin Pre-Approved.
- D. Assign the connected app to the customer community, and enable the users profile in the Community settings.

Answer: B,C

Explanation:
Explanation
To limit user access to only a subset of service providers per customer type, the identity architect should use Profiles and Permission Sets to assign user access to Admin Pre-Approved Connected Apps. Connected apps are frameworks that enable external applications to integrate with Salesforce using APIs and standard protocols, such as OpenID Connect. By setting each of the Connected App access settings to Admin Pre-Approved, the identity architect can control which users can access which connected apps by assigning profiles or permission sets to the connected apps. The other options are not relevant for this scenario.

NEW QUESTION # 162

Northern Trail Outfitters (NTO) recently purchased Salesforce Identity Connect to streamline user provisioning across Microsoft Active Directory (AD) and Salesforce Sales Cloud.
NTO has asked an identity architect to identify which salesforce security configurations can map to AD permissions.
Which three Salesforce permissions are available to map to AD permissions?
Choose 3 answers

- A. Field-Level Security
- B. Roles
- C. Sharing Rules
- D. Public Groups
- E. Profiles and Permission Sets

Answer: B,D,E

NEW QUESTION # 163

......
