An interface is configured on a router for OSPF but the command "show router ospf neighbor" does not show any neighbors. Which of the following is NOT a possible cause?

- A. The interface facing the neighbor is down.
- B. The interface is included in a different area than the neighbor router.
- **C. An OSPF database description packet has not been received from the neighbor.**
- D. The router has not received a valid OSPF Hello packet from its neighbor.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF Neighbor Formation):

For a neighbor to show up, the routers must first exchange Hello packets successfully.

Area ID mismatch (C), interface down (B), or no Hello received (D) are all valid reasons neighbors won't appear.

However, OSPF Database Description (DBD) packets are exchanged only after neighbor adjacency is established. If no neighbor is

Thus, correct answer: A.

An OSPF adjacency is stuck in the exstart state. What is the most likely cause?

- Answer: C**
