New EMEA-Advanced-Support Exam Topics - EMEA-Advanced-Support Real Sheets

DOWNLOAD the newest Pass4Test EMEA-Advanced-Support PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1HNJ0wKl7RDDL9xEXdyqoNwLEFYkXMNiY

To become more powerful and struggle for a new self, getting a professional EMEA-Advanced-Support certification is the first step beyond all questions. We suggest you choose our EMEA-Advanced-Support test prep ----an exam braindump leader in the field. Since we release the first set of the EMEA-Advanced-Support quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more recognition. And our EMEA-Advanced-Support Exam Torrent will also be sold at a discount from time to time and many preferential activities are waiting for you.

Demos of EMEA-Advanced-Support PDF and practice tests are free to download for you to validate the Fortinet EMEA-Advanced-Support practice material before actually buying the Fortinet EMEA-Advanced-Support product. Trying a free demo of Fortinet EMEA-Advanced-Support questions will ease your mind while purchasing the product.

EMEA-Advanced-Support Real Sheets & Latest Test EMEA-Advanced-Support Experience

It's critical to have mobile access to Fortinet practice questions in the fast-paced world of today. All smart devices support Pass4Test Fortinet EMEA-Advanced-Support PDF, allowing you to get ready for the exam anytime and wherever you like. You may easily fit studying for the exam into your hectic schedule since you can access Fortinet EMEA-Advanced-Support Real Exam Questions in PDF from your laptop, smartphone or tablet. Questions available in the Pass4Test Fortinet EMEA-Advanced-Support

PDF document are portable, and printable.

Fortinet EMEA Advanced Support Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43
Which of these BGP paths will be the preferred one ?

- A. Prefer External path (learned via EBGP) over Internal path (IBGP)
- B. Prefer the path with the shortest AS Path
- C. Prefer the path with the lowest Multi-Exit Discriminator (MED)
- D. Prefer the path with the highest Local Preference value

Answer: D

Explanation:
BGP path selection follows a specific order of attributes to determine the best path. The process prefers the path with the highest local preference first, as it is one of the earliest steps in the decision process. Local preference is used within an AS to influence outbound traffic. Only if local preferences are equal does it move to the next criteria, such as shortest AS path. The AS path length is considered after local preference, MED after that, and eBGP over iBGP even later. Therefore, among the options, the highest local preference (D) is the most preferred criterion. The original document's answer B is incorrect based on standard BGP selection rules implemented in Fortinet. Exact extract: This article describes the BGP route selection process. Scope FortiGate. Solution Consider only routes with no AS loops and a valid next hop. BGP makes routing decisions based on path, network policies and rulesets ... select the route with the lowest router ID as the best path. Network. Type. To achieve this, multiple route selection techniques can be used. Some are protocol- agnostic (for example, weight) and others are protocol-specific (for example ...).

NEW QUESTION # 44
What does the below route indicate?

- A. The destination network can be reached via any gates
- B. The destination network is locally connected on that interface
- C. The device does not know the destination
- D. It is a dummy route in the routing table

Answer: B

Explanation:
A route with a directly connected interface (no gateway) indicates the destination network is locally attached to that interface on the FortiGate. This is common for networks directly connected to the device's interfaces.
Option A is vague, B is incorrect as it's not a dummy route, and D suggests an unknown route, which isn't the case. Exact extract: "A directly connected route indicates that the destination network is locally attached to the interface specified in the routing table... No gateway is required for such routes as the FortiGate is directly connected to the network."

NEW QUESTION # 45
What happens when a router receives a packet for forwarding with a TTL value of 1?

- A. The TTL is decreased to 0, the packet is dropped and an ICMP message is sent to the transmitting IP
- B. The packet is only forwarded through the router to a locally attached network
- C. It decreases the value to 0 and then forwards it
- D. It increments it and passes it on to the next router

Answer: A

Explanation:
When a router, such as a FortiGate, receives a packet with a TTL (Time to Live) of 1, it decrements the TTL to 0, drops the packet, and sends an ICMP Time Exceeded message to the source IP. This prevents infinite loops in routing. Option A is incorrect as TTL is decremented, not incremented; B and D are incorrect as the packet is not forwarded when TTL reaches 0. Exact extract: "When a packet's TTL reaches 1, the router decrements it to 0, drops the packet, and sends an ICMP Time Exceeded message to the source IP address to prevent routing loops."

NEW QUESTION # 46

In VMware vSphere, the term VMotion refers to

- A. The patented technology available to migrate a server from Hyper-V to VMware
- B. A zero downtime live migration of workloads from one server to another
- C. The streaming of high definition video on a virtual machine
- D. The process used to describe the movement of hard drive platters on a virtual machine

Answer: B

Explanation:

VMotion in VMware vSphere enables live migration of running virtual machines from one physical server to another with zero downtime, ensuring continuous operation. Fortinet's FortiGate-VM supports such environments. Options A, C, and D are incorrect as they do not describe VMotion; C refers to a different migration scenario, and D is unrelated to virtualization. Exact extract: "VMotion allows the live migration of a running virtual machine from one physical server to another with no downtime... This ensures workloads continue running during server maintenance or load balancing."

NEW QUESTION # 47

Which FortiGate command displays the current routing table?

- A. show router status
- B. get router info routing-table all
- C. diagnose netlink route list
- D. get system route

Answer: B

Explanation:

The 'get router info routing-table all' command displays the FortiGate's current routing table, including all active routes and their details. Options B, C, and D are not valid or specific for this purpose. Exact extract:
"Use 'get router info routing-table all' to display the complete routing table, showing destination, gateway, interface, and metric for all routes."

NEW QUESTION # 48
