Choosing our AD0-E911 exam practice, you only need to spend 20-30 hours to prepare for the exam. Maybe you will ask whether such a short time can finish all the content, we want to tell you that you can rest assured, because our AD0-E911 Learning Materials are closely related to the exam outline and the questions of our AD0-E911 guide questions are related to the latest and basic knowledge. You will pass the AD0-E911 exam only with our AD0-E911 exam questions.

Adobe Workfront Project Manager Certified Professional Sample Questions (Q16-Q21):

NEW QUESTION # 16

A project manager compares the original schedule for a task to another set of dates that moved later after predecessors slipped and the assignee changed a completion commitment.

What do these later, system-calculated dates represent?

- A. They are Milestone Path Dates that show when milestone tasks are expected to occur.
- **B. They are Projected Dates that show the current forecast for task start and finish.**
- C. They are Planned Dates that show the originally scheduled task dates.

Answer: B

Explanation:

In Adobe Workfront, the later system-calculated dates described in the question are Projected Dates. Adobe documentation explains that when a task is first created, Planned, Projected, and Estimated Dates often match. However, Projected Dates can change as work progresses or when schedule conditions change. Adobe specifically states that predecessor delays can cause projected dates for dependent tasks to move, and that a task assignee's Commit Date can also affect the projected completion date. This matches the scenario where predecessors slipped and the assignee changed a completion commitment. Planned Dates represent the schedule established in the project plan, such as planned start and planned completion, and they do not automatically become the later forecast just because delays occur. Milestone Path Dates relate to milestone tracking, not the general forecasted start and finish of a task. Therefore, the dates that reflect Workfront's current schedule forecast are Projected Dates, making the correct answer B.

NEW QUESTION # 17

A task owner has Time Off logged in Workfront for all of next week. The owner has a task that is planned to start and is due while she is out.

What action should the task owner take?

- A. Work on the task and complete it in the given duration.
- **B. Update the Commit Date on the task.**
- C. Set the task condition to At Risk.

Answer: B

Explanation:

In Workfront, when a task owner is unavailable due to time off, they can update the Commit Date to reflect when they are available to work on the task. This prevents delays and ensures the task is completed within a revised timeline. The Commit Date feature is designed to accommodate personal schedules and ensure tasks are accurately tracked without putting the task "At Risk" unnecessarily.

NEW QUESTION # 18

A task was originally planned with a 10-day duration and 40 planned hours. The client needs it done in 3 days.

What task setting needs to change to allow 4 users to complete this in less than 3 days?

- A. Change the Task Constraint to Fixed Dates
- **B. Change the Task Duration Type to Calculated Work**

- C. Change the Task Duration Type to Effort Driven
- D. Change the Task Constraint to As Soon As Possible

Answer: B

Explanation:

When reducing the task duration and distributing the work among multiple users, changing the Task Duration Type to "Calculated Work" allows Workfront to automatically adjust the duration based on the number of assignees (in this case, 4 users). This will enable the task to be completed within the new shorter timeframe without adjusting the total planned hours.

NEW QUESTION # 19

A stakeholder has identified a potential scheduling conflict on a current project. This conflict may affect the completion date by pushing it out two weeks. The stakeholder wants to document this timeline risk.

Which action should the stakeholder take to log the risk?

- A. Log a risk as part of the project business case and identify it as a "schedule" risk.
- B. Log an issue on the project and explain that the completion date is at risk.
- C. Create a task in the project and set the Planned Completion Date for 2 weeks.

Answer: A

Explanation:

In Adobe Workfront, risks associated with a project should be logged as part of the project business case. The "Risk" section within the business case allows stakeholders to document any potential threats to the project timeline, scope, or resources. Identifying this risk as a "schedule" risk helps communicate the potential delay to the project stakeholders and allows it to be tracked and mitigated effectively.

NEW QUESTION # 20

A project manager is looking to create a task that must take place from September 10th through September 17th of this year. Which action must be taken?

- A. Set a Predecessor for the task.
- B. Set the Task Constraint to Fixed Dates.
- C. Set the Duration of One week.

Answer: B

Explanation:

In Adobe Workfront, the correct action is to set the task constraint to Fixed Dates. Adobe's documentation explains that task constraints control when tasks can start or finish in a project plan. Depending on the constraint selected, a project manager may need to specify a planned start date, a planned completion date, or both dates. The Fixed Dates constraint is specifically used when a task must occur between exact dates, because Workfront requires both the Planned Start Date and Planned Completion Date when this constraint is selected. Adobe also states that when Fixed Dates is used, the task duration is calculated from the difference between those two planned dates. A predecessor only controls dependency order and does not guarantee September 10 through September 17. Setting the duration to one week defines only length, not the exact calendar dates. Therefore, to force the task to take place from September 10 through September 17, the correct answer is A. Set the Task Constraint to Fixed Dates.

NEW QUESTION # 21

.....

You may previously think preparing for the AD0-E911 practice exam will be full of agony; actually, you can abandon the time-consuming thought from now on. Our AD0-E911 exam question can be obtained within 5 minutes after your purchase and full of high quality points for your references, and also remedy your previous faults and wrong thinking of knowledge needed in this exam. As a result, many customers get manifest improvement and lighten their load by using our AD0-E911 Latest Dumps. You won't regret your decision of choosing us. In contrast, they will inspire your potential. Besides, when conceive and design our AD0-E911 exam questions at the first beginning, we target the aim customers like you, a group of exam candidates preparing for the exam.
