- **A. Using visualization to display information**
- B. Using email to document discussions

Answer: A

NEW QUESTION # 62

Which technique is used in the 'Issues' practice?

- A. Objectives and key results
- **B. Trading/swapping**
- C. Refactoring
- D. Delegation poker

Answer: B

Explanation:

Trading/swapping is a technique used within the issues practice to manage and resolve conflicts or competing priorities by negotiating trade-offs. For example, scope items, resources, or deadlines may be traded or swapped between stakeholders to reach agreements that keep the project on track.

This collaborative negotiation supports flexible, pragmatic issue resolution, aligning with agile values of collaboration and customer focus. It enables project teams to balance competing demands while maintaining progress and business justification.

Objectives and key results (B) are goal-setting tools, refactoring (C) is a technical practice for code improvement, and delegation poker (D) is about decision-making authority - none specifically target issue resolution.

Trading/swapping aligns with PRINCE2's controlled management of issues and agile's collaborative problem-solving approach.

NEW QUESTION # 63

- A. A Kanban board
- **B. A Glad! Sad! Mad! board**

NEW QUESTION # 64

Which of the following is a benefit of 'being and doing agile'?

- A. Focusing on completing tasks
- **B. Increasing user satisfaction**
- C. Following processes
- D. Using agile techniques

Answer: B

Explanation:

A key benefit of being and doing agile is increasing user satisfaction by delivering value early and continuously, adapting to feedback, and ensuring the product meets real user needs. Agile approaches emphasize collaboration with customers and iterative delivery, which enhances satisfaction compared to traditional, rigid methods.

While following processes (A) and using agile techniques (B) are means to an end, they do not directly guarantee benefits. Focusing solely on tasks (D) risks losing sight of value delivery.

User satisfaction is a central measure of agile success and reflects the effective application of agile principles.
