Practice Exam.

ISACA Certified Information Security Manager Sample Questions (Q82-Q87):

NEW QUESTION # 82
Which of the following BEST helps to enable the desired information security culture within an organization?

- A. Incentives for appropriate information security-related behavior
- B. Information security awareness training and campaigns
- C. Delegation of information security roles and responsibilities
- D. Effective information security policies and procedures

Answer: B

Explanation:
Explanation
Information security awareness training and campaigns are the best way to enable the desired information security culture within an organization because they help to educate, motivate and influence the behavior and attitude of the employees towards information security. They also help to raise the awareness of the risks, threats and best practices of information security among the staff and stakeholders.

NEW QUESTION # 83
Company A, a cloud service provider, is in the process of acquiring Company B to gain new benefits by incorporating their technologies within its cloud services.
Which of the following should be the PRIMARY focus of Company A's information security manager?

- A. The cost to align to Company A's security policies
- B. The organizational structure of Company B
- C. Company B's security policies
- D. Company A's security architecture

Answer: D

Explanation:
Explanation
Company A's security architecture is the PRIMARY focus of Company A's information security manager, because it defines the overall security design and controls for the cloud services that Company A provides to its customers. The information security manager should ensure that the security architecture is aligned with the business objectives and requirements of Company A, and that it can accommodate the integration of Company B's technologies without compromising the security, performance, and availability of the cloud services.
References =
CISM Review Manual, 16th Edition, ISACA, 2020, p. 67: "Security architecture is the design of the security controls that are applied to the information assets and the relationships among those assets." CISM Review Manual, 16th Edition, ISACA, 2020, p. 68: "The information security manager should ensure that the security architecture is aligned with the enterprise's business objectives and requirements and supports the information security strategy and program." CISM Review Manual, 16th Edition, ISACA, 2020, p. 69: "The information security manager should consider the impact of changes in the enterprise environment, such as mergers and acquisitions, on the security architecture and identify the necessary modifications or enhancements to maintain the security posture of the enterprise."

NEW QUESTION # 84
In which of the following system development life cycle (SDLC) phases are access control and encryption algorithms chosen?

- A. Procedural design
- B. Architectural design
- C. Software development

- D. System design specifications

Answer: D

Explanation:
Explanation
The system design specifications phase is when security specifications are identified. The procedural design converts structural components into a procedural description of the software. The architectural design is the phase that identifies the overall system design, hut not the specifics. Software development is too late a stage since this is the phase when the system is already being coded.

NEW QUESTION # 85
Which of the following presents the challenge in calculating return on investment (ROI) in the security environment?

- A. Cost of security tools is difficult to estimate.
- B. Number of incidents cannot be predetermined.
- C. Project cost overruns cannot be anticipated.
- D. Costs of security incidents cannot be estimated.

Answer: B

NEW QUESTION # 86
An information security manager of an e-commerce business is reviewing the results of a business continuity plan (BCP) review. Which of the following findings should be the MOST immediate concern?

- A. The recovery time objective (RTO) was not met during a recent power outage.
- B. The business continuity plan (BCP) has not been recently tested.
- C. The annual business impact analysis (BIA) has been delayed.
- D. The cost of a recent recovery test exceeded budget expectations.

Answer: A

NEW QUESTION # 87
......
