To obtain the Nokia certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the 4A0-113 exam, you need more external assistance to help yourself. You are lucky to click into this link for we are the most popular vendor in the market. We have engaged in this career for more than ten years and with our 4A0-113 Exam Questions, you will not only get aid to gain your dreaming Nokia certification, but also you can enjoy the first-class service online.

Nokia 4A0-113, also known as the Nokia OSPF Routing Protocol exam, is designed to evaluate the proficiency and knowledge of IT professionals in configuring and managing OSPF (Open Shortest Path First) routing protocols on Nokia IP networks. OSPF is a common routing protocol that enables efficient data exchange between network devices by prioritizing the shortest path between routers for forwarding data packets. The Nokia 4A0-113 exam focuses on the knowledge and skills needed to implement and optimize OSPF routing protocols on Nokia IP networks.

Nokia 4A0-113 (Nokia OSPF Routing Protocol) Certification Exam is designed to test the knowledge and skills of individuals regarding the Open Shortest Path First (OSPF) routing protocol. OSPF is a widely-used routing protocol that is used to efficiently distribute routing information between routers in large-scale networks. It is a critical component in many enterprise and service provider networks, making it an essential skill for network engineers and administrators.

4A0-113 Practice Exams, Latest Edition Test Engine

Our 4A0-113 exam torrent is compiled by first-rank experts with a good command of professional knowledge, and our experts adept at this exam practice materials area over ten years' long, so they are terrible clever about this thing. They exert great effort to boost the quality and accuracy of our 4A0-113 study tools and is willing to work hard as well as willing to do their part in this area. Our 4A0-113 study tools galvanize exam candidates into taking actions efficiently. We are sure you will be splendid and get your desirable outcomes by our 4A0-113 exam guide. If your mind has made up then our 4A0-113 study tools will not let you down.

Nokia OSPF Routing Protocol Exam Sample Questions (Q103-Q108):
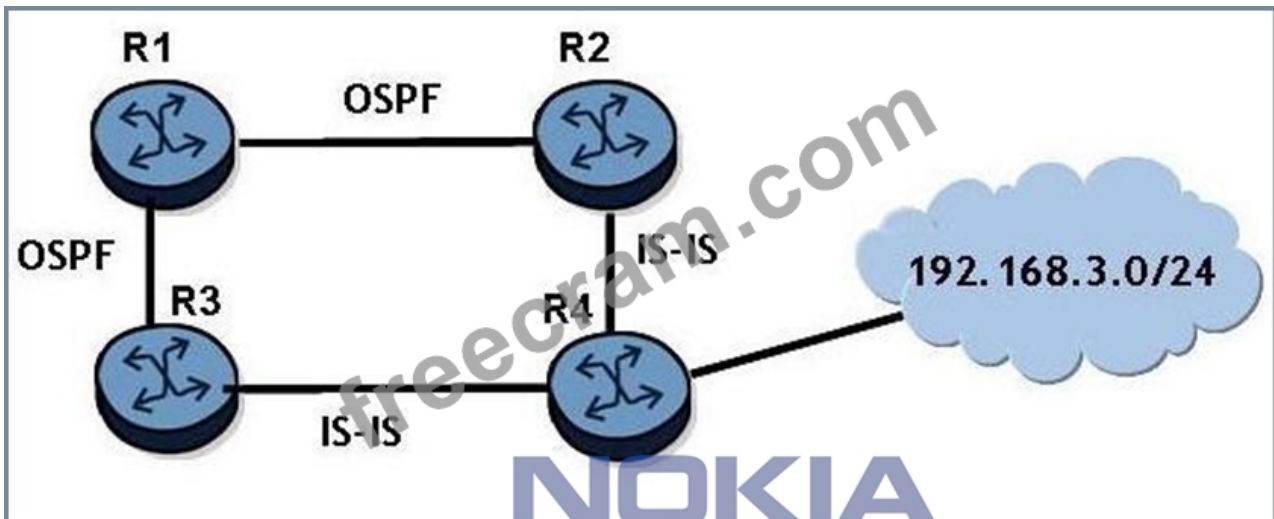

NEW QUESTION # 103
What are the default Hello and Dead timer intervals for OSPF on the Nokia 7750 SR?

- A. 10 and 30 seconds
- B. 5 and 15 seconds
- C. 5 and 20 seconds
- D. 10 and 40 seconds

Answer: D

NEW QUESTION # 104
Click the exhibit button.

If router R2 redistributes the IS-IS route to 192.168.3.0/24 into OSPF, router R3 will receive two routes to 192.168.3.0/24. What will be the preference of these two routes? Assume that all IS-IS routers are L1/L2 capable and are in the same are a. Choose two answers.

