

# Pass Guaranteed Fortinet FCSS\_NST\_SE-7.6 Marvelous New Exam Question

Fortinet NSE7\_OTS-6.4

Fortinet NSE 7 - OT Security 6.4

1

**Pass Guaranteed Valid NSE7\_OTS-6.4 - Exam Fortinet NSE 7 - OT Security 6.4 Prep**

If you still have questions with passing the exam, choose us, and we will help you pass the exam successfully. Our NSE7\_OTS-6.4 training materials contain the both the questions and answers. You can have a practice through different versions. If you prefer to practice on paper, then [NSE7\\_OTS-6.4 Pdf Version](#) will satisfy you. If you want to have a good command of the NSE7\_OTS-6.4 exam dumps, you can buy all three versions, which can assist you for practice.

Fortinet NSE7\_OTS-6.4 (Fortinet NSE 7 - OT Security 6.4) Certification Exam is designed for professionals in the field of operational technology (OT) security. Fortinet NSE 7 - OT Security 6.4 certification aims to validate the candidate's knowledge and skills in securing OT networks and devices. NSE7\_OTS-6.4 exam covers various topics, including OT security concepts, policies and procedures, risk assessment and management, and incident response.

Fortinet NSE7\_OTS-6.4 (Fortinet NSE 7 - OT Security 6.4) certification exam is designed to test the knowledge and skills of the cybersecurity professionals in securing operational technology (OT) networks. It is a comprehensive exam that covers various topics related to OT security, including network security, endpoint protection, access control, and incident response. Fortinet NSE 7 - OT Security 6.4 certification is ideal for individuals who want to specialize in OT security and enhance their knowledge and skills in this area.

Fortinet NSE7\_OTS-6.4 certification is a valuable credential for security professionals who want to demonstrate their expertise in Fortinet's OT security solutions. Fortinet NSE 7 - OT Security 6.4 certification can help individuals advance their careers by enhancing their knowledge and skills in OT security. It can also help organizations identify and hire qualified professionals who have demonstrated their proficiency in Fortinet's products and solutions.

About the oncoming FCSS\_NST\_SE-7.6 exam, every exam candidates are wishing to utilize all intellectual and technical skills to solve the obstacles ahead of them to go as well as it possibly could. So the pending exam causes a panic among the exam candidates. The FCSS\_NST\_SE-7.6 exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing FCSS\_NST\_SE-7.6 Study Materials. They know very well what candidates really need most when they prepare for the exam. They also understand the real exam situation very well. So they compiled FCSS\_NST\_SE-7.6 exam prepare that they hope to do their utmost to help candidates pass the exam and get what job they want.

## Fortinet FCSS\_NST\_SE-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>VPN: This section is aimed at IT Professionals and includes diagnosing and addressing issues with IPsec VPNs, specifically IKE version 1 and 2, to secure remote and site-to-site connections within the network infrastructure.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>System troubleshooting: This section of the exam measures the skills of Network Security Support Engineers and addresses diagnosing and correcting issues within Security Fabric setups, automation stitches, resource utilization, general connectivity, and different operation modes in FortiGate HA clusters. Candidates work with built-in tools to effectively find and resolve faults.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Routing: This section focuses on Network Engineers and involves tackling issues related to packet routing using static routes, as well as OSPF and BGP protocols to support enterprise network traffic flow.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Authentication: This section evaluates the abilities of System Administrators and requires troubleshooting both local and remote authentication methods, including resolving Fortinet Single Sign-On (FSSO) problems for secure network access.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Security profiles: This part measures skills of Security Operations Specialists and covers identifying and resolving problems linked to FortiGuard services, web filtering configurations, and intrusion prevention systems to maintain protection across network environments.</li> </ul>

## Exam FCSS\_NST\_SE-7.6 Questions & FCSS\_NST\_SE-7.6 Valid Exam Discount

FCSS\_NST\_SE-7.6 practice software creates an atmosphere just like a real Fortinet exam thus developing your confidence and leaving no space for any surprises that make you anxious on the day of the exam. Moreover, the software is developed by Free4Torrent in a way that is simple to use and helps you perform better at the FCSS - Network Security 7.6 Support Engineer exam. But in case you face any problem in accessing the Fortinet FCSS\_NST\_SE-7.6 exam questions while preparing for the FCSS - Network Security 7.6 Support Engineer exam, there is a product support team at Free4Torrent to help you with it. You get guaranteed money back – if despite proper preparation using the Fortinet FCSS\_NST\_SE-7.6 by Free4Torrent you are unable to pass the exam. Grab the opportunity to learn, pass the FCSS - Network Security 7.6 Support Engineer exam, and grow your career. By taking Fortinet certification you can even improve your potential earning power and build a better professional network.

