

JN0-1103 Certification Training - New JN0-1103 Exam Camp

2026 Latest BraindumpsVCE JN0-1103 PDF Dumps and JN0-1103 Exam Engine Free Share: https://drive.google.com/open?id=13Ea_j80ulFvpjypv18Eo4ArGMUj9K_Lf

We become successful lies on the professional expert team we possess, who engage themselves in the research and development of our JN0-1103 learning guide for many years. So we can guarantee that our JN0-1103 exam materials are the best reviewing material. Concentrated all our energies on the study JN0-1103 learning guide we never change the goal of helping candidates pass the exam. Our JN0-1103 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our JN0-1103 exam materials, and you won't be regret.

Why don't you begin to act? The first step is to pass JN0-1103 exam. Time will wait for no one. Only if you pass the exam can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional JN0-1103 Questions torrent provider, we are worth trusting; because we make great efforts, we do better. Here are some reasons to choose us.

>> JN0-1103 Certification Training <<

High Pass-Rate JN0-1103 Certification Training & Leader in Qualification Exams & Realistic Juniper Design - Associate (JNCIA-Design)

As we always want to do better in this career, our research center has formed a group of professional experts responsible for researching new technology of the JN0-1103 study materials. The technology of the JN0-1103 practice prep will be innovated every once in a while. As you can see, we never stop innovating new version of the JN0-1103 Exam Questions. We really need your strong support. We always adopt the kind and useful advices of our loyal customers who wrote to us and gave us their opinions on their study.

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Customer Network Design Requirements: This section of the exam measures skills of Network Design Engineers and covers the foundational aspects of network design. It includes understanding Juniper's life-cycle service approach, defining proposal boundaries, and considerations for both greenfield and brownfield deployments. The section also addresses top-down network design methodologies and capacity planning to ensure scalable and efficient network infrastructures.
Topic 2	<ul style="list-style-type: none"> • Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active • active and active • passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.
Topic 3	<ul style="list-style-type: none"> • Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.
Topic 4	<ul style="list-style-type: none"> • Securing the Network: This section of the exam measures the skills of Security Architects and covers essential security design principles. It encompasses general security considerations, strategies for securing data centers and campus WANs, and the implementation of zero-trust security models. Additionally, it delves into Secure Access Service Edge (SASE) frameworks to enhance network security posture.
Topic 5	<ul style="list-style-type: none"> • Data Center Network Design: This section of the exam measures skills of Data Center Network Engineers and covers considerations for general data center network design. Topics include data center design best practices, understanding traffic patterns, virtual chassis implementation, and environmental considerations. The section also delves into data center fabric architectures, benefits of IP fabric over traditional architectures, spine-and-leaf device placement, underlay and overlay design, routing protocol selection, and best practices for IP fabric scaling.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q71-Q76):

NEW QUESTION # 71

What is the third step of the Juniper recommended executive summary structure of an RFP?

- A. Relevant supporting information outlining why the customer should choose your plan.
- **B. Overview of your proposed solution.**
- C. Introduction of the customer's need or problem.
- D. Identification of business benefits.

Answer: B

NEW QUESTION # 72

You are consulting on the redesign for a large retail network. The customer has dozens of locations, all connected to a central data center.

Which two requirements would you expect from you customer? (Choose two.)

- **A. WAN aggregation using Internet-based VPN**
- B. distributed network management
- **C. resiliency to ensure continuous operation**
- D. very high throughput at every location

Answer: A,C

NEW QUESTION # 73

You want to provide employees with controlled access to the corporate network with company devices, ensure secure access for printers and cameras, and enable employees to use their devices on the corporate network.

Which two methods satisfy the requirements? (Choose two.)

- A. implementing MAC authentication for laptops
- B. implementing 802.1x authentication for printers and cameras
- C. implementing 802.1x authentication for laptops
- D. implementing MAC authentication for printers and cameras

Answer: C,D

Explanation:

802.1X authentication is ideal for laptops and company devices, providing strong, identity-based network access control. For devices like printers and cameras that typically do not support 802.1X, MAC authentication offers a fallback method to control access based on device identity.

NEW QUESTION # 74

You are designing a WAN implementation to securely connect two remote sites to the corporate office. A public Internet connection will be used for the connections.

Which statement is true in this situation?

- A. The service provider can isolate traffic in a private MPLS instance.
- B. The WAN edge devices must support MPLS.
- C. The connection should be secured using IPsec.
- D. The connections support Layer 2 traffic bridging

Answer: C

NEW QUESTION # 75

What are two phases in Juniper's lifecycle approach when designing a network? (Choose two.)

- A. buy
- B. build
- C. oversee
- D. plan

Answer: B,D

NEW QUESTION # 76
