If you have doubts or problems about our AD0-E725 Exam Torrent, please contact our online customer service or contact us by mails and we will reply and solve your problem as quickly as we can. We won't waste your money and your time and if you fail in the exam we will refund you in full immediately at one time. We provide the best AD0-E725 questions torrent to you and don't hope to let you feel disappointed.

Adobe Commerce Developer Expert Sample Questions (Q43-Q48):

NEW QUESTION # 43

A Developer is integrating a custom third-party gift card system into the Adobe Commerce checkout. During the checkout process, a customer enters a store-bought gift card for payment, and depending on external API checks, the gift card is verified and allowed to be used on the order.

Which approach should be used for the internal processing of such functionality?

- A. Directly subtract the gift card amount from the order, keeping no history of the discount transaction.
- B. Create an Adobe Commerce gift card account and manage the account using the gift card repositories.
- C. Create a unique voucher code for each gift card usage request which grants a discount on the order's total.

Answer: C

NEW QUESTION # 44

An Adobe Commerce Developer is approached to disable several cron jobs from a customization completed by a third-party agency. The cron jobs will eventually be enabled again once a code review of the cron jobs is complete.

Using best principles, how should the Developer action this request?

- A. Add the schedule="* * * * *" to the <job> node in the crontab.xml file.
- B. Edit the schedule with a date which will never happen in the crontab.xml file.
- C. Add the disabled="true" to the <job> node in the crontab.xml file.

Answer: C

Explanation:

Adobe Commerce provides a configuration flag disabled="true" for cron job definitions in crontab.xml.

When set, it prevents the job from being executed, while still keeping the job definition in place. This allows developers to temporarily disable cron jobs without deleting or altering their schedules - a best practice in scenarios where the jobs will later be re-enabled.

* Option A (schedule="* * * * *") would instead run the cron job every minute, which is the opposite of disabling it.

* Option B (setting an impossible date) is a hack and not recommended, as it introduces fragile configuration that can confuse future maintainers.

* Option C is the official and proper way to disable a cron job in Adobe Commerce.

Official Documentation Extracts:

* "To disable a job, add the attribute disabled="true" to the <job> node in crontab.xml."- Adobe Commerce DevDocs: Configure cron jobs

* "You can disable a cron job without removing its definition by setting disabled="true". This is useful for temporary maintenance or debugging."- Adobe Commerce PHP Developer Guide: Cron configuration

NEW QUESTION # 45

A client is setting up an Adobe Commerce B2B store and wants to start offering a Payment on Account option for their customers when placing orders.

How should the Developer achieve this?

- A. Install and activate the native Adobe Commerce module which activates payment.
- B. Repurpose the native Cash on Delivery method.
- C. Create and implement a new Payment Method to provide credit accounts to customers.

Answer: A

Explanation:

Adobe Commerce B2B includes a native "Payment on Account" module, which is part of the B2B suite. This module allows customers with company accounts to place orders on account (credit).

A (repurpose COD) is a hack and not recommended.

C (create new payment method) is unnecessary since Adobe Commerce already includes this B2B feature.

B is correct: simply enable the native B2B Payment on Account module.

Reference:

Adobe Commerce B2B DevDocs - Payment on Account

NEW QUESTION # 46

A Developer discovers that inline scripts are no longer working. This issue occurred after upgrading to the latest version of Adobe Commerce. When checking the console, the errors indicate that the scripts are not allowed to execute. The following is an example script:

```
<div id="action-div" onclick="someComponent('title')>Action</div>
```

How should the Developer adapt the script to run properly according to security practices?

- A. `<?php echo $secureRenderer->renderEventListenerAsTag('onclick', 'someComponent(\'title\')', '#action-div'); ?>`
- B. `<?php echo $block->renderAllowedElement('<div id="action-div" onclick="someComponent(\'title\')">Action</div>'); ?>`
- C. `<?php echo $escaper->renderSecureTag('<div id="action-div" onclick="someComponent(\'title\')">Action</div>'); ?>`

Answer: A

NEW QUESTION # 47

A Developer is notified that custom API results are not cached, which is causing additional delays. What are two potential causes for this behavior? (Choose two.)

- A. The request is using HTTP GET.
- B. The request is using HTTP POST.
- C. The request is using HTTP PUT.
- D. The request is using HTTP HEAD.

Answer: B,C

NEW QUESTION # 48

.....

The pass rate is 98.85% for AD0-E725 training materials. If you choose us, we can ensure you pass the exam just one time. We are pass guarantee and money back guarantee. If you fail to pass the exam, we will refund your money to your payment account. Moreover, AD0-E725 exam dumps are high quality, because we have experienced experts to compile them.