## Fortinet FCSS - Network Security 7.6 Support Engineer Sample Questions (Q18-Q23):

### NEW QUESTION # 18

In which two states is a given session categorized as ephemeral? (Choose two.)

- A. A TCP session waiting for FIN ACK
- B. A UOP session with packets sent and received
- C. A UDP session with only one packet received
- D. A TCP session waiting for the SYN ACK

Answer: C,D

### NEW QUESTION # 19

Refer to the exhibit, which shows the output of get router info bgp summary.

```
get router info bgp summary
VRF 0 BGP router identifier 172.16.1.254, local AS number 65100
BGP table version is 3
2 BGP AS-PATH entries
0 BGP community entries

Neighbor    V    AS  MsgRcvd  MsgSent  TblVer  InQ  OutQ  Up/Down  State/PfxRcd
100.64.1.254 4    100    18        20        3     0     0 00:02:55      1
100.64.2.254 4    100     0         0        0     0     0 never        Active

Total number of neighbors 2
```

Which two statements are true? (Choose two.)

- A. The local FortiGate has received one prefix from BGP neighbor 100.64.1.254.
- B. The TCP connection with BGP neighbor 100.64.2.254 was successful.
- C. The local FortiGate has received 18 packets from a BGP neighbor.
- D. The local FortiGate is still calculating the prefixes received from BGP neighbor 100.64.2.264

**Answer: A,C**

Explanation:

The get router info bgp summary output lists BGP neighbor status:

Prefix Reception: The "State/PfxRcd" column shows the number of prefixes received from the neighbor- neighbor 100.64.1.254 has "1", confirming option A.

Received Message Count: Under "MsgRcvd", 18 packets have been received from neighbor 100.64.1.254.

This matches option C.

The second neighbor 100.64.2.254 is in "Active" state and has received/sent 0 packets, indicating that its TCP connection is NOT established, disproving option B.

There is no indication anywhere that the router is "still calculating" prefixes; "Active" just means no session is established, so option D is incorrect.

References:

FortiOS BGP Command Reference: BGP Neighbor States, PfxRcd, and Counters

## NEW QUESTION # 20

Which three common FortiGate-to-collector-agent connectivity issues can you identify using the FSSO real- time debug? (Choose three.)

- A. The group filters do not match.
- B. The connection was refused. There may be a mismatch of the TCP port.
- C. The SSL certificate used for FSSO over SSL has expired.
- D. FortiGate cannot reach the IP address of the collector agent.
- E. The pre-shared key does not match

**Answer: B,D,E**

Explanation:

The diagnose debug authd fssso server command is the primary tool for troubleshooting communication between the FortiGate and the FSSO Collector Agent. This debug output reveals the status of the connection and the reasons for failure. The three most common connectivity issues identified by this debug are:

\* FortiGate cannot reach the IP address of the collector agent (Option C): The debug will show connection timeouts or "host unreachable" errors if the Layer 3 connectivity is missing.

\* The connection was refused / Port mismatch (Option B): If the FortiGate can reach the IP but the Collector Agent is not listening on the specified port (default 8000), the debug will display "Connection refused." This often happens if the port configured on the FortiGate does not match the listening port on the agent.

\* The pre-shared key does not match (Option D): If the IP and Port are correct, the next step is authentication. If the password configured on the FortiGate does not match the one on the Collector Agent, the debug will explicitly show an "Authentication failed" or "password mismatch" error during the handshake.

Note on other options: Option A (SSL) is less common than basic connectivity/auth mismatches. Option E (Group filters) relates to user processing logic, which occurs after connectivity is established.