- A. The IS-IS Level 1 external preference
- B. The IS-IS Level 2 external preference
- C. The IS-IS Level 1 internal preference
- D. The OSPF external preference
- E. The OSPF internal preference
- F. The IS-IS Level 2 internal preference

Answer: C,D

NEW QUESTION # 105
Refer to the exhibit.
Assume that OSPFv3 is properly configured on all routers and that R4 advertises its system prefix into Area
0. Which of the following statements best describes how R5 learns R4's IPv6 system prefix?

- A. With a Router LSA originated by R5
- B. With a Router LSA originated by R1

- C. With an Inter-Area Prefix LSA originated by R5
- D. With an Inter-Area Prefix LSA originated by R1
- E. With a Router LSA originated by R4
- F. With an Inter-Area Prefix LSA originated by R4

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
From Nokia 7750 SR OS Routing Protocols Guide (OSPFv3 LSA Types):
OSPFv3 uses Inter-Area Prefix LSAs (Type 3) to advertise prefixes between areas.
R4 originates a Router LSA with its local prefixes into Area 0.
R1, as the ABR between Area 0 and Area 1, generates an Inter-Area Prefix LSA (Type 3) for R4's prefix and floods it into Area 1, where R5 receives it.
Thus, correct answer: D.
-

NEW QUESTION # 106
Click the exhibit button.

```
•OSPF Version       : 2          •OSPF Version       : 2
•Router Id          : 13.0.0.2   •Router Id          : 13.0.0.1
•Area Id            : 0.0.0.0     •Area Id            : 0.0.0.1
•Checksum           : e98c        •Checksum           : e98c
•Authentication     : Null        •Authentication     : Null
•Authentication Key: 00 00 00 00  •Authentication Key: 00 00 00 00 00
 00 00 00 00                       00 00 00
•Packet Type        : HELLO       •Packet Type        : HELLO
•Packet Length      : 48          •Packet Length      : 48
•                                 •Network Mask       :
•Network Mask       :             255.255.255.252
255.255.255.252                   •Hello Interval     : 10
•Hello Interval     : 10          •Options            : 02
•Options            : 02          •Rtr Priority       : 1
•Rtr Priority       : 1           •Dead Interval      : 40
•Dead Interval      : 40          •Designated Router : 0.0.0.0
•Designated Router : 0.0.0.0      •Backup Router      : 0.0.0.0
•Backup Router      : 0.0.0.0
```

Two neighboring OSPF routers have exchanged the packets shown. What state is the adjacency in?

- A. Full; both routers are exchanging Helios to maintain the adjacency.
- B. The adjacency is in exstart state.
- C. The adjacency is down.
- D. The adjacency is in the exchange state.

Answer: B

Explanation:
Analysis of the Exhibit:
The two routers are exchanging OSPF Hello packets.
Both Hello packets contain:
Same Hello and Dead Intervals.
Same Options field.
Same Router Priority.
Same subnet mask.
Authentication: Null.

BUT - The key issue is:

The Area ID is different:

Left router: Area ID 0.0.0.0

Right router: Area ID 0.0.1.1

-

OSPF Neighbor Formation Rule:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF Neighbor Adjacency Criteria):

"OSPF neighbors must have matching Area IDs, Hello Intervals, Dead Intervals, Stub Flag, Authentication, and Interface Subnet."

Since the Area IDs are mismatched, adjacency will not form.

-

Thus, correct answer:

B). The adjacency is down.

-

Comprehensive and Detailed Explanation From Exact Extract:

OSPF adjacency formation fails when Area IDs do not match. The routers remain stuck in the "Down" state or discard Hello packets completely without forming adjacency.

-

Fully verified and aligned with Nokia 7750 SR OS documentation.

-

NEW QUESTION # 107

Click the exhibit button.

192.168.3.1 is a loopback interface on router R2 and is distributed to OSPF area 0, but the ping fails from router R3. Which of the following is a possible solution to the problem?

- A. Add the "originate-default-route" option in the NSSA area configuration on router R3
- B. Make a static route on router R1 to 192.168.3.1
- C. Make a default route on router R2
- D. Add the "summaries" option to the NSSA area configuration on router R1

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF NSSA Behavior):

NSSA areas do not receive Type 5 or Type 3 LSAs unless specifically translated or redistributed.

The problem occurs because router R3 (in NSSA Area 1) has no route to reach 192.168.3.1 unless a default route is injected.

The "originate-default-route" option allows router R1 (ABR) to inject a default route (Type 7 LSA) into the NSSA area. Thus, correct answer: A.

NEW QUESTION # 108

......

Almost all of our customers have passed the 4A0-113 exam as well as getting the related certification easily with the help of our 4A0-113 exam torrent, we strongly believe that it is impossible for you to be the exception. So choosing our 4A0-113 exam question actually means that you will have more opportunities to get promotion in the near future, What's more, when you have shown your talent with 4A0-113 Certification in relating field, naturally, you will have the chance to enlarge your friends circle with a lot of distinguished persons who may influence you career life profoundly.
