New Exam Sharing-and-Visibility-Architect Overview | Pass-Sure Salesforce Sharing-and-Visibility-Architect: Salesforce Certified Sharing and Visibility Architect 100% Pass

The Salesforce Sharing-and-Visibility-Architect certification exam is most useful for candidates who are from the working class, but students who are still in school can also use Salesforce Sharing-and-Visibility-Architect dumps in place of searching for other exam-related literature. In order to put it simply, we can state that the Salesforce Sharing-and-Visibility-Architect Practice Questions are the only thing that can save you from failing the challenging Sharing-and-Visibility-Architect certification exam.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q66-Q71):

NEW QUESTION # 66

Universal Containers (UC) has 200 distributors that use Partner Community licenses.

Partners cannot see each other's data, but UC is also trying to give more visibility to data for certain individuals at a distributor.

HOW can an Architect give users in the partner user role access to all Case and Container records owned by any user, regardless of role, at the same distributor?

- A. Give super user permission to the individual partner users.
- B. Create a Permission Set granting "View All" permission to Case and Container records.
- C. Create an ownership-based sharing rule.
- D. Create sharing sets.

Answer: A

NEW QUESTION # 67

Universal Containers has created a Reimbursement Custom Object to capture requests for reimbursement of expenses related to office supplies. The Reimbursement requests are sometimes sensitive and the Team Leads should not have access to the Reimbursement records submitted by the Users in the Call Center Agent role. The Director of Support will require access to all Reimbursement records. The role hierarchy is set as follows: Call Center Agent role reports to Team Lead role, which Reports to the Director of Support. Which steps would the Architect take to ensure proper sharing in this Role Hierarchy structure assuming Private Sharing Setting for the Reimbursement Object?

- A. Use an Approval Process to change the owner of the Reimbursement record upon submission to the Director of Support
- B. Leave the Reimbursement Object in "Deployed" Status and set the Director of Supports Profile to "View All" in the object permissions.
- C. Disable Grant Access Using Hierarchies for the Object and create a Sharing Rule to enable sharing to the Director of Support
- D. The sharing scenario described will occur without any special configuration choices being made by the Architect

Answer: C

NEW QUESTION # 68

Which three advanced tools can Salesforce enable for large-scale role hierarchy realignments in organizations with large data volumes?

Choose 3 answers.

- A. Granular Locking
- B. Parallel Sharing Rule Recalculation
- C. Deferred Sharing Calculation
- D. Skinny Table Indexing
- E. Partitioning by Divisions

Answer: C,D,E

Explanation:

Explanation

Three advanced tools that Salesforce can enable for large-scale role hierarchy realignments in organizations with large data volumes are partitioning by divisions, deferred sharing calculation, and skinny table indexing.

Partitioning by divisions allows the organization to segment data into logical sections based on business criteria, which reduces the number of records that need to be recalculated when role hierarchy changes.

Deferred sharing calculation allows the organization to postpone the sharing recalculation until a scheduled time, which avoids impacting users during peak hours. Skinny table indexing allows the organization to create custom indexes on frequently used fields, which improves query performance and reduces locking contention

NEW QUESTION # 69

Universal Container has developed a custom Visualforce page that will accept user input and must prefer returning the results to the users.

Which two techniques should be used to ensure the users cannot perform a SOQL injection attack?

- A. Escape double quotes in the user input.

- B. Use the with Sharing keyword on the controller.
- C. Use bind variable in the SOQL query.
- D. Use the escapesinglequotes() method to sanitize user input.

Answer: C,D

NEW QUESTION # 70

A sales rep at Universal Containers was added to an opportunity team with Read/Write permissions. Which action is she allowed to perform in the opportunity?

- A. Replace opportunity owner.
- B. Update opportunity stage.
- C. Add/remove members in the opportunity team.

Answer: B

Explanation:

The Opportunity Team feature allows collaboration by granting specific permissions (Read, Read/Write, or access defined by roles) to users added to an opportunity. In this scenario, the sales rep has Read/Write permissions, which means they can:

- * View and update the opportunity, including editing fields like the opportunity stage.
- * They cannot perform administrative tasks like transferring ownership or managing the opportunity team unless explicitly granted "Full Access" or assigned additional roles that permit these actions.
- * Option A (Correct): Updating the opportunity stage is allowed as part of Read/Write access.
- * Option B: Replacing the opportunity owner requires administrative privileges, which are not included in standard Read/Write permissions.
- * Option C: Adding or removing members in the opportunity team requires "Full Access," which exceeds Read/Write permissions.
