Sample PDII-JPN Questions - The Best Salesforce PDII-JPN Valid Exam Papers:

Passing the PDII-JPN certification can prove that you are very competent and excellent and you can also master useful knowledge and skill through passing the test. Purchasing our PDII-JPN guide torrent can help you pass the exam and it costs little time and energy. The PDII-JPN exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our PDII-JPN Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

Whether for a student or an office worker, obtaining PDII-JPN certificate can greatly enhance the individual's competitiveness in the future career. Try our PDII-JPN study materials, which are revised by hundreds of experts according to the changes in the syllabus and the latest developments in theory and practice. Once you choose PDII-JPN training dumps, passing the exam one time is no longer a dream.

Top Sample PDII-JPN Questions & Leader in Certification Exams Materials & Latest updated PDII-JPN Valid Exam Papers

Many learners feel that they have choice phobia disorder whiling they are choosing reliable PDII-JPN test guide on the internet. If so you can choose our PDII-JPN certification materials. We are the leading position in this field and our company is growing faster and faster because of our professional and high pass-rate PDII-JPN Exam Torrent materials. Every year more than thousands of candidates choose our reliable PDII-JPN test guide materials we help more than 98% of candidates clear exams, we are proud of our PDII-JPN exam questions.

Salesforce Sample Questions (Q29-Q34):

NEW QUESTION # 29
Universal Containers (UC) には顧客情報を保存する ERP システムがあります。Salesforce でアカウントが作成されると、新しい顧客を作成するための ERP システムの REST エンドポイントがアカウント情報を使用して自動的に呼び出される必要があります。ERP システムへの呼び出しが失敗した場合でも、アカウントは作成されるはずです。UC 組織のアカウントは、UC 顧客オンボーディング部門のユーザーによって一度に 1 つずつのみ作成されます。
ERP を呼び出すために開発者は何を実装する必要がありますか
システムの REST エンドポイント?

- A. トリガーからキュー可能オブジェクトを呼び出す
- B. JavaScript からの REST 呼び出し
- C. 頂点継続
- D. ヘッドレスクイックアクション

Answer: A

Explanation:
The developer should call a Queueable from a Trigger to make the call to the ERP system's REST endpoint. A Queueable is a class that implements the Queueable interface, and can be used to run asynchronous jobs that can make callouts to external services. The developer can use the Database.AllowsCallouts interface to mark the Queueable class as eligible for making callouts, and use the System.enqueueJob method to add the Queueable class to the queue. The developer can then call the Queueable class from the Trigger on Account, and pass the Account information as a parameter. This way, the developer can make the call to the ERP system's REST endpoint, and handle the response or the error. If the call to the ERP system fails, the Account will still be created, as the Queueable class runs in a separate transaction from the Trigger. Calling a REST call from JavaScript will not work, as it will require a Lightning web component or a Visualforce page to execute the JavaScript code, and it will not be triggered by the creation of an Account. Using a Headless Quick Action will not work, as it will require a user interaction to invoke the action, and it will not be triggered by the creation of an Account. Using an Apex Continuation will not work, as it will require a Visualforce page to handle the long-running callout, and it will not be triggered by the creation of an Account. Reference: [Queueable Apex], [Apex Developer Guide]

NEW QUESTION # 30
非同期 Apex を使用することでのみ実行できるユースケースはどれですか?

- A. バッチプロセスを将来完了するようにスケジュールするための呼び出しを行う
- B. 数万件のレコードをクエリする
- C. ApexトリガーからWebサービスを呼び出す
- D. 挿入完了後のレコードの更新1

Answer: C

Explanation:
Salesforce enforces a strict architectural boundary regarding database transactions and external communications. When an Apex trigger executes, it is part of a synchronous database transaction. If the platform allowed a synchronous callout (a web service call) directly from a trigger, the database transaction- including all active record locks-would have to remain open while waiting for the external system to respond. This could lead to severe performance degradation and hit the "Concurrent Request" limit.
Consequently, calling a web service from an Apex trigger (Option C) must be handled asynchronously. A developer must hand off the callout logic to an @future(callout=true) method, a Queueable class, or a Platform Event. This allows the trigger to finish its work and commit the database transaction immediately, while the callout runs in its own separate background process with its own set of governor limits.
Option A is incorrect because a standard synchronous query can retrieve up to 50,000 records. Option B is incorrect because System.scheduleBatch is a synchronous call to initiate a process, even if the process itself runs later. Option D is incorrect because record updates can be handled synchronously in an after insert trigger context.

