

# dbt-Analytics-Engineering Valid Practice Questions, Valid dbt-Analytics-Engineering Test Prep

---

## DBT Analytics Engineering Certification Questions with Complete Solutions

Which is the right order in which dbt prioritizes configurations Correct Answer-in-file config() block > takes priority over properties defined in a .yaml file > takes priority over config defined in the project file

Choose two valid snapshot strategies in dbt Correct Answer-check and timestamp

Which is a task which is achieved by ref function Correct Answer-automatically build the dependency graph

Given the following model code:

```
Select col_1, col_2 From {{ ref('model_a') }}
```

While running dbt run, following error occurred: table does not exist What is the most likely error (Choose 2) Correct Answer-wrong database or schema and not enough permissions

Given the snapshot config, how check\_cols will be used

```
{{ config(
  target_schema='history',
  target_database='analytics',
  strategy='timestamp',
  unique_key='id',
  updated_at='updated_at',
```

P.S. Free & New dbt-Analytics-Engineering dumps are available on Google Drive shared by TestPassKing: <https://drive.google.com/open?id=1plordMRhXhNKtUmQ9iy7qITVrUit9W8>

Although the passing rate of our dbt-Analytics-Engineering simulating exam is nearly 100%, we can refund money in full if you are still worried that you may not pass. You don't need to worry about the complexity of the refund process at all, we've made it quite simple. As long as you provide us with proof that you failed the exam after using our dbt-Analytics-Engineering, we can refund immediately. If you encounter any problems during the refund process, you can also contact our customer service staff at any time. They will help you solve the problem as quickly as possible. That is to say, our dbt-Analytics-Engineering Exam Questions almost guarantee that you pass the exam. Even if you don't pass, you don't have to pay any price for our dbt-Analytics-Engineering simulating exam. I hope we have enough sincerity to impress you.

Keeping in mind all these benefits, we ensure you can pass the dbt Analytics Engineering Certification Exam dbt-Analytics-Engineering exam on your maiden attempt with the help of our exceptional dbt Labs dbt-Analytics-Engineering dumps material. Our dedicated and committed team takes feedback from over 90,000 experts worldwide in the dbt Labs dbt-Analytics-Engineering Dumps field to update our product.

## Engineering Certification Exam Valid Practice Questions

When finding so many exam study material for TestPassKing dbt-Analytics-Engineering exam dumps, you may ask why to choose dbt Labs dbt-Analytics-Engineering training dumps. Now, we will clear your confusion. Firstly, our questions and answers of dbt-Analytics-Engineering pdf dumps are compiled and edited by highly-skilled IT experts. Besides, we have detailed explanation for the complex issues, thus you can easy to understand. What's more, the high hit rate of dbt-Analytics-Engineering Questions can ensure you 100% pass.

### dbt Labs dbt Analytics Engineering Certification Exam Sample Questions (Q80-Q85):

#### NEW QUESTION # 80

dbt Model Snippet:SQL

- A. The GROUP BY month clause leading to duplicate rows.
- **B. The SUM(order\_amount) aggregation logic.**
- C. Incorrect Jinja usage within a macro used for templating.
- D. The source() function retrieving data from the incorrect schema.

**Answer: B**

Explanation:

Focus on the calculation itself, as the rest of the structure seems expected. The source reference and grouping appear standard.

#### NEW QUESTION # 81

You need to build a model to identify customers who haven't placed orders in the past 90 days. Performance with this model is critical, as it will trigger a re-engagement campaign. Which strategy is likely to yield the best results?

- A. Filter the orders table for dates within the past 90 days, then find customers without corresponding order IDs.
- **B. Join the customers and orders table, group by customer ID and use a HAVING clause to filter inactive customers.**
- C. Create a materialized view that contains only active customers and join against the orders table.
- D. Use a window function to rank order dates for each customer and filter those where the most recent order is older than 90 days.

**Answer: B**

Explanation:

While other options might work, joining and using a HAVING clause tends to be a performant pattern for this use case in most databases. Pre-filtering customers in a materialized view could be useful but depends on how frequently that data changes.

#### NEW QUESTION # 82

You need to give read-only access to a specific dataset in your production data warehouse to a data analyst on your team. How might you approach this using dbt environments?

- A. Create a dedicated dbt target for the analyst and utilize grants within your models to control access.
- B. Modify the data warehouse permissions directly to grant access to the required dataset.
- **C. A combination of the above, depending on the capabilities of your data warehouse.**
- D. Use row-level security features in your data warehouse and dynamically filter data in models using environment variables.

**Answer: C**

Explanation:

A: Managing permissions in the data warehouse is often essential. B: dbt grants offer an additional layer of access control within your models. C: Row-level security provides fine-grained control but requires support from your data warehouse.

#### NEW QUESTION # 83

You've defined a complex custom singular test. While testing it initially on a development dataset, it times out. Which optimization

techniques might be worth trying?

- A. Rewrite the test using a dbt macro for better maintainability.
- **B. Remove any redundant joins or subqueries from the test logic.**
- **C. Ensure the test SQL uses appropriate indexes in the underlying database.**
- D. Disable the test in production environments and run it only in development.

**Answer: B,C**

Explanation:

A and C target improving query performance. B deals with code organization, not speed. D sacrifices data quality for speed

#### **NEW QUESTION # 84**

A marketing team needs a model to calculate the 30-day rolling average of new customer signups. The raw signups table is very large and updated hourly. Which approach strikes the best balance between accuracy and computational efficiency?

- A. An ephemeral model that calculates the rolling average within a series of complex CTEs.
- B. A table materialization that completely rebuilds the rolling average daily.
- **C. An incremental model that updates the rolling average calculations only for new signup records.**
- D. A view materialization that recalculates the 30-day rolling average for each query.

**Answer: C**

Explanation:

Incremental models are designed for metrics like this. They minimize processing overhead while ensuring the rolling average stays up-to-date. Options A and B are computationally expensive, while D doesn't address storage for reuse.

#### **NEW QUESTION # 85**

.....

There is no doubt that among our three different versions of dbt-Analytics-Engineering guide torrent, the most prevalent one is PDF version, and this is particularly suitable and welcomed by youngsters. There are some features of this version: first of all, PDF version of our dbt-Analytics-Engineering prep guide can be printed into paper, though which you are able to do some note-writing and highlight the important exam points. There is an old saying goes, good memory is inferior to sodden ability to write, so we believe that it is a highly productive way for you to memory the knowledge point and review the reference books more effectively. Besides our dbt-Analytics-Engineering Exam Torrent support free demo download, as we mentioned before, it is an ideal way for you to be fully aware of our dbt-Analytics-Engineering prep guide and then purchasing them if suitable and satisfactory.
