In fact, a number of qualifying exams and qualifications will improve your confidence and sense of accomplishment to some extent, so our M2 learning materials can be your new target. When we get into the job, our M2 learning materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our M2 Learning Materials can help you improve your ability to work in the shortest amount of time, thereby surpassing other colleagues in your company, for more promotion opportunities and space for development.

International Code Council Commercial Mechanical Inspector Sample Questions (Q42-Q47):

NEW QUESTION # 42

Why are two or more sets of construction documents, engineering calculations, diagrams, and other data required to be submitted with each application for a permit?

- A. All sets are to be retained by the code official in order to have a spare set of construction documents for use by any subcontractors.
- B. One set will be retained by the code official, and the other will be returned to the applicant and kept on the job site for reference while construction is in progress.
- C. All sets of documents are to be kept by the code official, and at least one set will serve as a backup set of documents in case the other is lost or misplaced.
- D. To ensure that the project is completed in a timely manner.

Answer: B

Explanation:

The ICC administrative provisions require construction documents to be submitted in two or more sets with the permit application. After approval, one set is retained by the code official and one set is returned to the applicant to be kept on the job site during construction. That is exactly the condition described in Option D .

The code does not state that all sets are retained by the code official or that the purpose is to provide subcontractor copies or backup copies.

NEW QUESTION # 43

An 8-inch Type B venting system with a listed vent cap must terminate a minimum of _____ feet above the flat roof through which it passes.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

For a Type B gas vent with a listed vent cap terminating through a flat roof , the minimum required termination height is 1 foot above the roof. That makes Option A correct. This is consistent with gas vent termination tables used with listed Type B vent systems and the code framework for Type B vent terminations.

NEW QUESTION # 44

The minimum dimension for rectangular air ducts used to supply combustion air for natural draft systems is _____ inches.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

The IMC combustion-air provisions require openings used for combustion air to have a minimum cross-sectional dimension of 3 inches . Where ducts are used, they must be of the same cross-sectional area as the openings to which they connect. That makes 3 inches the correct answer, so Option B is correct.

NEW QUESTION # 45

Floor furnaces shall not be closer than _____ inches to the ground.

- A. [option text not fully visible in the material you sent]
- B. [option text not fully visible in the material you sent]
- C. 0
- D. [option text not fully visible in the material you sent]

Answer: D

Explanation:

The ICC mechanical code requires the lowest portion of a floor furnace to have not less than 6 inches (152 mm) clearance from grade level . Therefore, the correct choice is the option corresponding to 6 inches , which is C based on your answer set.

NEW QUESTION # 46

To test for tightness, a consumer's gas piping should never be filled with:

- A. oxygen.
- B. air.
- C. dry air.
- D. inert gas.

Answer: A

Explanation:

The IFGC section on test medium states that the test medium shall be air, nitrogen, carbon dioxide or an inert gas , and specifically states that oxygen shall not be used as a test medium . That makes C the correct answer.

NEW QUESTION # 47

.....

Even the fierce competition cannot stop demanding needs from exam candidates. To get more specific information about our M2 learning quiz, we are here to satisfy your wish with following details. So you can get detailed information with traits and information about our M2 Real Exam requested on the website.
