Adobe Workfront Project Manager Certified Professional Sample Questions (Q21-Q26):

NEW QUESTION # 21

The art director is reviewing and approving a proof and has requested that they only get email notifications for a new proof or version. What Email alert option should be assigned to them on the workflow?

- A. Decisions and Notify recipients about this proof is selected
- B. Decisions and Notify recipients about this proof is not selected
- C. Disabled and Notify recipients about this proof is selected
- D. Disabled and Notify recipients about this proof is not selected

Answer: C

Explanation:

For the art director to only receive email notifications about new proofs or versions, the option "Disabled and Notify recipients about this proof is selected" is the correct choice. This ensures that they are not inundated with notifications about every comment or decision made but are alerted when a new proof or version is uploaded for review.

This approach optimizes the notification settings based on the user's request, providing a more focused and less overwhelming email experience, which is often crucial for roles such as creative directors who manage multiple proofs and versions.

NEW QUESTION # 22

An organization has created unique data fields relevant to their projects. Starting by navigating from a project's landing page, where is this data found?

- A. Project Details > Overview
- B. Business Case > Project Info
- C. Project Details > Custom Forms

Answer: B

Explanation:

In Workfront, custom data fields created for projects are typically found within the "Business Case" section, specifically under "Project Info." This area houses key project information and unique custom fields that are relevant to the project's setup. The "Project Details" section is more focused on task-related information and the overall summary of the project.

NEW QUESTION # 23

A project manager would like to see the Budgeted Variances between the hours for the current week. Where is that information found at the project level?

- A. Finance section
- B. Utilization section

- C. Hours tab

Answer: A

Explanation:

To view the Budgeted Variances between the planned and actual hours for the current week, the project manager should navigate to the Finance section of the project. This section provides detailed financial information, including cost and hour variances, which help track how actual project performance compares to the initial budget and plan. The Hours tab typically displays the logged hours, while the Utilization section is more focused on resource usage and allocation.

NEW QUESTION # 24

A project manager checks an Incomplete Tasks report and notices that several tasks are listed even though the items are marked as 100% complete. What column can the project manager add to the view to understand why those tasks are included in the report?

- A. Progress Status
- **B. Status**
- C. Actual Completion Date

Answer: B

Explanation:

Even though tasks may be marked as 100% complete, their Status may still be listed as incomplete in reports if the task's status has not been updated to "Completed." The Status column provides insight into the current state of the task, which helps identify if the task is still listed as "In Progress" or another incomplete status despite being marked as fully complete. Adding this column clarifies why the task appears in the Incomplete Tasks Report.

NEW QUESTION # 25

A stakeholder has identified a potential scheduling conflict on a current project. This conflict may affect the completion date by pushing it out two weeks. The stakeholder wants to document this timeline risk. Which action should the stakeholder take to log the risk?

- **A. Log a risk as part of the project business case and identify it as a "schedule" risk.**
- B. Log an issue on the project and explain that the completion date is at risk.
- C. Create a task in the project and set the Planned Completion Date for 2 weeks.

Answer: A

Explanation:

In Adobe Workfront, risks associated with a project should be logged as part of the project business case. The "Risk" section within the business case allows stakeholders to document any potential threats to the project timeline, scope, or resources. Identifying this risk as a "schedule" risk helps communicate the potential delay to the project stakeholders and allows it to be tracked and mitigated effectively.

NEW QUESTION # 26

.....

We have free demos of our AD0-E911 exam questions for your information and the demos offer details of real exam contents. All contents of AD0-E911 practice quiz contain what need to be mastered.
