

Juniper JN0-481 Reliable Exam Pattern | Latest JN0-481 Study Guide

Davis Advantage for Understanding Medical-Surgical Nursing, 7th Edition Linda S. Williams Test Bank

	provider, therapist, or dietician
3	Collaboration includes other health-care disciplines in providing care, like the provider, therapist, or dietician.
4	Collaboration includes other health-care disciplines in providing care, like the provider, therapist, or dietician

PTS: 1
CON: Patient-Centered Care

20. What is the purpose of clinical judgment?
1. It designates the orders written by the doctor.
 2. It determines what the nurse does after thinking about a problem.
 3. It establishes the jobs needing to be accomplished during a shift.
 4. It is based on personal ethical beliefs.

ANS: 2
Chapter: Chapter 1. Critical Thinking, Clinical Judgment, and the Nursing Process
Objective: 1. Explain the difference between critical thinking and clinical judgment.
Page: 2
Heading: Clinical Judgment
Integrated Process: Clinical Problem-Solving Process (Nursing Process)
Client Need: SECE: Coordinated Care
Cognitive Level: Comprehension [Understanding]
Concept: Clinical Judgment
Difficulty: Easy

	Feedback
1	This is not the purpose of clinical judgment.
2	Clinical judgment is based on good critical thinking and determines what the nurse DOES after thinking about a problem.
3	This is not the purpose of clinical judgment.
4	This is not the purpose of clinical judgment.

PTS: 1
CON: Patient-Centered Care

21. A nurse notes that a patient's blood glucose is low and properly treats the symptoms. The nurse continues to monitor for symptoms of low blood glucose throughout the remainder of the shift. What is the nurse practicing by this action?
1. Collaboration
 2. Vigilance
 3. Intelligence

It is hard to scrutinize the Data Center, Specialist (JNCIS-DC) (JN0-481) exam, particularly assuming you have less time and the subjects are tremendous. You essentially have a baffled perspective toward it and some even consider not giving the Data Center, Specialist (JNCIS-DC) exam since they can't concentrate exactly as expected. Juniper JN0-481 Exam they need time to cover each point and this is unimaginable considering how they are left with only a piece of a month to give the Juniper JN0-481 exam.

The easy to learn format of these amazing JN0-481 exam questions will prove one of the most exciting exam preparation experiences of your life! When you are visiting on our website, you can find that every button is easy to use and has a swift response. And there are three varied versions of our JN0-481 learning guide: the PDF, Software and APP online. Every version of our JN0-481 simulating exam is auto installed if you buy and study with them. They are perfect in every detail.

Latest Juniper JN0-481 Study Guide | Free JN0-481 Sample

Discount is being provided to the customer for the entire Juniper JN0-481 preparation suite. These JN0-481 learning materials include the JN0-481 preparation software & PDF files containing sample Interconnecting Juniper JN0-481 and answers along with

the free 90 days updates and support services. We are facilitating the customers for the Juniper JN0-481 preparation with the advanced preparatory tools.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q42-Q47):

NEW QUESTION # 42

You are working to build an ESI-LAG for a multihomed server. The ESI-LAG is not coming up as multihomed. Referring to the exhibit, what are two solutions to this problem? (Choose two.)

- A. The ESI ID on both devices must be the same.
- B. The gateway IP addresses on both devices must be different.
- C. The loopback IP addresses on both devices must be the same.
- D. The LACP system ID on both devices must be the same.

Answer: A,D

Explanation:

An ESI-LAG is a link aggregation group (LAG) that spans two or more devices and is identified by an Ethernet segment identifier (ESI). An ESI-LAG provides redundancy and load balancing for a multihomed server in an EVPN-VXLAN network. To configure an ESI-LAG, you need to ensure that the following requirements are met:

The LACP system ID on both devices must be the same. This ensures that the LACP protocol can negotiate the LAG parameters and form a single logical interface for the server.

The ESI ID on both devices must be the same. This ensures that the EVPN control plane can advertise the ESI-LAG as a single Ethernet segment and synchronize the MAC and IP addresses of the server across the devices.

The VLAN ID and VNI on both devices must be the same. This ensures that the server can communicate with other hosts in the same virtual network and that the VXLAN encapsulation and decapsulation can work properly.

In the exhibit, the LACP system ID and the ESI ID on both devices are different, which prevents the ESI-LAG from coming up as multihomed. Therefore, the correct answer is B and D. The LACP system ID on both devices must be the same and the ESI ID on both devices must be the same.

NEW QUESTION # 43

Multitenancy for applications is achieved by creating virtual networks (VNs) within which construct?

- A. routing zone
- B. connectivity template
- C. security policy
- D. routing table

Answer: A

Explanation:

A routing zone is an L3 domain, the unit of tenancy in multi-tenant networks. You create routing zones for tenants to isolate their IP traffic from one another, thus enabling tenants to re-use IP subnets. In addition to being in its own VRF, each routing zone can be assigned its own DHCP relay server and external system connections. You can create one or more virtual networks within a routing zone, which means a tenant can stretch its L2 applications across multiple racks within its routing zone.

