NEW QUESTION # 22

Which cloud services provider can be used to deploy PowerProtect Data Manager?

- A. Alibaba Cloud
- B. Google Cloud Platform
- C. IBM Cloud
- D. Oracle Cloud Infrastructure

Answer: B

Explanation:

Dell PowerProtect Data Manager is designed to provide consistent data protection across on-premises, hybrid, and multi-cloud

environments. To facilitate this, PPDM supports deployment in major public cloud infrastructure providers.

* Supported Cloud Providers: PowerProtect Data Manager can be deployed as a virtual appliance in Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP).

* Deployment Methods: In these environments, PPDM can be deployed using a machine image available directly from the respective cloud provider's marketplace. For instance, in GCP, you can search for and deploy PowerProtect Data Manager from the Google Cloud Marketplace, which simplifies the initial setup and ensures the virtual machine is correctly sized for the workload.

* Integrated Protection: When deployed in the cloud, PPDM typically works alongside PowerProtect DD Virtual Edition (DDVE) to provide deduplicated protection storage for cloud-native assets like VMs, databases, and Kubernetes clusters running within that same cloud region.

Other providers like IBM Cloud, Oracle Cloud, or Alibaba Cloud are not currently listed as supported deployment platforms for the PPDM appliance in the official Dell PowerProtect Data Manager Deployment Guide.
