Palo Alto Networks Network Security Professional Free Valid Torrent & NetSec-Pro Actual Practice Pdf & Palo Alto Networks Network Security Professional Exam Training Pdf

If you unluckily fail to pass your exam, don't worry, because we have created a mechanism for economical compensation. You just need to give us your test documents and transcript, and then our Palo Alto Networks Network Security Professional prep torrent will immediately provide you with a full refund, you will not lose money. More importantly, if you decide to buy our NetSec-Pro Exam Torrent, we are willing to give you a discount, you will spend less money and time on preparing for your exam.

Palo Alto Networks Network Security Professional Sample Questions (Q61-Q66):

NEW QUESTION # 61

A network administrator obtains Palo Alto Networks Advanced Threat Prevention and Advanced DNS Security subscriptions for edge NGFWs and is setting up security profiles. Which step should be included in the initial configuration of the Advanced DNS Security service?

- A. Enable Advanced Threat Prevention with default settings and only focus on high-risk traffic.
- B. Configure DNS Security signature policy settings to sinkhole malicious DNS queries.
- C. Create overrides for all company owned FQDNs.

- D. Create a decryption policy rule to decrypt DNS-over-TLS / port 853 traffic.

Answer: B

Explanation:

Advanced DNS Security uses a signature policy to sinkhole malicious DNS queries and prevent them from resolving.

"The DNS Security service integrates with Anti-Spyware profiles, and you must configure signature policy settings to sinkhole malicious queries. This proactively stops traffic to known malicious domains." (Source: Configure DNS Security) Sinkholing ensures that DNS queries to malicious FQDNs are redirected to a safe IP, preventing compromise.

NEW QUESTION # 62

Which firewall attribute can an engineer use to simplify rule creation and automatically adapt to changes in server roles or security posture based on log events?

- A. Dynamic Address Groups
- B. Address objects
- C. Predefined IP addresses
- D. Dynamic User Groups

Answer: A

Explanation:

Dynamic Address Groups enable the firewall to automatically adjust security policies based on tags assigned dynamically (via log events, API, etc.). This eliminates the need for manual updates to policies when server roles or IPs change.

"Dynamic Address Groups allow you to create policies that automatically adapt to changes in the environment. These groups are populated dynamically based on tags, enabling automated security policy updates without manual intervention." (Source: Dynamic Address Groups)

NEW QUESTION # 63

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. Custom
- B. SNMP
- C. PDF summary
- D. CSV export

Answer: A,C

Explanation:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs. Custom Reports

"Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility.

They are generated within Panorama and can include data on newly categorized AI URL types." (Source: Panorama Reports) PDF Summaries

"You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review." (Source: Export Reports as PDF) Together, these options provide a consistent, standardized method to push insights about AI-based URL categories to branch devices.

NEW QUESTION # 64

What is a necessary step for creation of a custom Prisma Access report on Strata Cloud Manager (SCM)?

- A. Configure a dashboard.
- B. Open a support ticket.
- C. Generate a PDF summary report.
- D. Set up Cloud Identity Engine.

Answer: A

Explanation:

To create custom Prisma Access reports within SCM, you first configure a dashboard that aggregates the relevant logs and analytics. This allows you to define the data points you want to include.

"Dashboards in SCM can be customized to include Prisma Access data sources, enabling you to create and generate reports that meet specific business and security requirements." (Source: SCM Dashboards and Reporting) Once configured, you can export the dashboard as a custom report.

"Use the dashboard's data visualization to create custom reports for Prisma Access, which can be exported as PDFs for distribution." (Source: SCM Report Customization)

NEW QUESTION # 65

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- A. Prisma Cloud dashboard
- B. Service connection firewall
- C. Strata Logging Service
- D. Strata Cloud Manager (SCM)

Answer: C,D

Explanation:

Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service. Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.

"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

NEW QUESTION # 66

.....

One of the major features provided by Palo Alto Networks is that it will provide you with free Palo Alto Networks NetSec-Pro actual questions updates for 365 days after the purchase of our product. If you work hard with our Palo Alto Networks NetSec-Pro Exam Practice material, nothing can stop you from cracking the test on the first endeavor.