Reference:

FortiGate Security 7.6 Study Guide (FSSO Troubleshooting): "Troubleshooting FSSO... Check connectivity (IP/Port) and authentication (Password)."

## NEW QUESTION # 21

Refer to the exhibit, which shows the omitted output of a session table entry.

```
pos/(before,after) 0/(0,0), 0/(0,0)
misc=0 policy id=1 pol uuid idx=14720 confiauth info=0 ck'client_info=0 vd=0
serial=0002932f tos=ff/ff app_list=2000 app=34050 url cat=0
sdwan_mbr_seq=1 sdwan_service_id=1
rpd_b_link_id=80000000 ngfwid=n/a
npu_state=0x003c94 ips_offload
npu_info: flag=0x81/0x81, offload=8/8, ips_offload=1/1, epid=16/16, ipid=64/88, vlan=0x0000/0x0000
vlifid=64/88, vtag_in=0x0000/0x0000 in_npu=1/1, out_npu=1/1, fwd_en=0/0, qid=0/0
```

Which two statements are true? (Choose two.)

- A. The traffic has been tagged for VLAN 0000.
- **B. The session has been offloaded.**
- C. NP7 is handling offloading of this session.
- **D. The traffic matches Policy ID 1.**

**Answer: B,D**

Explanation:

In the provided session table output, the following details justify the answers:

Policy ID Match: The line policy\_id=1 directly confirms that this session was matched by Firewall Policy ID

1. According to Fortinet's session table documentation, the policy\_id field always references the policy that allowed this session, so this is a clear indicator.

Session Offloading: The presence of the strings npu\_state, ips\_offload, and notably the NPU info section such as offload=8/8, ips\_offload=1/1 shows that this session has been offloaded to the Network Processor Unit (NPU). Fortinet technical documentation states that "offload" values greater than zero in both directions (and an NPU info section) affirm that NPU hardware processing (fast path) is handling this traffic, thus the session is not being handled in software only.

Other options:

VLAN Tagging (vlan=0x0000/0x0000): This means no VLAN tag is assigned to this session.

NP7: The actual NPU model handling the session isn't exposed in this snippet-the offload parameters shown are generic and not specific to NP7 hardware, so it cannot be concluded from the session data.

References:

Fortinet Technical Tip: FortiGate Session Table and NPU Offloading

FortiOS Diagnostics Guide: Policy ID, Offload, and VLAN Session Table Fields

## NEW QUESTION # 22

Refer to the exhibit, which shows a partial output of a real-time LDAP debug.

```
# diagnose debug application fnbamd -1
# diagnose debug enable

fnbamd_fsm.c[1274] handle_req-Rcvd auth req 8781845 for jsmith in lab opt=27 prot=0
fnbamd_ldap.c[637] resolve_ldap_FCDN-Resolved address 10.10.181.10, result 10.10.181.10
fnbamd_ldap.c[232] start_search_dn-base:'DC=TAC,DC=ottawa,DC=fortinet,DC=com' filter:sAMAccountName=jsmith
fnbamd_ldap.c[1351] fnbamd_ldap_get_result-going to SEARCH state
fnbamd_fsm.c[1833] poll_ldap_servers-continue pending for req 8781845
fnbamd_ldap.c[266] get_all_dn-Found DN 1:CN=John Smith,CN=Users,DC=TAC,DC=ottawa,DC=fortinet,DC=com
```

What two conclusions can you draw from the output? (Choose two.)

- A. FortiOS performs a bind to the LDAP server using the user's credentials.
- **B. FortiOS is performing the second step (Search Request) in the LDAP authentication process.**
- C. FortiOS collects the user group information.
- **D. The user was found in the LDAP tree, whose root is TAC.ottawa.fortinet.com.**

**Answer: B,D**

## NEW QUESTION # 23

.....

Providing our customers with up to 1 year of free Fortinet FCSS\_NST\_SE-7.6 questions updates is also our offer. These Fortinet FCSS\_NST\_SE-7.6 free dumps updates will help you prepare according to the latest FCSS\_NST\_SE-7.6 test syllabus in case of changes. 24/7 customer support is available at Free4Torrent to assist users of the FCSS\_NST\_SE-7.6 Exam Questions through the journey.
