2026 Relevant AZ-120 Exam Dumps | Pass-Sure 100% Free Dumps AZ-120 Free

Our primary objective is to provide you with Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) actual questions to complete preparation for the test in few days. Our product includes Planning and Administering Microsoft Azure for SAP Workloads real questions, desktop practice test software, and web-based practice exam. Keep reading to find out what are the specifications of these formats.

Step 2: Making a Study Guide Your Companion

The study guides can be one of the best companions for anyone who is preparing for the Microsoft AZ-120 exam. The official tutorial is readily available on the certification webpage. It enhances the preparation process by simply helping you identify the skills required for the test.

Microsoft AZ-120 certification exam is designed for professionals who want to demonstrate their expertise in planning and administering Microsoft Azure for SAP workloads. AZ-120 Exam measures your ability to perform tasks related to Azure infrastructure, storage solutions, SAP workload deployment, and monitoring and troubleshooting of SAP workloads. Passing AZ-120 exam validates your skills and knowledge in deploying and managing Azure resources for SAP workloads, making you a valuable asset for organizations that use SAP on Azure.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q278-Q283):

NEW QUESTION # 278

You have an existing on-premises SAP landscape that is hosted on VMware vSphere.
You plan to migrate the landscape to Azure.
You configure the Azure Site Recovery replication policy shown in the following exhibit.

Answer:

Explanation:

see the explanation for below image:

Explanation

Answer selected as in image below.

NEW QUESTION # 279

You have an on-premises network.

You have an Azure subscription.

You plan to deploy an SAP production landscape that will include on-premises servers and Azure virtual machines. The landscape will be hosted on servers that run SUSE Linux Enterprise Server (SLES).

You need to recommend a solution to standardize the provisioning and configuration of the SLES servers for SAP workloads. The solution must meet the following requirements:

- * Automate provisioning for new on-premises servers and Azure virtual machines.

- * Ensure that you can run the Azure VM extension for SAP solutions.

Which package should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 280

You plan to deploy SAP on Azure.

The deployment must meet the following requirements:

- * Support failover to another Azure region in the event of a regional outage.

- * Minimize data loss during a failover.

- * Minimize costs.

Which fault tolerance technology should you choose for the SAP Web Dispatcher and the Microsoft SQL Server 2017 servers to meet the requirements? To answer, drag the appropriate technologies to The correct targets. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 281

You have an on-premises SAP environment.

Backups are performed by using tape backups. There are 50 TB of backups.

A Windows file server has BMP images of checks used by SAP Finance. There are 9 TB of images.

You need to recommend a method to migrate the images and the tape backups to Azure. The solution must maintain continuous replication of the images.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Tape backups: Azure DataBox

The Microsoft Azure Data Box cloud solution lets you send terabytes of data into Azure in a quick, inexpensive, and reliable way.

The secure data transfer is accelerated by shipping you a proprietary Data Box storage device. Each storage device has a maximum usable storage capacity of 80 TB and is transported to your datacenter through a regional carrier. The device has a rugged casing to protect and secure data during the transit.

File server: Azure Storage Explorer

Azure Storage Explorer is an application which helps you to easily access the Azure storage account through any device on any platform, be it Windows, MacOS, or Linux. You can easily connect to your subscription and manipulate your tables, blobs, queues, and files.

Incorrect Answers:

Not Azure Data Box Edge: Azure Data Box Edge is rebranded as Azure Stack Edge. Azure Stack Edge is a Hardware-as-a-service solution. Microsoft ships you a cloud-managed device with a built-in Field Programmable Gate Array (FPGA) that enables accelerated AI-inferencing and has all the capabilities of a network storage gateway.

NEW QUESTION # 282

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.

How should you complete the relevant component of the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: extensions

Azure Disk Encryption can be enabled via Azure PowerShell or Azure CLI. That is normally seen in remediation. In a real-world scenario you would like to see a virtual machine during its creation include disk encryption process. This is technically possible thanks to Disk Encryption VM extension.

Box 2: AzureDiskEncryption

Example:

```
"type": "Microsoft.Compute/virtualMachines/extensions",
"name": "[concat(parameters('vmName'), '/diskEncryption')]",
"apiVersion": "2019-03-01",
"location": "[parameters('location')]",
"dependsOn": [
  "[resourceId('Microsoft.Compute/virtualMachines', parameters('vmName'))]"
],
"properties": {
  "publisher": "Microsoft.Azure.Security",
  "type": "AzureDiskEncryption",
```