NEW QUESTION # 44

You have a virtual network that needs controlled access to other virtual networks in the same routing zone. Using the Juniper Apstra UI, which feature would be used to accomplish this task?

- A. security policy
- B. interface policy
- C. anti-affinity policy
- D. routing policy

Answer: A

Explanation:

A security policy is the feature that would be used to accomplish the task of controlling access to other virtual networks in the same

routing zone using the Juniper Apstra UI. A security policy allows you to define rules that specify which traffic is allowed or denied between different virtual networks, IP endpoints, or routing zones. A security policy can be applied to one or more virtual networks in the same routing zone, and it can use various criteria to match the traffic, such as source and destination IP addresses, protocols, ports, or tags. A security policy can also support DHCP relay, which enables the forwarding of DHCP requests from one virtual network to another.

NEW QUESTION # 45

What is the purpose of a Juniper Apstra rack?

- A. It stores device port data rates and vendor information.
- B. It stores information on how pods connect to super spines.
- C. It stores information on how leaf nodes connect to generic devices
- D. It stores IP address and ASN pool information.

Answer: C

Explanation:

A Juniper Apstra rack is a physical entity that contains one or more network devices, such as leaf nodes, access switches, or generic systems. A rack is used to organize and manage the network devices in the Apstra software application. A rack has the following characteristics:

It stores information on how leaf nodes connect to generic devices. This is because a rack can include generic systems, which are devices that are not managed by Juniper Apstra, but are connected to the network. A generic system can be a server, a firewall, a load balancer, or any other device that has a network interface. A rack stores the information on how the leaf nodes, which are the devices that provide access to the end hosts, connect to the generic devices, such as the port number, the link speed, the LAG mode, and the roles.

It has a rack type, which defines the type and number of leaf devices, access switches, and/or generic systems that are used in the rack. A rack type is a resource that is created in the data center design phase, and it does not specify the vendor or the model of the devices. A rack type can be predefined or custom-made, and it can be used to create multiple racks with the same structure and configuration.

It has a rack build, which assigns the specific vendor and model of the devices to the rack. A rack build is created in the staged phase, and it uses the rack type as a template. A rack build can also assign the resources, such as the IP addresses, the ASNs, and the VNIs, to the devices in the rack. It has a rack deployment, which applies the network configuration and services to the devices in the rack. A rack deployment is performed in the active phase, and it uses the rack build as a reference. A rack deployment can also monitor the network performance and compliance of the devices in the rack.

NEW QUESTION # 46

Which of the following two statements are correct?

- A. VXLAN encapsulation discards VNIs
- B. VXLAN is a Layer 3 encapsulation protocol
- C. VXLAN is a Layer 2 encapsulation protocol
- D. VXLAN encapsulation discards VLAN IDs

Answer: C,D

NEW QUESTION # 47

.....

Our career is inextricably linked with your development at least in the JN0-481 practice exam's perspective. So we try to emulate with the best from the start until we are now. So as the most professional company of JN0-481 study dumps in this area, we are dependable and reliable. We maintain the tenet of customer's orientation. If you hold any questions about our JN0-481 Exam Prep, our staff will solve them for you 24/7. It is our duty and honor to offer help.

Latest JN0-481 Study Guide: https://www.real4test.com/JN0-481_real-exam.html

Q6: What is your refund process if I fail JNCIS-DC JN0-481 test, Newest helpful JN0-481 dumps exam questions and answers free download from Real4test Data Center, Specialist (JNCIS-DC)" is the name of JNCIS-DC exam dumps which covers all the knowledge points of the real Juniper exam, So we have been persisting in updating our JN0-481 test torrent and trying our best to

provide customers with the latest study materials, But if you are our customers buying our JN0-481 quiz torrent: Data Center, Specialist (JNCIS-DC), you never worry about such a thing will happen.

Because of the way in which they collide with each other, This metric is often associated with a traceability matrix, Q6: What is your refund process if I fail JNCIS-DC JN0-481 test?

Newest helpful JN0-481 dumps exam questions and answers free download from Real4test Data Center, Specialist (JNCIS-DC)" is the name of JNCIS-DC exam dumps which covers all the knowledge points of the real Juniper exam.

Top JN0-481 Reliable Exam Pattern Free PDF | Valid Latest JN0-481 Study Guide: Data Center, Specialist (JNCIS-DC)

So we have been persisting in updating our JN0-481 test torrent and trying our best to provide customers with the latest study materials, But if you are our customers buying our JN0-481 quiz torrent: Data Center, Specialist (JNCIS-DC), you never worry about such a thing will happen.

What is more, we will offer you free new version if you have purchased our JN0-481 training engine before.
