Our Prepare for your Microsoft Power Platform Solution Architect (PL-600) PDF format works on all smart devices without limits of time and place.

Microsoft Power Platform Solution Architect Sample Questions (Q212-Q217):

NEW QUESTION # 212
You need to recommend a feature that erases agent workloads and resolves reported issues.
What should you recommend?

- A. Microsoft AppSource
- B. Microsoft Store
- C. Dynamics 365 Customer Service default functionality

Answer: C

Explanation:
Scenario: Agents need a way to track reservation issues.
Use Dynamics 365 Customer Service to:
Track customer issues through cases

NEW QUESTION # 213

You are a Microsoft Power Platform architect gathering solution requirements for a customer. Management uses three different systems to locate asset inventory and contract details.

Management must view inventory with the ability to select assets and view additional details. Sales representatives have issues locating assets based on specific features in a timely manner when working with customers.

You need to prioritize the requirements.

Which priority should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Priority
Enable sales representatives to locate assets in less time.	Non-functional ▾ Time Consumer **Non-functional** Functional Quick Win
Enable management to view inventory and asset details.	Functional ▾ **Big Investment** Non-functional Budget Functional

Answer:

Explanation:

Answer Area

Requirement	Priority
Enable sales representatives to locate assets in less time.	Non-functional ▾ Time Consumer **Non-functional** Functional Quick Win
Enable management to view inventory and asset details.	Functional ▾ **Big Investment** Non-functional Budget Functional

Explanation:

Answer Area

Requirement	Priority
Enable sales representatives to locate assets in less time.	Non-functional ▾
Enable management to view inventory and asset details.	Functional ▾

NEW QUESTION # 214

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process.

The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 215

A company has a Power Platform environment that connects to a third-party marketing application.

The company reports that the data in the Power Platform lead table does not match data from the marketing application. Issues include:

The owner data in the lead table and the third-party application do not match.

The Topic column has more information than the related record from the marketing application.

There are differences in how telephone numbers are formatted.

You need to determine which processes are causing the issues.

Which three processes may be causing the differences observed? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Classic workflow
- B. Dataflow
- C. Power Automate cloud flow
- D. Duplicate detection rule
- E. Business rule

Answer: A,B,E

Explanation:

A: With advanced data preparation available in Power Apps, you can create a collection of data called a dataflow, which you can then use to connect with business data from various sources, clean the data, transform it, and then load it to Microsoft Dataverse or your organization's Azure Data Lake Gen2 storage account.

B: By combining conditions and actions, you can do any of the following with business rules:

Set column values

Clear column values

Set column requirement levels

Show or hide columns

Enable or disable columns

Validate data and show error messages

Create business recommendations based on business intelligence.

C: Duplicate detection works by comparing generated match codes of existing records with each new record being created. These match codes are created as each new record is created. Therefore, there is potential for one or more duplicate records to be created if they are processed at the exact same moment. In addition to detecting duplicates as they are created, you should schedule duplicate detection jobs to check for other potential duplicate records.

NEW QUESTION # 216

A company plans to create a Power Platform solution that integrates with Dynamics 365 Sales.

The solution must meet the following requirements:

Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Integration requirement — **Solutions**

Have read-only visibility of data from an external Azure SQL database.
- Use virtual tables.
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

External system sends data to Dynamics 365 Sales.
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

Answer:

Explanation:

Integration requirement — **Solutions**

Have read-only visibility of data from an external Azure SQL database.
- **Use virtual tables.**
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

External system sends data to Dynamics 365 Sales.
- Use a custom plug-in.
- **Use Dynamics 365 Web API.**
- Use a web resource to display data.
