SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Financial Accounting Sample Questions (Q53-Q58):

NEW QUESTION # 53

What can you achieve with the legacy data transfer in via transaction AS91?

- A. Posting of take over values
- B. Posting the summary write off in G/L
- C. Setting the company code status for legacy data transfer
- D. Creation of master data

Answer: D

NEW QUESTION # 54

What are some features of SAP Business Technology Platform?

Note: There are 2 correct answers to this question.

- A. It helps customers to collaborate to build flexible value chains.
- **B. It provides data management and analytics.**
- **C. It supports application development and integration.**
- D. It supports customers in understanding their stakeholder's needs.

Answer: B,C

NEW QUESTION # 55

Your system uses parallel currencies.

What is the posting indicator of the depreciation area for the parallel currency?

- **A. Posts to G/L in real time**
- B. Posts to G/L periodically
- C. Posts APC real time and depreciation periodically
- D. Does not post to G/L

Answer: A

Explanation:

Comprehensive Detailed Explanation with all SAP S/4HANA Cloud References In SAP S/4HANA, when using parallel currencies, the system ensures that all financial transactions, including depreciation postings, are updated in real time in the General Ledger (G/L). This is made possible by the Universal Journal (ACDOCA), which integrates Asset Accounting (FI-AA) and Financial Accounting (FI-GL). Let's analyze each option to determine the correct answer.

Explanation of Each Option:

B. Posts to G/L in real time

* Correct : In SAP S/4HANA, the depreciation area for parallel currencies posts to the G/L in real time.

This is because the Universal Journal ensures that all asset-related postings, including those in parallel currencies, are immediately reflected in the General Ledger. There is no delay or need for periodic updates.

* Reference : According to SAP documentation, the Universal Journal integrates FI-AA and FI-GL, ensuring that all postings, including those for parallel currencies, occur in real time.

A. Does not post to G/L

* Incorrect : This option suggests that the depreciation area for parallel currencies does not update the G/L. However, in SAP S/4HANA, all depreciation areas, including those for parallel currencies, must post to the G/L to ensure accurate financial reporting.

* Reference : The Universal Journal mandates real-time posting for all financial transactions, eliminating the possibility of non-posting scenarios.

C. Posts APC real time and depreciation periodically

* Incorrect : This option describes a scenario from older SAP systems (e.g., SAP ECC) where periodic batch jobs were required to update depreciation postings. However, in SAP S/4HANA, both Acquisition and Production Costs (APC) and depreciation are posted to the G/L in real time due to the Universal Journal.

* Reference : SAP S/4HANA's real-time architecture ensures that all asset-related postings, including APC and depreciation, are updated instantly.

D. Posts to G/L periodically

* Incorrect : This option assumes that periodic batch processing is required to update the G/L for parallel currency depreciation. In SAP S/4HANA, all postings, including those for parallel currencies, occur in real time. Periodic processing is no longer necessary due to the Universal Journal.

* Reference : The Universal Journal eliminates the need for periodic batch jobs by ensuring real-time integration between FI-AA and FI-GL.

Key References to SAP S/4HANA Documentation:

* SAP S/4HANA Finance for Asset Accounting (FI-AA) : Explains how parallel currencies are handled in depreciation areas and their integration with the Universal Journal.

* SAP Help Portal - Universal Journal (ACDOCA) : Provides detailed guidance on how the Universal Journal ensures real-time updates across FI-AA and FI-GL.

* Depreciation Processes in SAP S/4HANA : Highlights the real-time nature of depreciation postings, including those for parallel currencies.

* Integration of FI-AA and FI-GL : Describes how the Universal Journal eliminates the need for periodic batch processing in SAP

S/4HANA.

NEW QUESTION # 56

You want to implement purchase order accruals in SAP S/4HANA.

Which of the following use cases are relevant? Note: There are 2 correct answers to this question.

- A. Purchase of services
- B. Purchase of consumable materials
- C. Purchase of fixed assets (using direct capitalization method)
- D. Purchase of raw materials for inventory

Answer: A,B

Explanation:

Comprehensive Detailed Explanation with all SAP S/4HANA Cloud References Purchase order accruals in SAP S/4HANA are used to recognize expenses or liabilities for goods or services that have been ordered but not yet received or invoiced. This ensures accurate financial reporting by aligning expenses with the period in which they are incurred, even if the invoice has not yet been posted. Let's analyze each option to determine the relevant use cases.

Explanation of Each Option:

C. Purchase of services

* Correct : Accruals are highly relevant for the purchase of services, especially when services are rendered over a period of time (e.g., maintenance contracts, consulting services). If the service is delivered but not yet invoiced, an accrual is necessary to recognize the expense and liability in the correct accounting period.

* Reference : In SAP S/4HANA, purchase order accruals for services can be managed using Service Entry Sheets (SES) and subsequent accrual postings. This ensures compliance with accrual accounting principles.

D. Purchase of consumable materials

* Correct : Consumable materials (e.g., office supplies, spare parts) are typically expensed immediately upon receipt. If these materials are ordered but not yet received or invoiced by the end of the period, accruals are required to recognize the expense and liability.

* Reference : SAP S/4HANA supports accruals for consumable materials through the purchase order process, ensuring that expenses are matched with the period in which they are incurred.

A. Purchase of raw materials for inventory

* Incorrect : Raw materials purchased for inventory are capitalized as assets (inventory) rather than expensed immediately. Since inventory purchases do not directly impact the profit and loss statement until the materials are consumed, accruals are not typically relevant for this use case.

* Reference : Inventory purchases are recorded in the material ledger and are not subject to accruals unless specific business processes require it (e.g., consignment stock).

B. Purchase of fixed assets (using direct capitalization method)

* Incorrect : When purchasing fixed assets using the direct capitalization method, the asset is capitalized directly upon receipt or invoice posting. Accruals are not relevant because the transaction does not involve immediate expense recognition.

* Reference : Fixed asset purchases are managed through Asset Accounting (FI-AA), and accruals are not part of the standard process for direct capitalization.

Key References to SAP S/4HANA Documentation:

* SAP S/4HANA Procurement Processes : Explains how purchase order accruals are handled for different types of purchases, including services and consumable materials.

* SAP Help Portal - Accrual Engine : Provides detailed guidance on configuring and using accruals in SAP S/4HANA, including use cases for services and consumables.

* Service Entry Sheets (SES) : Describes how services are managed and accrued in SAP S/4HANA.

* Material Management (MM) Integration with Financial Accounting (FI) : Highlights the treatment of inventory and consumable materials in procurement processes.

NEW QUESTION # 57

You post a vendor invoice for asset acquisition without reference to a purchase order. Which accounting documents are generated?

- A. Separate documents for each and every accounting principle
- B. One document per accounting principle & one document for all accounting principles
- C. One document per accounting principle
- D. One document for all accounting principles

Answer: D

NEW QUESTION # 58

.....
