NEW QUESTION # 248
How many prefixes can be announced from a customer to AWS over an AWS Direct Connect Private Virtual Interface (VIF)?
Response:

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 249
A company is establishing connectivity between its on-premises site and an existing VPC on AWS to meet a new security requirement. According to the new requirement, all public DNS queries must use an on-premises DNS security solution. The company's security team has allowed an exception for the AWS service endpoints because the company is using VPC endpoints to access AWS services.
Which combination of steps should a network engineer take to configure the architecture to meet these requirements? (Choose three.)

- A. Create an Amazon Route 53 Resolver outbound endpoint. Associate this endpoint with the VPC.
- B. Create an Amazon Route 53 Resolver inbound endpoint. Associate this endpoint with the VPC.
- C. Create a system rule for the domain name amazonaws.com.
- D. Create a forwarding rule for the domain name "." (dot) with a target IP address of the on-premises DNS security solution.
- E. Create a system rule for the domain name "." (dot) with a target IP address of the on-premises DNS security solution.
- F. Create a new DHCP options set that provides the IP address of the on-premises DNS security solution. Update the VPC to use this new DHCP options set.

Answer: A,C,D

Explanation:
Creating this system rule improves performance, reduces the number of queries that are forwarded to your network and is recommended when you create a conditional forwarding rule for
"." (dot) or "com".

NEW QUESTION # 250
A company is migrating applications from a data center to AWS. Many of the applications will need to exchange data with the company's on-premises mainframe.
The company needs to achieve 4 Gbps transfer speeds to meet peak traffic demands. A network engineer must design a highly available solution that maximizes resiliency. The solution must be able to withstand the loss of circuits or routers.
Which solution will meet these requirements?

- A. Order four 10 Gbps AWS Direct Connect connections that are evenly spread over two locations.

Terminate one connection from each Direct Connect location to a router at the company location.
Terminate the other connection from each Direct Connect location to a different router at the company location.

- B. Order two 10 Gbps AWS Direct Connect connections that are evenly spread over two locations.
  Terminate the connection from each Direct Connect location to a different router at the company location.
- C. Order two 1 Gbps AWS Direct Connect connections that are evenly spread over two locations.Terminate the connection from each Direct Connect location to a different router at the company location.
- D. Order four 1 Gbps AWS Direct Connect connections that are evenly spread over two locations.
  Terminate one connection from each Direct Connect location to a router at the company location.
  Terminate the other connection from each Direct Connect location to a different router at the company location.
