

H19-401_V1.0 Reliable Mock Test | Reliable H19-401_V1.0 Test Cost

P.S. Free & New H19-401_V1.0 dumps are available on Google Drive shared by ExamCost: <https://drive.google.com/open?id=1e4vvoDZ7Pt8Evmik-VucCPf2s-ObXub2>

A certificate may be important for someone who wants to get a good job through it, we have the H19-401_V1.0 Learning Materials for you to practice, so that you can pass. H19-401_V1.0 Learning materials of our company is pass rate guarantee and money back guarantee if you fail the exam. Free update is also available, you will have the latest version if you want after the purchasing. Our service stuff is also very glad to help you if you have any questions.

Huawei H19-401_V1.0 Certification Exam covers a wide range of topics related to network planning and design, including network architecture, routing and switching, wireless LAN, network security, network management, and network virtualization. H19-401_V1.0 exam is conducted online and consists of multiple-choice questions. The duration of the exam is 90 minutes, and the passing score is 60%.

Huawei H19-401_V1.0 certification exam consists of multiple-choice questions and is administered online. Candidates have two hours to complete the exam, and they must achieve a passing score in order to earn their certification. H19-401_V1.0 Exam is designed to test the knowledge and skills of candidates in various areas of campus network planning and design, and it is based on the latest industry standards and best practices.

Top H19-401_V1.0 Reliable Mock Test 100% Pass | Efficient H19-401_V1.0:

HCSP-Presales-Campus Network Planning and Design V1.0 100% Pass

The candidates can test themselves for the HCSP-Presales-Campus Network Planning and Design V1.0 exam day by attempting the HCSP-Presales-Campus Network Planning and Design V1.0 H19-401_V1.0 practice test on the software. There is preparation material available on the H19-401_V1.0 Practice Exam software by ExamCost to study for the Huawei H19-401_V1.0 test.

Huawei HCSP-Presales-Campus Network Planning and Design V1.0 Sample Questions (Q427-Q432):

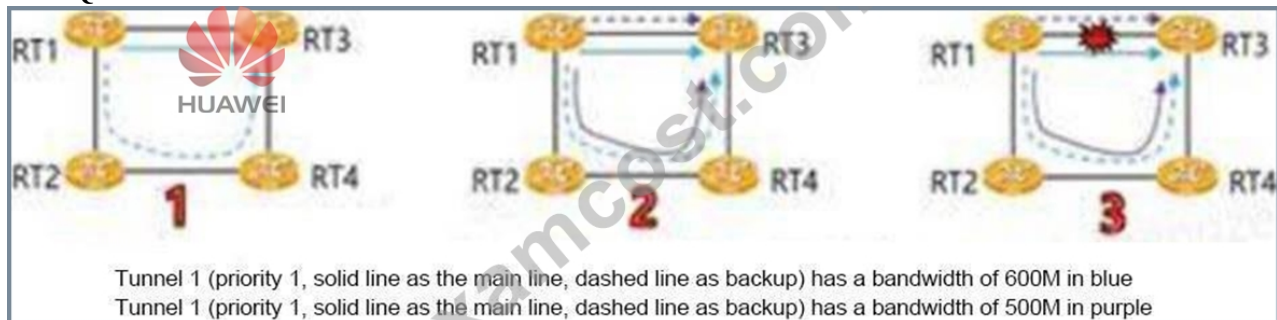

NEW QUESTION # 427

Among the following devices, which ones will not cause interference to wireless APs working at 2.4GHz?

- A. Bluetooth headset
- **B. Infrared sensor**
- C. Cordless phones operating in the 2.4G frequency band
- D. Microwave oven

Answer: B

NEW QUESTION # 428

Refer to the diagram above, which of the following statement about dynamic bandwidth mode is correct? (Multiple choice)

- A. The tunnel supports different priorities (0, 7), 0 indicates the highest priority, and 7 indicates the lowest priority. When a high-priority tunnel does not have a suitable path during path calculation, it can preempt a low-priority tunnel. That is, the bandwidth of the primary and secondary paths of high-priority tunnels is deducted, but the bandwidth of the secondary paths of high-priority tunnels can be shared by low-priority tunnels.
- B. As shown in Figure 3, when the path from RT1 to RT3 fails, because the main path has no way to go, the blue tunnel backup path is enabled. Since 500M bandwidth has been occupied by purple, the remaining bandwidth of the 1G link is only 500M. The remaining bandwidth of the blue tunnel is only 500M. The colored tunnel can only use the remaining 500M bandwidth. Insufficient bandwidth cannot be preempted from the low-priority purple tunnel where services have been deployed.
- C. As shown in Figure 2, creating a tunnel with priority 2 requires a bandwidth of 500M. In dynamic bandwidth mode, when both the primary and secondary high-priority tunnels are up, the bandwidth of the secondary path can be shared by the low-priority tunnel, so the tunnel with priority 2 is still considered to be able to use 1G on the link RT1-RT2-RT4-RT3, so the path calculation can be successful. As shown in Figure 2, purple is a tunnel with priority 2 and bandwidth 500M.
- D. As shown in Figure 1 above, the available bandwidth of TE tunnels for all links is 1G. Blue indicates priority 1 tunnels (the solid line is the primary and the dotted line is the backup), occupying 600M bandwidth. The remaining available bandwidth of the link is 400M
- E. If no SRv6 TE Policy is matched, select the SRv6 TE Policy with the default priority of this address family.

Answer: A,C,D

NEW QUESTION # 429

The NCE-IP operation and maintenance dashboard can display the overall health status of the entire NCE network management from five dimensions: alarms, CPU usage, memory usage, IO and network card traffic.

- A. False
- B. True

Answer: B

NEW QUESTION # 430

If the CPU usage continues to be high, it may be that the FW performed a special task at a certain moment, or there may be sudden traffic at a certain moment.

- A. False
- B. True

Answer: B

NEW QUESTION # 431

The NCE-IP management plane fault alarm manages alarms (public alarms, operating system alarms, hardware server alarms, network management alarms) that may affect the stable operation of NCE, and prompts operation and maintenance personnel through pop-up windows.

Alarm location information guides remote maintenance personnel to promptly repair potential network management failure risks; the interface does not support setting alarm suppression time.

- A. False
- B. True

Answer: A

NEW QUESTION # 432

.....

The ExamCost is a leading platform that is committed to making the Huawei H19-401_V1.0 exam dumps preparation simple, quick, and successful. To achieve this objective ExamCost is offering real, valid, and updated HCSP-Presales-Campus Network Planning and Design V1.0 (H19-401_V1.0) practice questions in three different formats. These formats are ExamCost Huawei H19-401_V1.0 PDF Dumps Files, desktop practice test software, and web-based practice test software. All these ExamCost Huawei exam questions formats are easy to use and compatible with all web browsers, operating systems, and devices.
