Now IT industry is more and more competitive. Passing CrowdStrike CCFH-202 exam certification can effectively help you entrench yourself and enhance your status in this competitive IT area. In our PDFBraindumps you can get the related CrowdStrike CCFH-202 exam certification training tools. Our PDFBraindumps IT experts team will timely provide you the accurate and detailed

training materials about CrowdStrike Certification CCFH-202 Exam. Through the learning materials and exam practice questions and answers provided by PDFBraindumps, we can ensure you have a successful challenge when you are the first time to participate in the CrowdStrike certification CCFH-202 exam. Above all, using PDFBraindumps you do not spend a lot of time and effort to prepare for the exam.

CrowdStrike Certified Falcon Hunter Sample Questions (Q11-Q16):

NEW QUESTION # 11

What topics are presented in the Hunting and Investigation Guide?

- A. Recommended platform configurations and prevention settings to ensure detections are generated for hunting leads
- B. **Sample hunting queries, select walkthroughs and best practices for hunting with Falcon**
- C. Detailed summary of event names, descriptions, and some key data fields for hunting and investigation
- D. Detailed tutorial on writing advanced queries such as sub-searches and joins

Answer: B

Explanation:

This is the correct answer for the same reason as above. The Hunting and Investigation guide provides sample hunting queries, select walkthroughs, and best practices for hunting with Falcon. It does not provide a detailed tutorial on writing advanced queries, a detailed summary of event names and descriptions, or recommended platform configurations and prevention settings.

NEW QUESTION # 12

Which of the following is a way to create event searches that run automatically and recur on a schedule that you set?

- A. Event Search
- B. **Scheduled Searches**
- C. Scheduled Reports
- D. Workflows

Answer: B

Explanation:

Scheduled Searches are a way to create event searches that run automatically and recur on a schedule that you set. You can use Scheduled Searches to monitor your environment for specific conditions or patterns, generate reports or alerts, or enrich your data with additional fields or tags. Workflows, Event Search, and Scheduled Reports are not ways to create event searches that run automatically and recur on a schedule.

NEW QUESTION # 13

What Search page would help a threat hunter differentiate testing, DevOPs, or general user activity from adversary behavior?

- A. Hash Search
- B. Domain Search
- C. IP Search
- D. **User Search**

Answer: D

Explanation:

User Search is a search page that allows a threat hunter to search for user activity across endpoints and correlate it with other events. This can help differentiate testing, DevOPs, or general user activity from adversary behavior by identifying anomalous or suspicious user actions, such as logging into multiple systems, running unusual commands, or accessing sensitive files.

NEW QUESTION # 14

To find events that are outliers inside a network, _____ is the best hunting method to use.

- A. searching
- B. **stacking**

- C. machine learning
- D. time-based

Answer: B

Explanation:

Stacking (Frequency Analysis) is the best hunting method to use to find events that are outliers inside a network. Stacking involves grouping events by a common attribute and counting their frequency, then sorting them by ascending or descending order to identify rare or common events. This can help find anomalies or deviations from normal behavior that could indicate malicious activity. Time-based searching, machine learning, and searching are not specific hunting methods to find outliers.

NEW QUESTION # 15

In which of the following stages of the Cyber Kill Chain does the actor not interact with the victim endpoint(s)?

- A. Weaponization
- B. Exploitation
- C. Installation
- D. Command & control

Answer: A

Explanation:

Weaponization is the stage of the Cyber Kill Chain where the actor does not interact with the victim endpoint(s). Weaponization is where the actor prepares or packages the exploit or payload that will be used to compromise the target. This stage does not involve any communication or interaction with the victim endpoint(s), as it is done by the actor before delivering the weaponized content. Exploitation, Command & Control, and Installation are all stages where the actor interacts with the victim endpoint(s), either by executing code, establishing communication, or installing malware.

NEW QUESTION # 16

.....