NEW QUESTION # 31
ある企業には、リクエストとリクエスト ラインを更新し、更新されたレコードを使用して外部 ERP システムの REST エンドポイントを呼び出すコードがあります。

CalloutUtil。makeRestCallout が失敗し、「You have uncommitted work pending. エラーを呼び出す前に、コミットまたはロールバックしてください。問題に対処するために何をすべきですか?

- A. CalloutUtil.makeRestCallout メソッド呼び出しを catch ブロックの下に移動します。
- B. CalloutUtil.makeRestCallout を @InvocableMethod メソッドに変更します。
- C. Database.setSavepoint と Database.rollback を削除します。
- D. CalloutUtil.makeRestCallout を @future メソッドに変更します

Answer: D

NEW QUESTION # 32
次のコード スニペットを参照してください。
開発者は Lightning Web コンポーネントで問題を経験しています。コンポーネントは、現在ログインしているユーザーが所有する商談に関する情報を表示する必要があります。
コンポーネントがレンダリングされると、「データ取得エラー」というメッセージが表示されます。
この問題を解決するには、Apex クラスにどの変更を実装する必要がありますか?

- A. w を使用するようにコードを編集します。Apex クラスのカット共有キーワード。
- B. Apex メソッドで Cacheable=true 属性を使用します。
- C. Opportunity オブジェクトの OWD が Public であることを確認します。
- D. Apex メソッドで Continuation=true 属性を使用します。

Answer: B

Explanation:
The @AuraEnabled(cacheable=true) attribute allows caching of method results on the client side, reducing server trips for already fetched data, which is useful for read-only data.References: Aura Components Developer Guide - AuraEnabled Annotation

NEW QUESTION # 33
Aura コンポーネントから呼び出される以下の Apex コントローラを考えてみましょう。
5行目 @AuraEnabled
6行目 public List<String> getStringArray() {
7行目 String[] arrayItems = new String[]{ 'red', 'green', 'blue' };
8行目 return arrayItems;
9行目 }
10行目 }
このコードの何が問題なのでしょうか?

- A. 6行目: メソッドは静的である必要があります
- B. 1行目と6行目: クラスとメソッドはグローバルである必要があります
- C. 8行目: メソッドはリストを返す前にJSONにシリアル化する必要があります
- D. 1行目: クラスはグローバルである必要があります

Answer: A

Explanation:
When building Apex controllers for Aura Components (or Lightning Web Components), any method annotated with @AuraEnabled must be defined as static. The snippet provided defines the method getStringArray() as an instance method (public List<String>...) rather than a static method (public static List<String>...).
The Lightning Component framework does not instantiate an object of the Apex class; instead, it calls the method statically. If the method is not static, the framework cannot locate or execute it, resulting in an error.
While global was required in older versions or for managed packages, public is sufficient for code within the same namespace. Apex handles the serialization of standard types like Lists automatically, so manual JSON serialization is not required.

NEW QUESTION # 34
......

Once you submit your practice, the system of our PDII-JPN exam quiz will automatically generate a report. The system is highly

flexible, which has short reaction time. So you will quickly get a feedback about your exercises of the PDII-JPN preparation questions. For example, it will note that how much time you have used to finish the PDII-JPN Study Guide, and how much marks you got for your practice as well as what kind of the questions and answers you are wrong with.

PDII-JPN Valid Exam Papers: https://www.pdf4test.com/PDII-JPN-dump-torrent.html

By using our PDII-JPN exam collection materials, many customers controlled their stress of the exam and get the certificate, Salesforce Sample PDII-JPN Questions It has the overwhelming ability to help you study efficiently, The passing rate is the best test for quality of our PDII-JPN study materials, Salesforce Sample PDII-JPN Questions I don't know how much do you know for this field?

Our experts will spare no effort to collect the latest information about the IT exam, and then they will compile these useful resources into our Salesforce PDII-JPN study materials immediately.

Professional Sample PDII-JPN Questions - Pass PDII-JPN Exam

Designated and Convenience Initializers, By using our PDII-JPN Exam Collection materials, many customers controlled their stress of the exam and get the certificate.

It has the overwhelming ability to help you study efficiently, The passing rate is the best test for quality of our PDII-JPN study materials, I don't know how much do you know for this field?

Our excellent exam preparation, valid real dumps and PDII-JPN the similarity with the real rest help us dominate the market and gain good reputation in this area.
