

300-745 dumps - Pass4cram - 100% Passing Guarantee

P.S. Free 2026 Cisco 300-745 dumps are available on Google Drive shared by Pass4cram: <https://drive.google.com/open?id=1h5Kp4r7nW8J1D3MJAXdbchP4NBr0F6n>

Several advantages we now offer for your reference. On the one hand, our 300-745 learning questions engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies, thus you can 100% trust our 300-745 Exam Engine. On the other hand, the professional 300-745 study materials determine the high pass rate. According to the research statistics, we can confidently tell that 99% candidates after using our products have passed the 300-745 exam.

Of course, a personal learning effect is not particularly outstanding, because a person is difficult to grasp the difficult point of the test, the latest trend in an examination to have no good updates at the same time, in order to solve this problem, our 300-745 study braindumps for the overwhelming majority of users provide a powerful platform for the users to share. Here, the all users of the 300-745 Exam Questions can through own ID number to log on to the platform and other users to share and exchange, can even on the platform and struggle with more people to become good friend, pep talk to each other, each other to solve their difficulties in study or life. The 300-745 prep guide provides user with not only a learning environment, but also create a learning atmosphere like home.

Free Cisco 300-745 Exam Dumps & 300-745 Exam Pass4sure

The Cisco 300-745 exam questions are designed and verified by experienced and qualified Cisco 300-745 exam trainers. So you rest assured that with Designing Cisco Security Infrastructure (300-745) exam dumps you can streamline your 300-745 exam preparation process and get confidence to pass Designing Cisco Security Infrastructure (300-745) exam in first attempt.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q56-Q61):

NEW QUESTION # 56

An administrator at a large university wants to ensure that the new employees have the right level of access when they are onboarded. The administrator asked the team to configure the cloud environment and ensure that new employees have the appropriate access based on their roles and responsibilities. Which technique must be recommended to ensure the right level of access?

- A. VPN
- B. network access control list
- C. identity access management
- D. security groups

Answer: C

Explanation:

In a modern cloud and campus environment, managing the lifecycle of an identity is the cornerstone of a secure architecture. Identity and Access Management (IAM) is the comprehensive framework of policies and technologies that ensures the right individuals have

the appropriate access to technology resources. According to the Cisco SDSI objectives, IAM is the primary mechanism used to transition from manual, error-prone onboarding to a policy-driven approach based on roles and responsibilities. IAM solutions allow administrators to define digital identities and associate them with specific roles (Role-Based Access Control). When a new employee is onboarded, the IAM system automatically provisions access to the necessary cloud applications and data based on their department or job function. This ensures the principle of least privilege is maintained from day one. While Security Groups (Option B) and Network Access Control Lists (ACLs) (Option D) are important technical controls for filtering traffic at the network layer, they do not manage the identity lifecycle or the complex mapping of users to application permissions. A VPN (Option C) provides a secure tunnel for remote access but does not define what a user can do once they are inside the network. IAM provides the central control plane for identity-centric security, which is essential for a large university environment with high user turnover and diverse access requirements.

NEW QUESTION # 57

How does a SOC leverage flow collectors?

- A. It provides real time content filtering.
- B. It performs load balancing capabilities across systems to optimize performance.
- C. It performs data backup and recovery.
- D. It provides data for analysis in threat detection and response system.

Answer: D

Explanation:

A flow collector gathers metadata about network traffic (such as NetFlow or IPFIX), which SOC analysts use to analyze communication patterns. This data is critical for threat detection and response, helping identify anomalies, lateral movement, or potential attacks.

NEW QUESTION # 58

A security engineer on an application design team must choose a framework of attack patterns to evaluate during threat modeling. Which framework provides the common set of attacks?

- A. Cisco SAFE
- B. GDPR
- C. SOC2
- D. MITRE CAPEC

Answer: D

NEW QUESTION # 59

A bank experienced challenges with compromised endpoints gaining access to the internal network. To enhance security, the bank wants to ensure that all endpoints are scanned for compliance check before being allowed to access the network. Which action achieves the level of security and control?

- A. Use MFA using Cisco DUO.
- B. Implement Posture validation using Cisco ISE.
- C. Configure TrustSec using Cisco ISE.
- D. Set up data loss prevention policy.

Answer: B

Explanation:

Posture validation with Cisco ISE checks endpoint compliance (such as antivirus status, patches, and security configurations) before granting network access. This ensures compromised or non-compliant endpoints are denied access, directly addressing the bank's security concern.

NEW QUESTION # 60

A company recently discovered that a former employee, who left to join a competitor, continued to access and exfiltrate sensitive data over several weeks after leaving. The breach highlighted vulnerabilities in the organization's data security and access management practices. To prevent such incidents in the future, the organization must adopt measures that detect and restrict unauthorized data access and transfer. Which mitigation strategy must be implemented to address the issue?

- A. Upgrade network policy access.
- B. Implement web application firewall.
- **C. Implement data loss prevention strategy.**
- D. Deploy audit logging and monitoring solution.

Answer: C

Explanation:

A Data Loss Prevention (DLP) strategy directly addresses the problem of unauthorized access and exfiltration of sensitive data. DLP tools monitor, detect, and block suspicious data transfers, ensuring that insiders or former employees cannot copy, email, or upload sensitive information without authorization. This provides the required prevention and control that the scenario calls for.

NEW QUESTION # 61

.....

It never needs an internet connection. Cisco Designing Cisco Security Infrastructure practice exam software has several mock exams, designed just like the real exam. Cisco 300-745 Practice Exam software contains all the important questions which have a greater chance of appearing in the final exam. Pass4cram always tries to ensure that you are provided with the most updated Designing Cisco Security Infrastructure Exam Questions to pass the exam on the first attempt.

Free 300-745 Exam Dumps: https://www.pass4cram.com/300-745_free-download.html

For example, the 300-745 learning engine we developed can make the 300-745 exam easy and easy, and we can confidently say that we did this. In addition to the 300-745 exam materials, our company also focuses on the preparation and production of other learning materials, Cisco 300-745 Reliable Study Notes With the APP mode, you can download all the learning information to your mobile phone, Cisco 300-745 Reliable Study Notes You should not share your password/website access with anyone.

Checking our 300-745 free demo is a great way of learning the pattern of exam materials and if it suits what you wanted, A bad situation can show special integrity.

For example, the 300-745 Learning Engine we developed can make the 300-745 exam easy and easy, and we can confidently say that we did this. In addition to the 300-745 exam materials, our company also focuses on the preparation and production of other learning materials.
