How does the SAP Signavio Process Collaboration Hub help organizations?

- A. By providing transparency into processes and enabling collaboration.
- B. By creating marketing strategies based on customer feedback.
- C. By automatically generating legal compliance reports and enabling collaboration.
- D. By replacing existing process modeling tools with AI-driven automation.

정답：A

설명：
The SAP Signavio Process Collaboration Hub is designed to make business processes transparent and accessible across the organization while fostering collaboration among stakeholders.
"The SAP Signavio Process Collaboration Hub provides a central entry point for all users to access, share, and collaborate on process-related information, offering transparency across business processes." Reference:
It allows employees, analysts, and management to view, discuss, and contribute to process improvement initiatives, supporting collaborative transformation and process governance.
"It enables everyone in the organization to access process information, provide feedback, and collaborate for continuous improvement." Options A, C, and D are incorrect:
A: Compliance reporting is not a function of Collaboration Hub.
C: Marketing strategy and customer feedback analysis are outside its purpose.
D: It does not replace modeling tools; it integrates with Process Manager and Process Intelligence.
Thus, the correct and SAP-verified answer is B: By providing transparency into processes and enabling collaboration.

질문 # 22
What primary issue does WalkMe's solution aim to solve for customers?

- A. Challenges in adopting and effectively using digital tools
- B. High employee turnover rates
- C. Difficulty in maintaining accurate financial records
- D. Need for upgrading physical infrastructure in organizations

정답：A

설명：
The WalkMe Digital Adoption Platform (DAP), which is integrated into SAP's Business Transformation Management (BTM) solutions, primarily addresses the challenge of digital adoption - helping users effectively utilize enterprise software and workflows.
"WalkMe is designed to eliminate user friction with digital systems by providing contextual, in-application guidance and automation that accelerates digital adoption." Reference:
The main problem WalkMe solves is difficulty in adopting and effectively using digital tools, which directly impacts productivity, process efficiency, and transformation success.
"Organizations struggle with the complexity of modern applications; WalkMe's solution enables users to navigate and complete digital processes successfully without training dependency." Options B, C, and D do not represent the platform's focus:
WalkMe is not an HR solution to reduce turnover (B).
It does not manage physical infrastructure (C).
It does not handle financial record accuracy (D).

The central goal, as reinforced in SAP BTM documentation, is to bridge the gap between technology implementation and effective user adoption - making A the correct and verified answer.

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. The integration allows linking of business applications to business processes.
- B. The tools only provide visualization without actionable insights.
- C. Integration solely enhances reporting capabilities.
- D. Business processes are directly controlled by SAP LeanIX applications.

정답：A

This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

질문 # 25

What unique technology powers WalkMe's AI-first Digital Adoption Platform (DAP), enabling it to understand application context and drive adoption success?

- A. FedRAMP Certified Platform
- B. SAP Ecosystem Integration
- C. DeepUI Technology
- D. Library of Pre-Made Content

정답：C

설명：

DeepUI Technology is the core AI capability within WalkMe's Digital Adoption Platform (DAP). It enables the platform to understand, interpret, and interact with user interfaces dynamically without requiring code-level integration.
"WalkMe's DeepUI™ technology leverages AI to recognize and interact with any user interface element, allowing context-aware guidance and automation across applications." Reference:
Within SAP's BTM context, DeepUI allows WalkMe to seamlessly overlay SAP applications, providing real-time assistance and ensuring users complete digital processes correctly - a core aspect of digital adoption enablement.
"DeepUI powers WalkMe's AI-first approach, enabling contextual understanding of SAP Fiori, S/4HANA, and other applications for consistent adoption experiences." Option B (SAP Ecosystem Integration) describes compatibility, not the underlying AI engine.
Option C (Library of Pre-Made Content) is a feature, not a technology.
Option D (FedRAMP Certified Platform) refers to compliance for U.S. federal systems, not functionality.
Therefore, the verified and accurate answer based on SAP BTM and WalkMe documentation is A: DeepUI Technology.
